Breeding Horses.

The last number of the Journal of the Royal Agricultural Society contains an article on breeding horses from the pen of W. Dickinson.

Upon this subsel and this surface, you may expect sound, full-sized, healthy ani-mails. A wet, spongy, clay soil produces -in a wethe commencement of the evil;

The imperior to ours, that I resolved to buy one to take home." After considerable trouble be succe-ded in finding one, called "Napoleon," and says: "Fhave never once regretted the pur-chase. He has been worked on my farm ever since, almost always with mares. I have never had so good, quiet, active, and powerful a horse before. In no one instance has he given us any trouble. He is unlike cur Enclish cart-horses, for the sumlike cur Enclish cart-horses, the so are a farmer, and his endurance has a farmer, and his endurance has passed into a proverb. He is unlike cur Enclish cart-horses, for the sumlike cur Enclish cart-horses, and a farmer, and his endurance has a farmer, and his endurance has passed into a proverb. He is unlike cur Enclish cart-horses, and a farmer whele the sumlike cur Enclish cart-horses, for the sum to the work of the farmer sum to the sum to the sum the sum to the cur the sum to the field have the sum to the chase. He has been worked on my farm ever since, almost always with marse. In have never had so good, quiet, netty and powerful a hone before. In no one instance has be given us any trouble, the is unlike our English earth-orse, farmer, and this endurant to the whole, extrance more pleasures, is how a dash of blood. He has an Armer, and quet wel-ter, well proportioned to his size. The shows a dash of blood. He has an alwell turns, was a farmer, and divides the shoulders large, very deep, without is hape as wolf not be objected to far riding horse. The boson open, the for it he hair upon them. His feet are pro-refer in shape, and perfectly sound in work? To these may be added a host of the hair upon them. His feet are pro-feet in shape, and perfectly sound in work? To these may be added a host of Thite hair upon them. His feet are perfectly sound in work is his back short, rathered dipped, round shaped ribs, large loins, mather plain droup, in the cultivation of their mother ing hind quarters, very large thighs, low down, and tighty jointed together with prodigiously powerful clean hocks, and very short hind legs, well under him.— We never had a difficulty with the engine rath the ferry Randolph, all found an Elderado of consolation from lifes are and troubles, in the green and very short hind legs, well under him.— His stock are as good and kind as possible tais a saying with the men that Nap.'s colls want no breaking. My mares are small and netive; the stock are consideration from the generation of their stock are consideration. His stock are consideration that store is an all and netive; the stock are consideration of the stock are consideration. His stock are consideration the men that Nap.'s colls want no breaking. My mares are small and netive; the stock are consideration that store that as foals they look more like carringo.
It hat as foals they look more like carringo.
It hat as foals they look more like carringo and that as possible larger than the dams, but so cleanly.
It hat as foals they look more like carringo and that as possible larger than the dams. Such as the such as

neglected in theis early keeping. If they are starved when young and afterwards forced by high feeding, strangles, distemper, roaring, lameness, etc., will be the

mals. A wet, spongy, elay soil produces delicate constitutions, defective wind, pale colors, and large, flat feet. He advises selecting marce for breeding when three years old. They are more free from defects, cost less, and broad be-ter than when older. He very properly contends that none but the best marce should be selected.
