

The Farmer's Department.

Cultivation of the Soil.

In writing on physiology of the soil in our last number, we little thought that we should have an opportunity of seeing the question debated by the doctors, and in such a manner as to prove the great importance of the science.

At a recent meeting of the Fruit Grower's Society at Norristown, the question of cultivation was proposed, which was debated by Messrs. Saunders, Harrison, and others on the side of a principle in cultivation, while Messrs. Miller, Heines, and others contended that it was impossible to establish any principle.

Now we contend that there is a principle, founded upon Physiological facts, by which soil may be cultivated; by which means any fruit or crop may be successfully grown on the same land, but this condition depends upon the land receiving certain elements, which are necessary for the growth of the crop planted in it.

The mere fact of the land being stiff or open, clayey or sandy, rich or poor, makes but little difference in the final result.—The result depends entirely upon the amount of food contained in, or supplied to the land. But is this condition ascertained? How are we to tell what the soil needs; and how are we to know what quantities will be sufficient? We admit this requires observation and experience.

But does not the end justify the means? Does a physician expect to be able to know the phases of every disease or mode of cure, until he has had a large experience, and much observation and study? No more can a farmer become expert in his business, and know how to apply his fertilizers, until he has studied well the character of the land with which he has to deal; and not only this, but by study and experience has ascertained how the manures act upon their patient.

This we call Agricultural Physiology; an example may more clearly illustrate our meaning. A farmer has bought a tract of clayey land.—He wishes on this to grow every thing, and appeals to the numerous authorities for information. He finds there are but few crops recommended for clayey soils.

He begins to fear he has purchased a bad bargain, but in for a penny in for a pound, is his rule, and he thinks manure may help it, and plentifully applies stable and barn-yard manure, and plants his crops. The result is an entire failure; the crop does not yield sufficient to pay for the manure put on it. He gives up in despair, and proclaims the world that a clay soil is good for nothing; but he is mistaken. He has one of the best of unproductive soils to improve, and all it needs is to properly understand how to do it.

We can give but a general application; but this may show that the thing is plausible, and with a proper knowledge may be applied to any or all soils, no matter what their condition. First, it is necessary to see of what a clayey soil is composed. This will be found to be about three fourths alumina, one-eighth silica, and one eighth earthy matters. The only fertilizers in their crude state for plant life are the earthy matters. The others must be supplied; they are potash, lime, ammonia, and magnesia, chlorine, phosphoric and sulphuric acids, and iron.

Clayey soils are also retentive of moisture, and must be thoroughly under-drained. The failure in the case mentioned was occasioned by adding a retentive element to one which was overflowing with moisture, but stimulating, with an excess of ammonia already exhausted soil.

To the application of our medicines: we supply lime with slake lime or burnt oyster shells; potash by wood ashes; ammonia by stable and barn-yard manure; ground bones supply sufficient magnesia; then comes the generalizing elements: the lime and ammonia and potash supply sulphuric acid, while the bones and ammonia furnish phosphoric acid; the iron is generated from the alumina and silica.

We hardly hesitate to say that such a compost will make any entire clayey soil bloom as the rose, and render it fit for almost anything that may be planted in it. Other soils can be treated in the same manner, by studying their wants and supplying them. The temperaments of soils may be classed as follows:—The sanguine is the loamy soil, the nervous is the sandy, the bilious a combination of loamy and clayey, and the lymphatic is the clayey. With all this, however, there are climatic influences which must receive due attention. Every one knows that a tropical plant will not stand our changeable climate, or even our hardest plants stand the temperature of Greenland. This, then, is to be taken into consideration before planting. Climate changes the entire constitution both of men and plants; sudden changes destroy both. It is not to be inferred that the soils above described will grow tropical plants in this climate, or even tender varieties unprotected; but where climatic influences are favorable the soil will be in condition for successful growth. We do not intend to say that our re-

The best that can be produced for the circumstances.

We only give it as an illustration of how soils are to be improved.

SHALL WE PLOW OUR ORCHARDS?—I am of the opinion that a plow is not a suitable implement to use in an orchard.

A few years since, after having plowed my orchard about every way, and harrowed it in the same, I seeded it to grass—but found the surface of the ground too uneven to seed down, without much labor with hoe and shovel, to level the tree-banks, but at last, got it quite well done and I think it will stay done.

Now what will keep the trees in good growing condition? I have practised mulching around the trees annually, which appears to be just what is needed. In winter or spring,—probably mid-winter is better if snow will permit—take straw from the straw pile, after the cattle have trodden it under foot, and mixed the manure with it, and put it around the trees, at the rate of a wagon load to eight or ten trees, thick enough to keep down grass and weeds. Consider whether the trees need much or little manure with the straw, and govern accordingly. If the orchard has been seeded down so long that the turf has become close and tough, I would take a pick or other implement and dig up the turf for several feet around the tree, replace the turf bottom-side up, and mulch as before. This seems to be what is wanted to keep the soil loose and enrich it as much as necessary. If fact, it seems to be what new rum was said to be in my boyhood—good in wet weather, and good in dry weather; good in hot weather, and good in cold weather; finally, good all the time.

I shall practise this method a while longer, and if I discover my orchard to be running down, and cannot find a better preventive I shall again resort to the plow.—Cor. of Wis. Farmer.

The Judge's Saw Log. In the village of W.—lived a man who had once been the judge of the county, and was known all over by the name of Judge E.—He kept a store and saw mill, and was always sure to have the best of the bargain on his side, by which means he gained an ample competence, and some did not hesitate to call him "the biggest rascal in the world." He was very conceited, and used to delight in bragging of his business capacity when any one was near to listen. One rainy day, quite a number were seated around the stove in the store, and he began, as usual, to tell of his great bargains, and wound up with—

"Nobdy never cheated me, nor they can't neither."

"Judge," said an old man in the company, "I have cheated you more than you ever did me."

"How so?" asked the Judge.

"If you'll promise you won't go to law about it, nor nothin', I'll tell, or else I won't; you are two much of a law character for me."

"Let her hear! let her hear!" cried half a dozen voices. "We'll bear you out of it—go on."

"I'll promise," said the Judge, "and treat in the bargain, if you have."

"Well, do you remember that wagon you robbed me of?"

"I never robbed you of any wagon!" exclaimed the Judge; "I only got my own."

"Well, I had made up my mind to have it back, and—"

"But you never did?" cried the Judge.

"Yes, I did, with interest, too."

"How?" thundered the now enraged Judge.

"Well, you see, Judge, I sold you one day a very nice pine log, and bargained with you for a lot more. Well, that log stole off your pile, down by your mill, the night before, and sold it to you. That night I drew it back home and sold to you your own log from me twenty-seven times!"

"That's a lie!" cried the mad judge, running to a book, and examining his log accounts; "you never sold me 27 logs of the same measurement."

"I know it," said the vender of logs. "For by drawing it back and forth, the end wore off; and as it wore, I kept cutting the end off, until it was only ten feet long—just fourteen feet shorter than it was when you first bought it; and when it got so short, I drew it home, and worked it up into shingles, and then I concluded I had got my money back—and in my pocket."

The exclamation of the judge was drowned in the shouts of the by standers, and the log-drawer found the door without the promised treat. To see a mad man you have only to ask the Judge if he was ever shamed.

"PRINTERS CAN READ ANYTHING."—The above remark is often made by correspondents and advertisers as an excuse for half-spelling words, abbreviating technicalities and slovenly, unreadable writing generally. There is no doubt printers are better decipherers of bad manuscript than any other class of persons, but when, for instance, a merchant writes that he has received five barrels Dts., ten pounds Cts., it is somewhat difficult to tell whether the merchant really means boots, biscuits, or butter; or, if he means boots, biscuits, or butter; or, if he means boots, biscuits, or butter; or, if he means boots, biscuits, or butter.

REDUNDANCIES IN SPEECH.—"They are united together" should be, "they are united." "I shall fall down" should be, "I shall fall;" "down" is superfluous.—"You do not lift up;" "to lift up" should be, "to lift;" you cannot lift a thing "down."

Educational Department.

Home Instruction.

Jean Paul Richter says, in his *Levana*, that "the parent's hand may cover and shelter the germinating seed, but not the luxuriant tree; consequently first faults are the greatest; and mental maladies unlike the small pox, are the more dangerous the earlier they are taken." One can hardly realize, who does not reflect attentively, how large a portion of the knowledge which is obtained through the senses, is acquired during very tender years, and consequently how much the after-life is influenced and shaped by these early impressions. Jean Paul has not inaptly compared them to the germinating seed.

What a child sees and hears during the first four or five years of life, constitutes by far the largest portion of the perceptions which he ever acquires, and not unfrequently determines his future thinking and acting. The language of Richter is again applicable:—"The words that the father speaks to his children in the privacy of home are not heard by the world; but as in whispering galleries, they are clearly heard at the end and by posterity."

The intercourse of the father with his children is often very unnatural and un-fatherly. He does not draw them about him and cultivate their social qualities.—He fails to supply daily food for their growing minds and hearts. And does he not often come to them with a tired, perplexed, yea, even a severe and repulsive demeanor? Are they not awed into silence in his presence and glad to escape from his atmosphere into one of less restraint? Children are often more in sympathy with, and under the influence of, ignorant and sometimes vicious servants than they are with their own parents.

But what is the remedy? A reflecting parent will readily discern. Consider, in the first place, that the soul of the child is to be fed and clothed as well as his body. You could not bear to hear your child cry for bread, and see him pinched with the cold. Can it be that you are deaf to the complaint of his higher, his immortal nature?

What are the wants of his nature?—They are simple but not the less imperative. Milk and water is not an invigorating article of diet for a strong man; but it is just suited to the infant, and is just as necessary to its growth as the concentrated food of manhood.

Did you ever know a child that would not listen to a story? How many tears have been shed and heart-emotions awakened by the recital of some of the simple stories of the Bible! What child is not interested to know about the sea and its many wonders? The perils of those who go down upon the great deep? The wild animals that roam the forest—their natures, their instincts, and their encounters with each other and with man?

The child's nature, too, is quickly touched by the recital of a noble or generous deed. He is alive to the sentiments of heroism and philanthropy. His young heart is thrilled and kindled by the noblest of all deeds.

LEGAL ADVERTISEMENTS.

Executor's Notice.

WHEREAS Letters Testamentary have this day been granted to the undersigned, on the estate of Wm. McDonald, late of Lancaster Tp., Butler county Pa., dec'd. Therefore I hereby give notice that I will receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary.

Orphan's Court Sale. BY virtue of an order and decree of the Orphan's Court of Butler county, Pa., made on the 24th day of June, A. D. 1864, at 1 o'clock, P. M., of said day, fifty acres of land to be held of the east end of a large tract of land situated in Allegheny Tp., said county, bounded by lands of Dr. Owen, on the east and south, and by lands of Alex. and Wm. Grant, Alex. Coulter, Thomas Grant and others.

Orphan's Court Sale. BY virtue of an order and decree of the Orphan's Court of Butler county, Pa., made on the 24th day of June, A. D. 1864, at 1 o'clock, P. M., of said day, sixty acres of land to be held of the east end of a large tract of land situated in Allegheny Tp., said county, bounded by lands of Dr. Owen, on the east and south, and by lands of Alex. and Wm. Grant, Alex. Coulter, Thomas Grant and others.

Orphan's Court Sale. BY virtue of an order and decree of the Orphan's Court of Butler county, Pa., made on the 24th day of June, A. D. 1864, at 1 o'clock, P. M., of said day, sixty acres of land to be held of the east end of a large tract of land situated in Allegheny Tp., said county, bounded by lands of Dr. Owen, on the east and south, and by lands of Alex. and Wm. Grant, Alex. Coulter, Thomas Grant and others.

Grant, Alex. Coulter, Thomas Grant and others.

Administrator's Notice. Estate of Isaac Stillwagon, dec'd. WHEREAS Letters of Administration have this day been granted to the undersigned on the estate of Isaac Stillwagon, late of Allegheny Tp., Butler county Pa., dec'd., therefore all persons knowing themselves indebted to said estate will please make immediate payment without delay, to the undersigned, at his residence, on the premises on which said estate is being administered, on or before the 27th day of July, A. D. 1864, at 1 o'clock, P. M., of said day, sixty acres of land to be held of the east end of a large tract of land situated in Allegheny Tp., said county, bounded by lands of Dr. Owen, on the east and south, and by lands of Alex. and Wm. Grant, Alex. Coulter, Thomas Grant and others.

Guardians Sale. BY virtue of an order and decree of the Orphan's Court of Butler county, Pa., made on the 24th day of June, A. D. 1864, at 1 o'clock, P. M., of said day, sixty acres of land to be held of the east end of a large tract of land situated in Allegheny Tp., said county, bounded by lands of Dr. Owen, on the east and south, and by lands of Alex. and Wm. Grant, Alex. Coulter, Thomas Grant and others.

Business Advertisements. NEW MARBLE SHOP. THE undersigned would respectfully inform the public, that he has opened a new Marble Shop and is now prepared to furnish in superior style, all kinds of Marble, Granite, and other materials, for monuments and grave stones, and all kinds of work in the marble line.

Business Advertisements. AMERICAN AND ITALIAN MARBLE, Nos. 1 & 2. All work made on the shortest notice, and in the latest style. Call and examine our stock, on the English Lutheran Church, Butler, Pa.

Business Advertisements. LANE, MABOY & CO. DEALERS IN FOREIGN AND DOMESTIC DRY GOODS. No. 140, Federal Street. (SECOND FLOOR BELOW NEW MARKET HOUSE.)

Business Advertisements. ALLEGHENY CITY, Pa. MARTIN REBER, & CO. STOVES AND PLOUGHS. WRECKREBER & REBER, Foundry and Machine Shop, opposite Boyd's Building, Butler, Pa. will keep on hand a large stock of Stoves and Ploughs, and all kinds of machinery, and will repair and rebuild any kind of machinery, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary.

Business Advertisements. NEW HARNESS SHOP. HAVING opened a new Harness Shop, opposite Boyd's Building, Butler, Pa., will keep on hand a large stock of Harness, Saddles, and all kinds of harness materials, and will repair and rebuild any kind of harness, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary.

Business Advertisements. SURGEON DENTIST'S. DR. S. R. & C. L. DIEFFENBACHER. Office on Main Street, opposite the Post Office, Butler, Pa.

Business Advertisements. VOGELY HOUSE. WILLIAM VOGELY, Proprietor. Office on Main Street, opposite the Post Office, Butler, Pa.

Business Advertisements. W. H. H. RIDDLER, Attorney and Counselor at Law. Office on E. E. corner of Diamond, Butler, Pa.

Business Advertisements. R. M. M'LURE, Attorney at Law, AND PENSION AND CLAIM AGENT. Office on E. E. corner of Diamond, Butler, Pa.

Business Advertisements. J. D. M'JUNKIN, Attorney at Law. Also Licensed Claim Agent. Office on E. E. corner of Diamond, Butler, Pa.

Business Advertisements. McCANDLESS & GRAHAM, Attorneys at Law. Office on the South-west corner of the Diamond, Butler, Pa.

Business Advertisements. HAVE YOU SEEN THIS? THE undersigned would respectfully inform the public, that he has opened a new Harness Shop and is now prepared to furnish in superior style, all kinds of Harness, Saddles, and all kinds of harness materials, and will repair and rebuild any kind of harness, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary.

Business Advertisements. WATCHES, CLOCKS & JEWELRY. IF you want a good Watch, Clock, or set of good Jewelry, go to the undersigned, who can give you the very best of the kind, at the lowest price, and in the most satisfactory manner. Office on Main Street, opposite the Post Office, Butler, Pa.

Business Advertisements. ASH & LYON, Attorneys. WILL attend to the prosecution of all claims for BOUNTY, BACK PAY, PENSIONS, and all other claims, and will also receive and pay all claims against the said estate, within the time specified in the said Letters Testamentary.

Business Advertisements. A. M. NEYMAN, M. D. Physician and Surgeon. Office immediately opposite Walker's buildings, Butler, Pa.

Business Advertisements. THE TRIBUNE FOR 1864. PROSPECTUS. The New York Tribune, first published on April 10, 1841, has today a larger aggregate circulation than any other newspaper published in America, or (we believe) in any other country. Its circulation is now over 100,000 copies per week, and its influence is everywhere felt.
