The farmer's Department,

Farmers do not generally realize • Farmers do not generally realize the fact, that good, clean tillage is about equal to an application of ma-nure to lands cultivated slovenly. We all know how much larger crops we der, when so endorsed it must be left with the office realize in the garden than upon the farm, just from the superior attention paid to it in cleansing the ground of paid to it in clean sing the ground of the United States, at Washington, the several Assistant all noxious vegetation and frequently reasures and designated Depositories, and by the Soil. The Genesee Farmer makes some useful remarks on the subject as Pirst National Banks of Pittsburgh, P.a., and by all National Banksfollows :

"We must, more than ever before, realize the fact that 'tillage is man-ure' - that the literal meaning of the word 'manure' is maximum hand, ouverer, to work. To manure the land is to hoe, to dig, to stir the soil to expose it to the atmosphere, to $U \le 1$ plow, to harrow, to cultivate. T ancient Romans made Stercutius The god because he discovered that the droppings of animals had the same effect in enriching the soil as to hoe it. We can leave the modern meth-od of manuring land to our Western farmers, while we go back to the or-iginal method of stirring the soil. Mr Lawes has raised a good crop of wheat every season for twenty years on the same land by simply keeping it thoroughly clean by two plowings in the fall and by hoeing the in spring by hand. The Rev. S. Smith of Lois-Weedon, has for years raised successive crops of wheat by a pro-cess of trenching the land with a fork and by hand-hoing. We do not advocate this system, but the princi-ple is applicable to our case. We can manure our land by better tillage." roppings of animals had the same

Salting Hay. In hurrying seasons, when there is much bad weather, it is sometimes necessary to get hay in when imper-fectly cured, or not sufficiency made to prevent it becoming musty when moved. When this is the case, the use of salt is found to be highly bene-ficial; it prevents must, and give a fine flavor to hay that would other-

wise be almost worthless for ordina ry purposes. From one peck to one peck and a half to a ton will be found nough to prevent mould, unless the hay is very deep, when the applica-tion of half a bushel, or even a large quantity will be allowed. Meadow hay may be preserved by the use of salt, and its value greatly increased thereby for feeding purposes, espe-cially when given to sheep. And here permit me to remark that the very best article of winter feed that can be provided for sheep, if cut before it cones over rip-, and properly made, is the coarse grass abounding in our natural meadows.

INDIAN BAKED PUDDING .- Take two quarts of sweet milk, and boil a verry stiff batter ; add a teaspoonfull of salt and make very sweet with molasses. Butter a pan and pour the batter in, and pour the remaining quart of cold milk over it. Cut little bits of butter and put on the top, and bake two hours in a moderate oven. Any person who has nev-er ate of it before, will think they are cuting custard.
