The farmer's Department.

System of Rotation on Grain Farms. What is the most profitable general system of farming for those who have say from 80 to 200 or more acres of grain land; and who, remote from of grain land; and who, remote from city markets, are limited to cereals and grazing? Satisfactory results during the last twelve years, or more have led to the opinion that a six years' retation, three years in clover grazing and three years in grain, a grain crop each year is the most prof-

If you have timethy meadow enough for hay, bring more than one-third, if you have not, bring about one-third of your grain land into the condition of having been grazed three years; the residue of your grain land being devoted to clover grazing or hay, or The three years grazing will give you a heavy and rich soil. If clayey, plow at the proper time in the full; feiable in the spring. The land if friable, in the spring. The land is too rich for fallow and winter wheat. Let the first years' crop be corn, beans potatoes, roots, sorgo, broom or broad-east corn; according to the labor at

pounds of clover seed per acre, applying timothy seed in the fall, and only on the low and wet spots, apply-

followed with wheat or winter barley. to flowed with wheat or winter parley. It may be spring barley, peas or oats or beans if preceded by corn. It may be winter barley followed by wheat, or the reverse. Much as the practice of two successive crops of wheat of the state of the successive crops of the state of the state of the successive crops of the state of the sta wheat or barley is deprecated, in one grain after corn, because of the labor involved, occasionally reserving robor involved, occasionary reserving corn enough for the second year, or substituting peas. A crop of beans or peas is desirable in the rotation, as not materially diminishing the yield

NATURAL LAWS FAVORING THIS SUSTEM First: In addition to the fertility induced by grazing, three years will produce a heavy and rich soil, of un-appreciated value, which is the cheapand most essential basis of fertil-This is a very important point.

Second; Three years is assumed as the longest period of rest that economy will warrant for lands adapted to grain. Two years may be equivalent if the land is assisted by surface manures applied in connection with the grass. During these three years it is claimed that the particles of the soil assume new conditions, becoming, upon cultivation, fine, and more friable, and retaining these qualities during the three years of cropping. However well manured, the particles of most garden soils that are constantly hoed, will be found to vary from the size of wheat to acorns. Seed to clover two or three years, and the above results follow. Old pioneers remember that new land was cultivated with little or no grass, and remained mellow from fifteen to twenty-five years, but finally became gritty and heavy. It is claimed that the benefit of

giving land rest has not received due attention.

SOME OF THE ADVANTAGES OF THIS

SYSTEM. You do not commit the sin of stopping grass from growing and trying to get something out of land when there is nothing in it. Impoverish-ed land if well seeded will attain a remunerative fertility, and persist-ance in the system will improve the land, and enable you, at the smallest cost, to carry all the stock, and raise all the grain, that the land is capable of. Your land, whether opened or closed, is doing its utmost in the proclosed, is doing its utmost in the production of graiu or grass, and no time is lost. There is economy of money and labor in seeding but once in six years, and you can afford to do it thoroughly. The third years' crop is not apt to lodge, and the seed takes well,—at least I hve not failed in a six year interaction. They have all broken through the enemy's intrenched lines taking some forts, guns and prisoners. Sheridan with his own cavalry the 5th corps and part of the 2d is coming in from the West on the enmy's flank and Wright is already tearing up the Southside Railroad.

BONNETS, American, agriculture, and are an incalculable loss to the country. Your manure whether coaurse or fine. manure whether coaurse or fine, may be applied on the surface at the most Proper time, when the grass is short. Your breaking up is done in the fall or spring, when the land is in a prop-er condition of moisture, and the sod can be we'l covered in. Subsequent

can be we'l covered in. Subsequent tillage is after haryest, when the land even if dry, is not hard to plow.

SOME DISADVANTANES OF THIS SYSTEM.

It is essential to be efficient in teams and labor from harvest time to the close of aceding, whether this be a disadvantage, judge ye? A fallow may be thought necessary to eradicate noxious weeds. I have found that a crop of winter barley is reaped at a good time to check Canada thistles, and that two deep and close plowings in preparation for the third crop has used them up, except on the back furrows. This is the only instance in which I have plowed stubble twice. I think it will pay. Where quack grass infests land, the second year and after the hoed crop

is a good time to give it a very thor-ough fallowing to be followed by win-ter grain for the third years' crop. It may be deemed a disadvantage to the system that some suspension of rasing crops is necessary to get fairly entered upon it.

If yentered upon it.

I might say much from experience of the profitableness of this system, of the regularity and uniformity of its processess and proceeds, but desiring brevity, have omitted many desirable.

Doubtles many persons have pursued a system very like this, yet it may be useful to present it, and should you publish this article, I in-vite your free criticism for the bene-fit of your readers. Under the debt entailed upon us by this war, it is of the first importance that American farmers should make the most of their means. To create and economize wealth is patriotism, is merit. - Geu. Farmer.

A GALLANT FEMALE SOLDIER .-- Dr. Mary E. Walker, who is well known to many of our citizens, writes us from Chattanooga an account of a singular case of female martial spirit and patriotic devocommand and the probable profit.

The third years crop should be winter wheat or barley, that the land may be seeded not less than ten lilinois. Soon after the war commenction to the flag. Frances Hook's parents died when she was only three years old ed, she and her brother enlisted in the 65th "Home Guards," Frances assuming the name or "Frank Miller." She serv The second years' crop, like the first, is flexible, and may be adapted to profit, or to the convenience or ne-having arisen. She then enlisted in the essities of wintering stock. It may 60th Illinois, and was taken prisouer in a corn, if preceded by beans, and battle near Chattanooga. She attempted to escape, and was shot through the calf of one of her limbs, while said limbs were doing their duty in the attempt. The rebels searched her person for papers, and discovered her sex. The rascals respected her as a woman, and gave her a sepaand the only instance of trying it, the second crop was 25 bushe's of wheat per acre, while the first was only 17 bushels. I seldom sow winants commission if she would enlist in their army. She had no home and no relatives, but she said she preferred to fight as a private soldier for the stars and stripes rather than be henored with a commission from the rebels. About ten months ago she was exchanged. The insurgents tried to extort from her a promise that she would go home, and not en

ter the service again.
"Go home!" she said, "My only broth er was killed at Pittsburg Landing, and

I have no home, or any friends!"

Dr. Walker describes Frank as of about medium heighth, with dark hazel eyes. dark brown hair, rounded features and feminine voice and appearance. Dr W is well versed in human nature, as well as anatomy, and she believes that justice to the young woman in question requires that she should be commissioned a lieutenant in the army. The dector also argues that Congress should assign women to duty in the army, with compensation as well as colored men, averting that patriotism has no sex. Whether the Presi dent will commission Miss Hook as a lieutenant, or Congress will draft Mrs. Walker's country-women into the service we know not, but we are certain that the "Doctor" is thoroughly in earnest, and that the story of her new protege is an interesting one.

Inporiant Dispatches. New York, April 2.

President's Lincoln's last dispatch at 11 a. m. shows general smash up of the rebel line of works in front of Petersburg, by Wright, Park and Ord, who have joined in the fight. Sheridan's cavalry, the 5th Corps and part of the 2d, are comin infrom the West on the enemy's flank. ming
