Sickness, For some weeks past there has been great amount of sickness in the Borough of Butler and vicinity, as also, in differ-ent parts of the county. The most prevcomplaints are Diarrhea and Tyalent phoid Fever; quite a number have died of these diseases. Our Pyhsicians are all constantly engaged in attending upon the numerous calls made on them; and al-though quite a number have died, yet, when we take into account the prevalence of the diseases mentioned abaye, it must be acknowledged, that the mortality among us is but small; and from all that we have been able to learn, sickness is abating and the health of this community is now on the increase.
