[From the Germantown Telegraph.]

ED. TELEGRAPH, - Dear Sir : Yours, asking me to give, for the benefit of your readers, my ideas as to the advantages and disadvantages of fall or autumnal plowing for corn, was duly received. Youremark that I do not now practice it as much as I did a few years ago, and you wish to know my reasons for so doing, or rather for not doing. I will endeavor to answer your questions to the best of my ability, although you put them pretty "strong" even to a "book

farmer."

One of the main benefits claimed for the practice of fall plowing for preventive for the practice of fall plowing for corn is, that it is a sure preventive of the ravages of the cut worm; those who follow the practice generally account for this fact upon the theory that plowing in the fall theory that plowing in the fall brings the crysalis or egg of the cut-worm near the surface, and it is killworm near the surface, and it is killed by freezing during the winter
and spring months. Now a slight
examination of the insect which is
the parent of the cutworm, will plainly show that it could not deposit the
egg at any great distance from the
surface, for its structure is so delicate egg ac any general superior of the sect plant of the true and of such a form as to entirely preclude all idea of its burying its egg deeper than the fraction of an inch. And farther, even if the parent insect was capable of so coverin its egg to the depth of five or six inches, those who have examined the young grub which constitutes the fusure ravages of our corn fields, will ture ravages of our corn fields, will the superior of the sect planted or sown, and the mode and expense of cultivation must be presented in writing beyoung gruo which it must do own, and the mode and expense of cultivation must be presented in writing bebest 3 spanish ewe lambs,
best 3 spanish ewe lambs,
best 3 spanish ewe lambs,
best 3 saxon ewe lambs,
best 3 french buck lambs,
best 3 spanish ewe lambs,
best 3 french buck lambs,
be soon after it is hatched, or perish for

want of food.

The egg is deposited in the same manner as that of our common road beetle; it is encased in manure, and deposited among the roots of grass in small balls about the size of a in small balls about the size of a large pea, but more elongated, and coated on top with some peculiar water-proof composition; if a drop of water is placed on this surface, it runs off as from a greasy plate. On the under side of this ball, (as it is placed by the intect) is a flat surface which, unlike the remainder, is not entirely water-proof but only partailly so, for water dropped will be also by sharphed built be about the ball water heads of the size of a large water before the size tailly so, for water dropped will be slowly absorbed until the whole ball becomes saturated, but the outside coating on top never seems to lose its water-proof qualities. It seems as if this water proof coating was not put on until the ball had reached its destined position, and then the insect was not able to reach under it by the nit rested on the grown. when it rested on the ground, and hence could not protect this part with the water-proof coating, as it did the remainder of the ball.

Now, I will not pretend to deny but that fall plowing for corn (if carefully done) is a preventive for the ravages of the cutworm, but I do not think that in good effects are due to freezing, for we seldom have winters during which the frost does not go more than furrow deep; in fact, I do not believe that any reasonable amount of freezing and thawing would have much effect upon the eggs which are to produce the cutworm.

which are to produce the cutworm.

I am more fully convince that the benefit is not due to the above cause, by knowing that early spring plowing is as sure a preventive of the bad effect of the cutworm as the the operation were performed in the fall. Is it not more likely that by Bingh plowing as a remedy for the ravages of the cutworm."

best facing or paring stall any age, best trotting horse or mare,

of the cutworm."

In this case at least I would advise the following of my preaching rathmare, the following of my preaching rathmare, second best " 5 00 second best

er than my practice.

Another advantage claimed by those who follow this plan, is that by plowing in the fall we have more time in the spring to devote to other labor; but unless the practice has labor; but unless the practice time in the spring to detect to charled the spring and the spring to detect to charled the spring to detect the spring the spring to detect the spring the sprin comparison will show that the same time expended in spring plowing and harrowine will put the ground into much better order.

My plan would be to plow the ground intended for oats and potatoes

The ground intended for oats and potatoes

The ground mare and colt, 500 ry much weight, for I think a fair

much better order.

My plan would be to plow the ground intended for oats and potatoes first in the fall and then if the season would permit, plow the sod for 2d best "dest pair matched carriage mule best single buggy horse or mare, best brood mare and colt, 2d best "dest pair matched carriage mule best single buggy horse or mare, best brood mare and colt, 2d best "dest pair matched carriage mule best should mare and colt, and the property of son would permit, plow the sod for corn, for I consider more good can be done by fall plowing for oats and potatoes than for corn, and especially for potatoes.

—The crops throughout the the county are better than was expected.

—The Farmers are now having a busy time in storing away their hay, oats. &c. The weather so far has proved very favorable for harvesting.

FIGHTH ANNUAL FAIR

OF THE—
Butler County Agricultural Society,

Butler County Agricultural Society,

Butler County Agricultural Society,

S. Lusk, and Robert Gilleland. TO BE HELD IN BUTLER, ON September 26th, 27th & 28th, 1866.

The Entry Books will be opened on the 15th day of September, and continue open until the evening of the 26th day of September, at which time they will be best blooded bull calf,

fall. Is it not more likely that by the operation of plowing we invert the ball which contains the egg and bring the non-water-proof surface into such exposition that it absorbs rain and thus destroys the vitality of the egg? Or that by reversing the the sod we cover the egg so d celly and beyond the reach of the warmth of the sun and air, that it is not hatched, or if it should be hatched, that it cannot force its way to the surface or perish in the attempt? So you see that I still believe in "fall plowing as a remedy for the ravages blowing as a remedy for the ravages blowing as a remedy for the ravages blowing has been drill, best corn planter, Committee—John T. RULES AND REGULATIONS. We invite the attention of the public to our premium list. It has been revised with great care, and with direct reference with great care, and with inrect reterence to the liberal encouragement of all class-es of industry and commendable enter-prise. Look over the list at your leisure; note the premium you wish to draw and see to it that some of your neighbors don't as alread of with

don't go ahead of you.

BAND OF MUSIC. A good band of music will occupy a prominent stand on the grounds during the fair.

#### THE ADDRESS.

An address from some distinguished speaker and friend of Agriculture may be expected.

Each member of the society will be furnished on the payment of the annual fee of one dollar, with a certificate of membership. This certificate will give the person whose name is written thereon, free access to the grounds during the fair. These certificates can be procured from the President, Vice President, Secretary

and Treasurer. do
do
will be furnished with single tickets of
admission at any of the ticket offices for
twenty five cents. Children under ten
years old, ten cents. These tickets must
be delivered to the keeper as you pass in.

Directions to Competitors. Competitors are requested to enter all articles for exhibition in the Secretary's books on or before the evening of the first day of the fair. Cards will be given to each competitor, which must be at-tached to the animal or article you may

tached to the animal or article you may wish to exhibit.

A committee will direct you as to the location and arrangement of anything you, may have to exhibit.

There is an abundance of water convenient to the ground—hay will be furnished free of charge—other feed to be provided by the owners of stock.

vided by the owners of stock.

Rules and Instructions for Judges.

1st. You are respectfully requested to report yourselves to the manager's tent on the first day of the fair if possible, and in no event later than 10 o'clock of the second day.

2d. At 10 o'clock of the second day your names will be called at the manager's tent, and all vacancies will then be filled.

3d. You will receive your class books and enter upon the discharge of your duties immediately. The class books will refer you to the number affixed to the different animals or articles submitted for your examination. In these books you will also write out your report.

your examination. In these books you will also write out your report.

4th. You will not be permitted to serve on a Committee in any class in which you may be competing for a premium.

5th. You will in no case where there is no competition, award premiums to arcles or animals that are not meritorious.

6th. Pay no attention to animals or ricles that have not a numbered card and class attached. and class attached

6th. You will take into consideration the symmetry, early maturing, size, age, feeding, and other circumstances connected with the animal you may judge, but give no encouragement to over-feeding. give no encouragement to over-feeding. 8th. A majority of the members on

oth. A majority of the members on each committee will constitute a quorum.

9th. Permit no persons to interfere with your examinations or to be present at your deliberations.

10th. Each member of the Board of Managers will have the supervision of a particular department on the grounds— and to this member you will apply for any instruction or information you may want.

#### GENERAL RULES.

1st. Members of the society must pay

1st. Members of the society must pay
the sum of one dollar annually on or before the first day of the fair.
2d. Competitors for premiums mustbe members of the society.
3d. All animals placed in competition
for premiums must be owned in the countyby persons offering the same, or by members of their family under twenty years
of age; and all articles placed in competition for premiums must have been manufactured in the county.
4th. Products of the soil or manufactured articles must be produced or manufactured articles must be produced or manufac-

# "HERE IT IS"

# HENDERSON'S CARMINATIVE

AREMEDY

That has been tried and stood the test, not only in an occa-sional case, but in every com-munity where used it has been pronounced the safest and mos reliable remedy known for

CRAMP IN THE STOMACH OR BOWELS, CHOLERA

MORBUS, &c. It contains nothing irri-tating or injurious to the stomach, and is mild but prompt in its action, and effects a permanent cure by removing the cause of the complaint. No FAMILY should be without it, as the cost is trifling compared with the suffering that may be avoided by having it at hand in case of a sudden

Try it, and judge for yourself.

SOLD BY ALL DRUGGISTS.

Prepared only by J. HENDERSON & BROS. PITTSBURGH, PA. J C. REDICK & CO.
