The Law About Thistles.

We have a law upon our statute books that seems to be overlooked. Indeed we suppose many farmers are ignorant of its existence. Yet it is of no little importance, and we give it below as particulaaly appropriate at this season. The State Agricultural Society is interesting itself on this subject, and parties allowing themselves to become amenable to the penalties decreed in the law, may expect to be prosecuted under its provisions. We remark further that a notion prevails among many (and it is a motion prevails among many (and it is a motion prevails among many (and it is a motion prevails among many (and it has some support from experience) that the most effectual time to destroy thistles, or indeed, any weed, is early in August "when the sign is in the heart." Plants cut at this time, it is said, will surely die, effectually. The following is the law referred to:

It shall be the duty of every person or persons, and of every corporation holding lands in this Commonwealth, either by lease or otherwise, on which any Canada thistle, may be growing, to cut the same so as to prevent such weeds or thistles from going to seed, and the seed of the same from ripening: and any person or persons, or corporations as aforesaid, who shall or may have land as aforesaid in the said sounties, and who shall neglect or refuse to comply with the provisions of this act, shall forfeit and pay a fine of fifteen dollars, one-half to the County Treasurer, and the other half to the use of the person suing for the same, who shall be a competent witness to prove the facts, to be recovered as other debts of the person suing for the same, who shall be a competent witness to prove the facts, to be recovered as other debts of the person suing for the same, who shall be a competent witness to prove the facts, to be recovered as other debts.

The Trenton (N. J.) Sentinel having been requested by some rural subscribers to add an "Agricultural

the child's shoes should be removed, and the mother should herself ascertain if

A Black Man's Party in the South. It is the destiny of the Republican par-

of this set, shall forfeit and pay a fine of fifteen dollars, one-half to the County Treasurer, and the other half to the use of the person suing for the same, who shall be a competent witness to prove the facts, to be recovered as other debts of the like amount, before any Justice of the Peace or in any Court of record in said county.

If any person or persons, or corporation, looking land as aforesaid, on which gave the colored race the co having been requested by some rural subscribers to add an "Agricultural Department to its columns, falls ill with the idea, and as a commencement, furnishes the following "advice to farmers:"

1. In breaking up the ground in the indignation which that suggestion caused? America desired to reconcile all nationalities in her own, and would inevitable have crushed any attempt to set up. ably have crushed any attempt to set up

1. In breaking up the ground in the spring always use a plow. A hammer will not answer. See that your horses are hitched at the righten of the plow, or it will "go back" on you.

2. In sowing oats be careful that your boys do not use the "wild" variety. The wild will "come to a head" the sconest, but it is not profitable. We never knew a crop off this kind to pay expenses.

3. Flat land will never answer for corn. It should always be planted in hills. The farmer who neglects this caution will have a hard row to hoe. Four grains (avoirdupois weight) to the hill is the rule for planting. Corn in the ear is better than corn on toe. We have tried both.

4. Plant your potatoes with the eyes downward. The caution is particularly necessary when "women's rights" are employed to hoe the earth over them.

5. To prevent the pigs from getting at the planted corn, ring their noses. To prevent the chickens from doing the same wring their necks.

6. For getting wheat properly in Mandel and those work and to have a hard row to make the colored citizen an American pround. Equally certain will be the overthrow of an effort to gather the millions of colored men in the United States into a distinct political organization. We desire the time to come speedily when it shull no longer be matter of surprise to see colered men at the polis, on Juries, or in office; but we know that this will only come by the absorption of the race in the American nationality. It is said that this is impossible; that the differences of the races are not to be reconciled. This we do not believe; but the shortest way to prove it would be to regarize a Black men's party. That would be conclusive. If after four years fighting, the greatest results of which are the freedom and the citizenship of the colored men, their first act should be to affirm that color is the true basis of political distinction, there would be no more to say. Republicanism would be answered and silenced, and those who hap put it to shame might boast if they could that; while we had soug

noses. To prevent the chickens from doing the same wring their necks.

6. For getting wheat properly in the ground a sewing machine is indispensable.

7. Rye should be put in early; say the first thing on gettting up in the morning. But few farmers require instructions therein.

Children's Fert.—Life-long discomfort disease and sudden death often come to children through the inattention or carelessness of the parents. A child should never be allowed to go to sleep with cold feet; the thing to least attended to, see that the feet are dry and warm; neglect of this has often resulted in a dangerous attack of croup, diptheria or a fatal sore throat.

Always on coming from school, on entering the house from a visit or errand, in rainy, muddy, or thawing weather, the child's shoes should be removed, and the method has a selection of the child's shoes should be removed, and the method has a selection in the content of the child's shoes should be removed, and the method has a selection in the content of the child's shoes should be removed, and the method has a selection in the content of the child's shoes should be removed, and the method the method to see the content of the child's shoes should be removed, and the method the method to see the content of the content of
