EUREKA!

The Latest & Best Improvement in Dentistry!

RUBBER AND GUTTA PERCHA.

INSTEAD OF GOLD AND SILVER.

IN the Eastern Cities, for a year or more, Vulcanized Rubber and Gutta Percha have been used as bases for Artificial Teeth, but owing to the difficulty and expense of obtaining a proper steam apparatus for hardening the material, Dentists located at a distance from those cities have been deprived of the benefits of the discovery. Now, however, the patentees have invented *portable* heaters, and I have availed myself of the opportunity to introduce this cheap and excellent Material into use here. I have seen it worn elsewhere, and have already used it sufficiently in my practice in this City to satisfy me that it is the *lightest* work yet invented; that it will *fit better* than any other; that it has all the advantages which can be claimed for other work in point of *cleanliness*, that it is *cheap, durable*, and easily repaired; good for both permanent and temporary work.

To those who have Metal Plates which will not fit by atmospheric pressure, this discovery offers a certain relief, for the Rubber Plates *will* fit. For *Clasps* it is the best material yet offered, because it will *not wear* the natural teeth. I am prepared to construct such work for all who wish to use it, and make this fair offer, that if the Rubber fails to do all that can reasonably be asked, when fairly tried, I will replace it with Gold or Silver and charge only the difference in price.
