Now, however, the patentees have invanted portable heaters, and I have availed myself of the opportunity to introduce this cheap and excellent Material into use here. I have seen it worn elsewhere, and have already used it sufficiently in my practice in this City to existing me that it is the lightest work yet invented; that it will be better than any other; that it has all the advantages which can be claimed for other work in point of cleanlines, that it is cheap, durable, and easily repair. cleanlines, that it is cheap, durable, and easily repair to those who have Metal Plates which will not fit by atmospheric pressure, this discovery offers a certain relief, for the Rubber Plates will fit. For Classes it is the less material yet offered, because it will not seer the natural teeth. I am prepared to construct such work for all who wish to use it, and make this fair offer, that if the Rubber fails to do all that can reasonably be asked, when fairly tried, I will replace it with tiold or filiver and charge only the difference in price.
