A Britisher, who lately travelled all over this country, while he stayed in New York, went home and got up a book of travels, which he intends shall be a British history of the United States From one of the proof-sheets we have been kindly permitted by the author to copy one of the chapters It is late news, which very few of our readers have ever read:

SCENERY, -Before I went to America, had heard much of American natural scene-IV I came to see it for myself. I have traversed the country from the colonial dependence of Her Most Gracious Majesty in anada to the Rocky Mountains, and I saw nothing that could be called worthy of the attist's or poet's observation. It is true that Canada has some charming scene as which has been much improved by . Butish taste and art -the natural conse quences of the refinement and cultivation of the inhabitants, but whenever one crosses into the States, the country exhibits either wild torests or naked prairies, both of which are dangerous to travel through, an ansequence of the quantities of voracome animals they contain. A distinguish-. Imember of the United States Parliament intermed me that a railroad train last year was attacked by a drove of raccoons, while crossing a prairie, and every passenger deshoved. These raccoons are the terror of the wild country, and have depopulated thous ands of miles of its surface.
