Montreal."

tied them together, as he was evidently more of a sailor than myself. We got un-der way, and as we pushed off a crow set up a dismal cawing—an insuspicions sign, and ominous of the great trials and suffer-ings in store for us. We poled down the At 0:50 it was dark, and I could take no more memoranda. I put up my note book, pengil and watch, and settled down into he basket, as much at home as though at my post in the Reformer office. From this sound until the next morning I can only stream about ten miles, and came abruptly give my experiences from memory. The upon an immense pine tree which had figures in the preceding narrative were all fallen across the stream, completely block-ing the passage of the raft. No other alhermometer can be depended upon as acternative was left but to untie the pieces

and attempt to push them through under the log. This was at last did ; tied the raft We heard, soon after dark, a locomotive together again, and poled her down the stream. To-day we ate each a raw frog. whisfle, and occasionally could hear wagons rumbling along the ground or over a bridge, while the dogs kept up an almost ceaseless screnade, as if conscious there was someall we could, and began to feel that we were hungry. But there was no complain-ing-our talk was of the hopeful future, thing in the sky monstrous and unusual. and the civilization we hoped yet to reach. We sailed along, contented and chatty, untit about half past 7, when we distinctly saw lights and heard the rowing of a mighty wateriall. We descended into a valley near a very high mountain, but as Down the creek we went into a lake some the place appeared rather forbidding, wa concluded to go up again. Over with 30 low spots, so that our poles could touch the lbs. of ballast, and skyward we sailed. in bottom, until we arrived at the bottom of about 20 minutes we same descended, but the lake, where we found no outlet, and get no response. We kept our poles going, and had gone about half a mile when I turned back the southers bank in quest of the lake we describe the souther and the lake we were over a dense wilderness, and set found that the current of the creek turned thought was a smoke curling up among the led down over a small lake. We had our abruptly to the right, which was the peacor

disturbed and dismul as ours. By this We struck back for the place, and in about time our clothes were nearly torn off. My 20 minutes found her impaled on the top of pantaloons were alit up both legs, and the waist-bands nearly torn off. My boot, both leaked, and our mighty wrestlings in the canon had torn the skin from anbles and hands. Le Mountain's hat was gone of part of her name, and brought it home with me. We reached what is known as woolen drawers and stockings the first day the "New furm" Fjulay night, and there woolen drawers and stockings the first day of our tramping, as they dragged him down by the weight of water they absorbed. We slopt but little. It really seemed as though, during that night, we passed through the horrors of a dozen deaths. At daylight we got up, by degrees-first on one knee and then on the other-so stiff and week that

we could hardly stand. take us out to a settlement, but after traveling up them all until they terminated in Again upon the almost endless lake we the wilderness, we concluded to cross the wont-following round it + shore for an outcreek to the shanty, and stay in it all night. let. About 10 o'clock we found a broad LaMountain got across safely. But my northern stream, which we thought was weight was greater than his, and the raft the outlet we were seeking, and we entered let me into the stream. I sunk in all over, it with great joy, be heving it would take and swam out, though it required all my us to our long sought Ortuwa. Shortly afstrength to do so, and on reaching the to be able to stand. I took off my clothes, found we were again deceived. On our way up Mr. La Mountain sang these pretty lines :

"Cheer up your hearts, my men, Let nothing fright you, Be of a gallant mind -Let that delight you."

The voice was hardly above a whisper, but the song was a source of great comfort to me. His, indeed, was a "gallant mind," which the extraordinary hardships and dangers of our position had not dumited. But when we found that all the weary miles of our morning travel had been in vain, and had to be retraced, my resolution certainly failed me for a moment, and I sat down upon my end of the rift, and felt like shedding a ten of genuine regret. Yet we felt that our duty, as t'hristian men, was to press on as long as we could

stand and leave the issue with God. It had now been four full days since we had ate a meal. All we had ate in the meantime was a frog apiece, four clams and a few wild berries, whose acid qualities and bitter taste had probably done us more harm than good. Our strength was he-ginning to fail very fast, and our -ystems were evidently about to undergo an extraardinary change. I did not permit myself to think of food—the thought of a well covered table would have been too much. I thought over all of poor Strain's sufferings on the Isthmus of Darien, where he, too, was paddling down an unknown stream -but never believed we could stand half the amount of suffering he did. Besides he had means to make a fire-we had none.

He was upon a stream which he knew would lead to the sea and safety-we were upon waters whose flow we knew really nothing of, and we were as much lost as though in the Mountains of the Moon .---But we "could not give it up so," and took fresh courage as troubles appeared to thicken. Well, we turned the raft around, and

poled her back towards the place where we had entered this last lake. We had gone about a mile when we heard the sound of a gun, quickly followed by a second report. No sound was ever so sweet to me as that. We hallooed as loud as we could a good many times, but could thought was a smoke curling up among the trees on the side of a hill. My own eye sight had began to fail me to an extent that I could not depend upon it when a astronomer to judge from the shifting

togwood juice outer him afore y thought, a fitting lullaly to slumbers so our signal by which to find the balloon. yer eyes twice."

Judge .-- Turn him loose, Mr. Bailiff, and accept the thanks of the Court for the prompt discharge of your official duty. Exit Greeny, with eyes as large as raucors .- Independent South.

-A DISCOVERY AS TO BUTTER .--- A New Yorker in the country writes thus to the New York Tribune, of his success in investigating the, to him, mysteries of buttermaking :

It always used to bother us where butter came from. Our idea was that it must have come from a salt mine, mixed up in some inscrutable way with tubs. But it appears that butter is made by "omen .---We happened one day to be out in a place called the "wood-house," where a very sing-ular occurrence took place. A woman who was there put on an spron, and then proceeded towards a singular-looking insti-tution with a stick in it. Taking hold of the stick, she began working it up and down as though her very life depended on the operation. "What in the name of wonder are you doing there 1" said we. "Mak-ing butter, you fool." Being in pursuit of knowledge, we diaregarded the superfluous appellation, and mildly asked her the nationale of the process, when, to our as toni-hment, she wheeled upon us, and dehy ered herself of the following remarkable -tart upon a dog trot as unconcernedly as sentiment "Naow, look a here, Mister. though bearing no builden. Arriving at don't want none of your gas. You'vo been the bottom of the fill, they would to s the a follering me arround and arcound ever canoe into the stream, ery out ". fre tre ta!" [since you've been here, and I won't stand and way we would go again gliding down it no longer. Now go," We went, but we the stream like an arrow. We traveled know one thing-butter is made by women in some way or other. -----

"man "durly, have ye seen the childer with two heads "

"Divil a bit. Is it alive he is, Mr. Mullowny ?" "Troth, no : they kape him in whiskey

Indy." "Faix, it's well it's not the likes o' you, Mr. Mullowny. It's the ruinstion o' me to kape ye in whiskey wid one head, and if ye had heo-och! but ye'd bust up the showman clean, shure!"

"What's that, you fool iv the world ?"

"Troth, I'd let my sins, whether of omis sion, or cor-mission, Mrs. Mullowny. all rest snug enough on one iv my heads, and go to heaven wid the other !"

RING HER.-Somebody in the Atlantic Monthly, in discussing upon the skeleton fashion of the day says :

"A woman in this rig hangs in her skirts like a clapper in a bell, and I never met one without being tempted to take her by the neck and ring her.'

Speaking of the way women display their arms and shoulders, skinny or otherwise. and conceal their feet, ankles, and such. he makes the following unheard-of and

why, if it be the custom, should not one be seen as well as the other ?"

so enraged the landlord, that he commissioned you are utterly unconsious of motion, unless you can see the earth. Nor ean you tell by a compass, in which direction you are his wife to go and dun him, which the debton having heard of, declared publicly that, if sho
