HOSTETTER'S STOMACH BITTERS.

The a fact that, at some period, every memore of the human family is subject to disease or disturbance of the conity functions; but, with the naid of a good bonic and the exercise of pians common ance, they may be able so to regular the system as to scence permitted health.—In order to accomposal this distred object, the true course to pursue is certainly that which will produce a matural state of things at the least hazard of vital strength and life. For this purpose, br. Boatetter has introduced to this country a preparation bearing his mane, which is not a new medicac, that one that has been tried for years, ziving asticiation to aif who have used it. The flitters operate powerfully on the Stomach, Bowels and Liver, retring tuen to a healthy and vigorous action, and thus, by the samp is process of strengthening nature, enable the system to triumph over disease.

For the cure of Dyspepsia, indigestion, Nausea, Flatience, Loss of Appeline, or any Billions Complaints, arrising from a mortid maction of the Stomach or Bowels, producing Gramps, Bysintery or Flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be appedity regulated by a brief new of this preparation. It spepsia, a disease which is proposely more prevaient, in all its varied forms, than any other, and the cause of which may always be attributed to derangements of the digestive organs, can be cared without fall by using HUSTATTEK'S STUMACH BITTEK'S appringments of the system in general; and among them all there is not to be found a more healthy people than the decimans, from whom this preparation emanated, has different the related to prove the value of this great preparation in the scale of unceleal science.

Fixure and a corrections of this great preparation in the scale of unceleal science. INCIDENT AND AGUR.—This trying and provoking disease, which have its releatiess grasp on the body of man, reducing him to a mere shadow in a short time, and rendering him physically and meatally useless, can be driven from the tody by the use of BOSTETTER'S RENOWNED BITTER'S. NUMBER. TERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they neither create nauses

contracted, even in exposed situations, if the Bitters are used as per directions. And as they seither events manage nor oftend the painte, and render unnecessary any change of diet or interruption of ordinary pursuits, but promote so and sleep and healthy digestion, the complaint is removed as speedily as is consistent with the production of a thorough and permanent cure.

For Persons is Advanced Years, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative of strength and vigor. and need only be tried to be appreciated. And to a mother while nursing these Bitters are indispensable, especially where a good tonic, such as Housetter's Bitmonch Bitters, is needed to impart temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if her's acquainted with the virtue of the litters, will recommend their use in all cases of weakness.

CAUTION—We saw then the public against using any of the many implations or counterietts, but ask for lively TETTER CIDENALS in the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph signature is on the label.

The Latest and Best Improvements IN DENTISTRY: Bubber and Gutta Percha instead of Gold and Silver. and Silver.

To those who have Mettle Plates that will not fit by atmospheric pressure, this discovery offers a certain relief, for the kubber Plates will fit. For Chappe it is the best material yet offered, because it will not wear the natural teeth. I am prepared to construct such work for all who wish to use it, and make this fair offer, that if the Rubber fails to do all that can be reasonably asked of it when fairly tried, I will replace it with Gold or Silver and charge only the difference in price.

CONTINUOUS GUM WORK. CONTINUOUS GUM WORK,
Which has established a new era in dentistry—combinlag the new and beautiful, the durable and unsurpassable
in the dental art, to which he calls special attention. It
presents ativantages over all other modes, allowing no
seams or spaces for the accumulation of food, giving the
mouth a perfectly settural expression, to the breath a natnral and pleasant scent, while ministering to the strength
of the voice and general confort of the subject.
