

Another Streak of Good Luck.

Our Republican brethren are most wonderful lucky men in existence—or rather their party is. It has not only successively swallowed up, digested, and absorbed all the talent, wisdom, piety, morality, and honesty (according to its newspapers) which ever belonged to the Democratic party, but it has enrolled in its ranks all of those who ever belonged to any other party who were any way suspected of being tainted in the remotest degree with those qualities. Look for example at Fremont—no one doubts that he came from California a Democrat, and that he remained a Democrat until it became evident that his talents, statesmanship, wisdom and honesty were necessary to the Republican party. There's Cameron; his a diadem of political honesty encircles his head, and what a halo of morality encircles him round about like a garment. And then as for brilliant talents, what man in this or any other age can produce such a bright record. But the last streak of good luck in this line is the enlistment of Col. Forsyth under the banner of this lucky party. In his person all the "talent, wisdom, piety, morality and honesty," which the Democratic party ever possessed were combined (in their opinion)—and he, Mazepa like, has taken them all upon his back and accompanied to the Abolition camp. Can the Democratic party survive such a loss? It survived the loss of Fremont; it managed to "get along after a fashion" when Cameron left; but can it stand up after such a prop as Forsyth has been taken away? Let the future answer!

But the Republican party is not only lucky in the manner and form we have indicated, but it is lucky otherwise. It is lucky in Martyrs. It is now never without one of these convenient articles. The martyr Sumner has been long since "played out." The martyr John Brown, had almost ceased to draw a tear from sympathetic old ladies, and feminine young gentlemen with turn down shirt collars and a superfluity of beard, when the accustomed luck of the party came in again, and a Martyr ready made was furnished in the person of the Hon. JOHN HICKMAN, of this State. How this Martyr was made is related in the Washington States and Times thus:

ONE OF THE "IRREPRESSIBLES."—Messrs. Hickman, Briggs, and Adair have floated before the public eye as notes, illumined by the sunlight. We had supposed that the only occasion in which these political evidences could be of consequence was during the "great day" when they would have subsided amid the dust of departed notoriety. But we deceived ourselves. Hickman will not remain in inglorious obscurity. He has emerged. He is again famous.

We have never seen the Hon. Mr. Hickman. We have only seen his speech. He proclaims that if the Southern States should dare oppose a federal law, some eighteen millions of Northern people would cross the Potomac and reduce them by force to obedience. Therefore we thought that the Hon. Mr. Hickman was a military man of great prowess, who will come at the head of these millions, with his flashing sword, his prancing charger, and his sounding trumpets for all the world like Genghis Khan, Timour the Tartar, or any other conqueror he may choose to adopt for his model.

We had likewise seen where the Hon. Mr. Hickman was reported to have said that "John Brown at the head of fifteen white men and three negroes, terrified the whole State of Virginia." Thereupon we said to ourselves—"this ferocious Hickman is a resolute and stalwart fellow, who fears nothing and will allow no allowance for the timidity of other people. The Hon. Mr. Edmundson, of Virginia, is well known as a most courteous and unexceptionable gentleman. But under a very quiet demeanor he carries a chivalrous estimate of the respect due to his own personal honor and that good name of the State which he represents. So it chanced a few days since, as the Hon. Mr. Hickman was leaving the House of Representatives, he was followed and accosted by Mr. Edmundson, who held him to account for the slanders uttered by him against the State and people of Virginia.

Just as Mr. Hickman said "I did not mean to"—his disclaimer was cut short by a slap in the face from Mr. Edmundson, accompanied with the emphatic assertion that Mr. Hickman was a "d—d scoundrel." At this moment, Messrs. Keist and Edinger, who were leaving the Capitol, at the same time seeing from Mr. Edmundson's manner that he intended to chastise Hickman, and knowing that they would be placarded in the Tribune next day for a conspiracy to beat an unprotected Free Soiler, ran up and seized Mr. Edmundson by the collar, and so violently inflicted further indignities upon the affronted Timour.

According to our information, Hickman had been knocked off, and he had staggered back with an aspect and attitude of the most heroic. Mr. Keist cried out to his voice to Hickman: "Pick up your hat and go away; we can't hold this man all day!" and added to Mr. Breckinridge, who was passing at the moment, "Take him along." The bewildered Hickman collected his hat, and mechanically obeyed the conservative counsel, and soon like one of the discomfited heroes in Homer, "scowled the Black ships, or took refuge in some Republican stronghold. Nor has he been seen heard from, so far as we are advised by cartel, military proclamation, or otherwise.

SENATORIAL CONFERENCE CONVENTION.—In accordance with previous notice given to the Conference appointed by the Democratic Conventions of Kansas and Crawford counties to elect a Senatorial delegate met at Edinboro on Thursday the 23d inst. The conference was organized by calling E. H. TINNEY, Esq., of Crawford to the chair; and appointing B. F. SLOAN, Secretary.

On motion, the Secretary proceeded to call the names of the Conference appointed by the Conventions of the counties composing the District, as follows: Crawford.—E. A. Tinney, David McGill, Arthur McCloskey. Erie.—J. Ross Thompson, Wilson Laird, B. F. Sloan.

Messrs. Tinney, McGill and McCloskey, of Crawford, and Sloan, of Erie, answered for their names. Mr. Sloan stated the objects of the meeting, and the circumstances under which a pretended meeting of the conference had been held on Monday. He said that on Friday he had received by mail from Maj. D. V. DERRICKSON, the proposed Senatorial delegate on the part of Crawford county, a letter proposing Monday, the 20th, for the meeting. That he immediately called upon Mr. THOMPSON, one of the Erie county delegates, stated the fact, and also stated that he was ready to attend at that time; but desiring to be frank with his colleagues, and to save expense, he informed Col. THOMPSON that in the conference he should vote for Maj. Derrickson, giving his reasons for that course to be that he was friendly to the National Administration, and to the Hon. ARNOLD PLEASER for Governor. Col. Thompson replied that if he was determined upon that course, that there was no use of going down to Edinboro. Mr. S. said, "then I will write to Maj. D. that fact, so that he may notify his conference not to be present." Col. T. assented to this proposition.—Mr. S. said he did write to Maj. D.—that Maj. D. had notified his conference not to attend; and that the one in attendance on Monday was there only because he had failed to get that notice in time. That he had refused to go into the conference on Monday until Messrs. Laird and Thompson had assured him that if it should turn out that the other conference were ignorant of the meeting on Monday, another conference should be called on Thursday (to-day) at two o'clock; and that it was in consequence of that agreement they had assembled. Mr. S. said further that he understood that at the meeting on Monday, Capt. D. H. McBride had been substituted in his place—that Capt. McBride was a very worthy gentleman, but had never yet, to his knowledge, acted with the Democratic party, or voted the Democratic ticket—and further, that no person but himself had the right to substitute. In accordance with the agreement between Messrs. Laird, and Thompson, and Mr. Tinney, he had notified the two former in writing of the meeting to-day, and hence it was their own fault that they were not present.

This statement having been assented to by Mr. Tinney, so far as it related to himself and his understanding with Messrs. Laird and Thompson, Mr. Sloan moved that the conference proceed to nominate and elect a Delegate to represent this Senatorial district in the Reading Convention. Messrs. McGill & McCloskey also stated that they had not been notified of the meeting on Monday, when—Mr. McGill of Crawford, nominated Maj. D. V. DERRICKSON. No other nominations having been made, a vote was taken, and the nomination was confirmed unanimously.

On motion, the conference adjourned till to-morrow. E. A. TINNEY, Pres. B. F. SLOAN, Sec.

The Rochester Union contains a curious fact to illustrate a "presentiment in dreams." It is also personally interesting: "A young lady, daughter of Herman Miller, truck master of the Central Railroad, recently told her parents soon after she arose that she had dreamed last night that Mr. Keist, who attends the railroad bridge at Allen's Creek, was killed, and that Mrs. K. came to the house to tell Mr. Miller.—A short time after relating this dream, and while the family were at breakfast, Mrs. Keist came in to tell that her husband was killed by the cars last night at Edinboro. So impressed was she with the force of her dream, that she ran to another room where she saw the woman approaching the door, as she felt sure that she had a tale of sorrow to tell. Mr. Keist was a German, who had worked for a number of years on the railroad, and under the direction of Mr. Miller, and his wife had often called at the house and thus became well acquainted with the family. When she had told her dream, Mr. M. had not heard of the accident; indeed, the Coroner having charge of the body did not know who the unfortunate man was. While there are thousands of dreams that are premonitory, now and then, there is one occurrence of which the dreamer knew nothing."

Frederick Southgate Brown has applied to the Louisiana Legislature to authorize him and his children, Alice, Elizabeth, Harriet, Emma, Octavia and Edward, to drop forever the name of Brown and go through the world as Southgates, for the reason that "the acts of the late John Brown of Abolition notoriety have affixed a stigma upon the name of Brown which is intolerable."

HENRY CLAY, the Statesman and Patriot who had an opportunity for knowing, speaking once on this subject said: "Of all the bitterest enemies of the unfortunate negro, there are none to compare with the Abolitionists, their pretended friends, who like the centaur of old, mount not the back of the horse, but the power of the negro to ride themselves into power."

The Republicans have a good deal to say just now about the "gigantic fraud" by which the democrats carried Pennsylvania in 1860. The fact is, there were probably no frauds at all, but if there were, they were perpetrated by the man whom they have elected Clerk of the House of Representatives.

Some time last winter, a clerk in the Post office at Toledo, by the name of S. H. Brown, was discharged for some cause. Afterwards he was arrested in Texas for passing counterfeit money. There was found on him a large amount of individual and bank drafts, which were drawn by parties west of Toledo and taken by him while in that office. A short time since he made his escape from the Texas jail. This fact was made known to the United States Marshal Johnson a few days ago, and this morning he learned that Brown was probably in Louisville, Ky. He immediately telegraphed the Chief of Police, giving his description, and the name of the hotel he was probably at. In three hours afterwards he received a dispatch saying his arrest had been made, and that he was in jail waiting the Marshal's order.

THE OIL SPRINGS.—A correspondent of the Cleveland Herald writes from Franklin, Venango county, Pa., as follows: Having arrived at this place—which is situated about thirty miles from the mouth of Allegheny river, about seventy miles north of Pittsburgh—I find a great many strangers here on the alert for a "greasy sight." There are quite a number of wells being bored at this place, two of which have already proved successful. One is owned by Mr. Evans, a blacksmith, and a poor man. He procured a quantity of oil, and struck the vein of oil at a depth of seventy feet. The indications are that it will be one of the most successful yet opened. I am informed that he has an offer of \$50,000 for his claim, but which he respectfully declines.

Another well, which is known as the "Company well," has been bored to the depth of 250 feet, and is yielding a fine supply of oil. Between this and the mouth of Oil creek (a distance of eight miles) there are quite a number of wells being bored, and the indications are very favorable.—A place called "The Garden of Paradise," in which is a high calcium stalk, three years old, twelve feet high, and when in full leaf its circumference is equal to that of a fashionable lady in full bloom.

In Augusta, Va. last Saturday, a little boy named Bartlett was standing in the door of a house looking at a fire company which was passing, when a dog ran past him, knocking him under the wheels, and causing his death.

They are experimenting on grapes with great success in Northern Louisiana, by grafting the best varieties from France upon the wild grape vines which grow luxuriantly in that region, and some grapes have been produced that cannot be exported in Europe.

Some years ago Anthony Adams (negro) was decoyed on board a schooner in New York, carried South, and sold as a slave. Senator Seward became informed of the circumstances, took much interest in the kidnapped man, and finally succeeded in procuring his release. This distinguished colored individual was arrested in Newton, N. J., last week charged with robbing a hroost.

The discovery of gold in Southeast Missouri has been further confirmed by recent examination. The gold-bearing rock consists of an immense dyke, which has been traced for some six miles, and appears, at a point several miles distant from a local source, to be as rich in precious metal as any other. It is an inexhaustible in depth, and will improve in richness in going down on it.

The United States Consul at St. Helena has procured a stone from the tomb of Napoleon for the National Washington Monument. It was transferred by the authorities with considerable ceremony, and was put on board the U. S. steamer Mystic, which left St. Helena Jan. 4, for the coast of Africa, and would probably be transferred to the U. S. storeship Relief, bound home. It is enclosed under the seals of the United States, and accompanied by papers of identification. It will require a fitting inscription after its arrival here.

A Mr. Atwood, tall, spiritualist and free lover, living at Barton, Va., recently discovered that there was no spiritual affinity between himself and his wife with whom he had lived for twenty years, and told her so. Last week she eloped with a married woman named "Colliston," for whom he had a true spiritual affinity.

Circulars have been issued by the Department to the United States Marshals relative to the taking of the census. The State is to be divided into districts, so that six weeks' labor in each can accomplish the enumeration. The census-takers are to commence on the 1st of June, and will finish the enumeration by the middle of July.

A person who was recently called into court for the purpose of proving the correctness of a Doctor's bill, was asked by the lawyer whether "the Doctor did not make several visits after the patient was out of danger?" "No," replied the witness, "I considered the patient in danger as long as the Doctor continued his visits."
