DISCOVERY .- BRICK POMBROY, Esq., the witty local editor of the Milwankee News, has discovered the source of the oil deposits of this vicinity BRICK has been "sloshing round" among the oil wells for several weeks, and writes to the News as follows:

last evening. The whole country is so excited that even the oil will not soothe their troubled spirits I have tracked the line of oil springs from the Oberlin College to this city, and after great expense and deep research have decided that the oil comes from the cemetery at Oberlin in which corpulent abolitionists have been from time to time interred! The color and peculiar aroma of the oil, together with the fact that all the veins run toward Harper's Perry, the supply at your end of the line, and I will divide the profits!

Major Worrall informs me that he has analyzed the stuff, and fully concurs in my opinion. Upon comparing two bottles, in one of which the New York Tribune, he finds the smell to be Four men from the neighborhood of the same. It must be very warm where this

Scientifically yours,

A New York letter describes a piece of ewelry which is destined to make a sensation Sunday was the first day of April-a among the 'female persuasion." It is a strap bracelet of fine link chain of a quaint Venetian pattern. The centre, set in a circular head, is a cluster of diamonds, having an outside waving edge of black enamel, divided into twelve compartments, each nestling a dazzling brilliant. Between the edge and the central glory is a vine of gold, in, what sailors term, "round turns," each lurn embracing one of this clus er of diamonds, and from this vine buds of fine diamond burst into light. But in the centre of all are two wheels, set in black enamel ground, each having eight arms, and each arm welve diamonds. These wheels turn on a H Lick, Loq., late proprietor of the e mm on axle, the hub being the largest dismond of all, and by an ingenious piece of machinery which is wound up with a key, these wheels are made to revolve in opposite direcmons for two hours, and at every revolution Hayes & Jordan set forth the reprint | W A GRISWOLD'S CHEAP STORE, STATE ST., , irchases in a very attractive advertisement ERIE, PA Imagine the effect of this pyrotechnic display in a brilliantly lighted saloon, with a fair plump arm beneath it, if you can'-I shows run smooth. H. A.J. are adepts in What admiration it would command from the men, what envyings and heartburnings it would excite in the women!

It was unanimously resolved that it is inexpedient, under existing circumstances, to change the place for holding the Demo-Lace Mr. D. among the savans or fools, which- cratic Convention, from Charleston to any other place.

It would be desirable if some means could be found of doing away with the copper cents which are still in circulation.

They defeat the object of the new currency, and are a source of great trouble rrites to the News as follows:

ERIE, Pa., March 24, 1860.

I have been at Titusville several days, investigating the oil fields, and returned to Eric risk of detection. Intrinsically the copper cent is not worth more than sixty per cent -the price of old copper. Accepted, however, at the full value, as it unfortunately still is, it gives to the counterfeiter a profit of from twenty-four to there were cent expenses. of from twenty-four to thirty per cent, exclusive of the expenses of minting, conveyance, &c. As it would be impossible for the government to withdraw the old coinage from circulation without heavy loss, the remedy must be sought elsewhere. If the public will only combine to reflect veyance, &c. As it would be impossible If the public will only combine to refuse establishes the fact beyond a doubt. Keep up receiving copper cents when tendered in

shillings. A school house in Hickory town ship, Lawrence county, Pa., was attacked was a pint of the oil and in the other a copy of by three virages, with stones and clubs, the other day and the lives of the children seriously imperiled. A second attack was made the next day more violent than before, which led to the arrest of the women and their committal to the New Castle Jail for trial. The affair created the most in tense excitement in the neighborhood, and was followed by another outrage equally as reprehensible as the first. The people turned out in a body when they heard of the conduct of the women, and proceeding to the house occupied by one of them, soon made short work of it. It was razed to the ground in a few minutes, and the material scattered in every direction.

BUPPALO, N Y

DR. T. F. FRANK. OCULIST,

WITH the expenditure of much habor has finally succeeded in bringing that treatment for diseased eyes, so much recommended by writers on tiphthalmic medicina, which consists in the application of chemical fumes and vapors, to a needed bearing in his profession. Oculists have greatly neglected this only rational treatment for want of proper scientific aparatuses, and with the risk of their patients eyes, substituted the vulgar practice of introducing the crude drug directly to the eyes; either in the form of solid caustle, or trittating salves or washes. The consequence is that more eyes are destroyed by the use of medicane than by disease.

Its frank has everoome this obtacte by the invention of his tiphthalmic Volatilaing apparatus, and has for a few years past proved by the great number cured under his care, that his treatment is unparalleled. The patient under it analyst the fail benefit anticipated from the medicine, without being subject to the distress produced by foreign substances used as vehicles for drugs, or the impure ingredient generally combined with them. Pain and inflammation is at once subdued, even in cases of long standing, and not an instance is known where opacity of the pupil was produced by Dr. Frank's treatment of this kind, without the use of Luna Caustle—leaving the eye in a perfectly normal condition, not at all producing that cronic weakness which an irritating treatment is always followed by

Weak eyes of old people receive strength, and cases of confirmed Amouros a are cared by these applications; several cases of that description being under I'r Frank's treatment in ow, are rayidly re-overlar.

In operations for cataract and deformation of the eyes, this treatment promises success, in consequence of preventing undue inflammation

Patients from a distance will find this treatment convenient, they can use the apparatus and mericenes at home, avoiding considerable expense.

Patients from a distance will find this treatment convenient, they can use the apparatus and mericenes at home,
