BEFFAIO, N 1 DR. T. F. FRANK, OCULIST,

WITH the expetiditure of much labor has finally succeeded in bringing that treatment for diseased eyes, so much recommended by writers on Oplithalmic no in im, which consists in the application of chemical fumes and vapors, to a needle bearing in his profession. Occulists have greatly neglected this only rational treatment for want of proper a sentitic aparatimes, and with the risk of their patients eyes, substituted the vulgar pragatice of introducing the crude drug directly to the eyes; either in the form of solid caustic, or irritating salves or washes. The consequence is that more even are destroyed by the use of medicine than he disease.

Dr. Frank has overcome this obstacle by the intention of his Ophthalmic Volatificing apparatus, and has for a few years past proved by the great number curred under his care, that his frestment is unparalleled.

The patient under it enjoys the full benefit anticipated from the medicine, without being sulect to the distress produced by foreign substances used as whetche for drugs, or the impure ingredient generally conduced with them. Pain and inflammation is at once subdued, even in cases of long standing, and not an instance is known where

realises to this kind, without the use of Luna Causticelessing the eye in a perfectly normal condition, not at all producing that croine weakness which an irritating treatment is always followed by.

Weak eyes of old people receive strength, and cause of confirmed Amourous are cured by these applications, several cases of that description beging under Fre Frank's treatment now, are rapidly recovering.

In operations for cataract and deformities of the eyes, this treatment promises success, in consequence of preventing undue inflammation.

Patients from a distance will find this treatment convenient, they can use the apparatus and medicines at home, avoiding considerable expense.

Particular information will be given upon request by letter including two bitter stances, one calling upon fire Frank at his residence, between the hours of 9.4 M., and 3.P. M.
