GREAT CENTRAL FAIR

SANITARY COMMISSION! OFFICE OF THE CONMITTEE ON LABOR, ] Incomes and Revenues, No. 118 South Seventh Street,

Philadelphia, April 4, 1864: The Committee on "Labor, Incomes and Revenues," invite co operation with them in the particular work for which they have been appointed: As no portion of the people are more patriotic than the working women of the country, it is but just and pro-per that they should alike have an oppor-tunity to contribute to the objects of the Fair. The most equable plan for accomplishing this, and, at the same time the easiest one, is to ask for the contribution of a single day's labor from all classes in the community. Many will contribute a day of their labor money. To reach every department of industry and art will be a work of great labor, but, if attained, will be productive of immense re-

The success of the plan will depend upon the co-operation of every element of influence within our limits, and we invite all the guar-Excepting the tongue, our Yachine is made wholly of iron and steel; hence is more durable than those made largely of wood, and therefore or tain to shrink, swell and wear-cut. Third .- To obtain the contribution of one day's income from every retired person, and person of fortune—male, and female—living lawyers, physicians, dentists, editors, authors and professors; all other persons engaged in the learned and other professions.

Much of this work must be performed by the personal influence and efforts of ladies and gentlemen associated, or to be associated with the Committee in carrying out this plan.
The Committee feel the responsibility of the
work they have undertaken, which, to be successful, will require a very perfect ramification of their plan, and they therefore call upon all earnest people, to assemble themselves together in every town, township, and county, and form organizations of ladies and gentlemen to co-operate with them in this great work and labor of love. In the manufacturing counties, the coal and oil regions, and in the agricultural districts, especially, let there be organizations in the large towns, so that the young people may have an opportunity thus to render assistance to their rela-

tives and friends fighting the battles of their country in the army of the ustion The work of this Committee may be prosecuted where no other effort can be made for Fair, as in the mines of A day's earnings of the miners, and a day's product of the mines, can be obtained, where no portable article could be proqued for transportation. Indeed there is no part or section of these States where the day's labor may not be obtained, if organizations can be

formed to reach them.

The Committee cannot close without arging upon all Proprietors of Establishments, the duty of taking prompt and energetic action to secure the benefit or THE DAY OF LABOR from all within their control.
The Committee deem it unnecessary to do

more, than thus to present the subject to the people of the three States named. In the coming campaigns of our armies, the labors of the "Sanitary Commission" will be greatly augmented. By the first of June 700,000 men—one of the largest armies of modern times-will be operating in the field. So large a force, scattered over regions to which the men are unacclimated, must necessarily carry along with it a large amount of sickness, suf fering and death, to say nothing of the

These sufferings, it is our bounden duty, es men and Christians, to relieve. A great and enlightened people, enjoying the blessings of a government of their own making, cannot re fuse assistance to men suffering to maintain its authority, and we will not believe that the Great Central Fair, drawing its products from the three States of Pennsylvania, New Jersey and Delaware, so affluent in all mineral, agracultural, and industrial wealth, shall fall behind any similar effort which has yet been

made for the relief of the Nation's children. As it is desirable not to multiply circulars, no further authority than this circular will be ecomary for any supleying firm or company or any respectable committee of ladies and gentlemen, to proceed at once, in the work of this committee; and it is hoped that under it, organizations will spring up in all the towns

and busy regions of the States of Pennsylvania New Jersey and Delaware.
All subscriptions will be thankfully acknowledged in the newspapers of Philadelphia; and it is very desirable that they communes soon, as each fresh acknowledgement will

stimulate efforts in other localities.

All subscriptions should be addressed to

Where have the senses of Congressmen gine that they don't realize the terrible burdens that rest upon the people, and the fearful dangers that confront the men, and yet play these fantastic tricks? By their default the prices of everything that sustains life are rapidly mounting. The currency is gradually turning into worthless rags. Inch by inch, foot by foot, the Government moves on, straight before the eyes of its guardians, toward the bottomiess pit of bankruptcy-yet distant, but unless they act, inevitable. Not an arm do they yet raise to save it. If they had, but done the duty they were put to do, the credit of the Government would still be resting on its old foundations. It is the wildness of the fireman who stands motioniess while the flames are gathering headway, and falls foul of the man who declares that the fire will not be subdued. It is the inaction of these so called loyal servants of the people that is aiding the rebellion ten thousand times more than the so called disloyal speeches of the malcontents of the House. Not words, but acts are to decide this war. Unfaithfulness in respect to the former shrinks into insignifiance; it is absolutely nothing, when measured against that other unfaithfulness in act, of which this

House is every day making itself guilty. "Not content with the fatal dereliction of neglecting indispensable action, this body must superaid an equally fatal positive act. Unsatisfied with helping on the Southern rebels by depriving our Government of the sound credit which is its life, they must put into the hands of the Northern Copperheads a weapon of more deadly potency than they have ever yet handled or hoped for. There is not an American but must reject and reset the principle and the right." The worst that Mr. Long said falls far short of that. Nothing is gained by saying that the American rebellion was right, and the Southern rebellion wrong-that Chatham's arguments were good and Long's arguments had. To the strong majorities in Parliament bur rebellion was just as hateful, and the nehere even with our own Congressional majorities in respect to our own rebellion. Our Mower is better than any of its competitors reason; in the construction of rival Machines, their proprietors have found it necessary to granthem up to a kigh modion, to prevent "clogging." Hereofore those Machines having the highest motion have been most oppular with farmers, as "clogging" has been one of the worst difficulties to be overcome, and the highest the motion the less "clogging." By an improvement the motion the less "clogging." By an improvement at 9 40 P. M.

The seat is attached by means of long steel springs so that elderly men and partial invalide are enabled to operate it; add its simplicity of gearing makes it more moissions than double-geared machines.

It will be an adjointage to farmers in Erio, Crawford and Ashtabula counties, and in vicinities annityous to our manufactory, to buy machines made near home, so that, if any pair should be accidentally broken, a new piece could be more readily substituted.

To men afresponability, lying where the "Genesee Valley" has not been need, we make this offer. We will let you take one on trial, with the agreement on your part to parchase it, previded it shall roves as good as herein recommended, you being the judge. We believe in the superfority of our Mowers, and shall e three every opportunity to persuade farmers to give them a trial.

Cieyeland, April 20, 1863. These assertions are based upon actual experiments. Over one hundred machines were bought and used by farmers in North-western Pennylvania the past season, to every eases? whom we refer persons desirous of purchasing. One man moved sixteen acres in one day, and another messed as were in firty minutes—both doing their work well.

We publicly challenge all persons interested to the sale of their partial Moving Match, on all sorts of ground, and in all sorts of greats. We elaish to be able to mow rougher mesdows, to mow more acrea in a day, and to mow the same number of acreas with greater ease, than can be done with any other Machine.

Assertions are based upon actual experiments, firms, corporations, companies, railroads and works.
