A heavy fight is expected.

A heavy battle has taken place between Butler and Beauregard. The latter attacked Butler on a foggy morning; and captured part of Gen. Heckman's brigade, including that officer. Butler has fallen back to his entrenchments. Part of his command is said to have destroyed the rebel railroad connections. south of Richmond. In the late battles the rebels are said to have lost most in killed and wounded, while Butler lost the most prison-

Rumors of a general engagement between Lee and Grant are in circulation. On Wednesday quite a heavy fight took place; without any decisive result. A charge was made on the rebel works, and we succeeded in driving others. Some no doubt are in the rear, them from their first line of entrenchments, but found the obstructions too great to proceed further, and fell back, with a loss of ceed further, and fell back, with a loss of is the 10th day of the fighting, and the pros-about 800. The Committee of the City Councils, ap pointed for that purpose, have entered into a contract with the makers of the celebrated Amaskeng steam fire engines, at Philadelphia, as myself—a bullst or piece of shell tore a hole in one of his boots. I was so excited to build one for this city. The cost is to be \$3,500, conditioned that the engine is to be and pleased when I saw we had taken the enemy's works and cannon and had captured every way satisfactory, after full and fair trial has been given it. Genesee Valley Improved Mower. THE SUBSCRIBERS having purchased the exclusive right of the meaning processor the exclusive right of the meaning turn and sale of the above Mewing Machine, have permanently established a manufactory of the same in ERIE CITY, P.a. We claim for our Mower that it is superior to any other how in Market for several reasons,

IT IS LESS COMPLICATED & A SIMPLER MACHINE.

IT IS LESS COMPLICATED & A SIMPLER MACHINE.

It is a well understood principle in Mechanics the the least complication and the least gearing in machinery, becomeny to subserve the purpose for which it is designated, the best r. Ours is the only single geared Mower new in the market, and it will need no argument to convince farmers that becomes of this fact, it will be less liable to get eat of order, and more readily repaired if socidantally brokes.

Our Mewer is better than any of its competitors for another reason: in the construction of rival Machines, their proprietors have found it necessary to gearthem up to a high motion, to prevent "ologing," here colors those Machines having the highest motion have been most popular with farmers, as "elogging," has been one of the worst difficulties to be oversome, and the highest the motion the less "elogging." By an improvement which we have made in our known, we prevent elogging and retain a low motion; our knife makin, less than fourteen revolutions to one of the drive wheel, which is less than two-thirds of the motion in other Machines. Hence they offer less resistance to the herees, and are more durable than those of a higher motion.

Our knife is placed on a line with the axis of the drivewheel, which is found servicable in mowing on a knoll or in a gaily; having a comparatively low motion it less liable to break when "brought up" by a hidden sub or stone; and there, added to the fact that we use a limber cutting-bar, eachle us to mow rougher meadows with greater impusity than can be done with any other Mower.

Excepting the tongue, our Machine is made wholly of

Mower.

Excepting the tongue, our Machine is made wholly of iron and steel: bence is more durable than those made largely of wood, and therefore certain to shrink, swell and wear out. The "GENESEE VALLEE" WEIGHS BUT LITTLE OVER 500 POUNDS, And its lightness the simplicity of its machinery, its series of motion and its freedom from high gearing conspirs to make it the BANIEST DRAWING MOWER USED?

BASINST DRAWING MOWER USED:

The eperator is emalied to throw the shaft attached to the knife out and in gear at pleasure; and having a limber cutting-bar, the knife can be folded up over the Machine, and hence it can be conveniently transported from field to field, and will occupy less storage room when haying is over.

The seat is attached by means of long steel springs so that elderly men and partial invalids are enabled to operate it; and its simplicity of gearing makes it more noiseless than double geared machines.

It will be an advantage to farmers in Erie, Crawford and Ashtabula counties, and in vicinities contiguous to our manufactory, to buy machines made near home, so that, if any part should be accidentally broken, a new piece could be more readily substituted.

To men of responsibility, living where the "Genesee Valley" has not been used, we make this offer. We will let you take one on trial, with the agreement on your part to purchaselt, provided it shall have a good as herein recommended yes being the judge. We believe in the superiority of our Mowers, and shall express every apportunity to persuade farmers to give them a trial.

rial.

These assertions are based upon actual experiments.

Dref one hundred machines were bought and used by
farmers in North-western Henneylvania the past season
to every one of whom we trier persons desirous of pur-

to every one of whom we refer persons desirous of purchasing. One man mowed sixteen acres in one day, and another mowed an acre in forty minutes—both doing their work well.

We publicly challengs all persons interested in the sale of rival mowers, to meet us in a Trial Mowing Match, on all sorts of ground, and in all sorts of gress. We claim to be able to mow rougher meadows, to mow more acres in a day, and to mow the same number of acres with greater ease, than can be done with any other Machine. Machine.

We will sell a well finished mower, including two knives, a set of whipple-trees, &c., for one hundred dollars, at the shop.

Astern manufacturers are charging \$116.

Persons desirous of purchasing machines, or of obtaining agency for the same, will find us at the eid Fagie Foundry, on Federal Hill, or can address us at Erie, Pa Liberal discounts made to agents. Erie, Pa., March, 1864.-3m° J. & E. DENSMORE,
