THE CROPS .- A recent launt into the country has convinced the editor of the Girard Union that the discouraging prospects of the crops have been greatly exaggerated! ... We

have never," he says, "seen finer looking fields of corn at this season of the year, in any locality, than some hereabouts. Those of Messrs. Sayer, Evans, Sampson and many others, are beautiful to behold. Wheat we should say would be an average crop. Oats,

especially those early sown, were badly insopy of that treasonable old sheet, and are Jured by the drouth; but with a reasonable amount of favorable weather, will have a chance to grow considerably, while those later. sown promise a bountiful yield. The hay erop

has suffered more particularly on the clay land back from the lake, but generally speaking, will be an average crop. ... In view of the present high prices of every product, we see no just reason for complaint on the part of the farmers."
