oil, but it has done nobly.
The Sherman well was opened in March,
1862, and flowed twenty-one months. It started off at about 1,100 bbls. per day, but like other large wells ran at a time when oil was so low that its , yield of money was comparatively small. I have seen thousands and thousands of barrels of nice, green oil sold at this well for fifteen cents per barrel, or a little over one fourth of a cent a gallon This well is not flowing ninety barrels a day, as was said to me, on last week, but flows and blows about sixty barrels in twenty-four and has been yielding from thirty to sixty barrels since last January It is said to be on the increase, yielding double the amount

produced at the beginning of the year.
The "Noble well" is defunct; the "Sherman" is superannuated; the "Empire" is dying out, and all the other large wells are greatly reduced or "done gone for," so that out a small amount of oil is being produced. It will be seen that this production is much less than the demand, and unless some good 'strikes" are made before fall and winter trade is over, oil will command a high price.

lat. Lightness and durability: being made of the best quality of steel, highly o lished, and the whole implement weighing from fifty to sixty pounds.

2d. Adaptation to more kinds of work than any other. Catitizator known; being a perfect and thorough Catitizator known; being a perfect and thorough Catitizator when used with 11 the teeth on, leaving the ground even and level, and working searer the rows than any other Catitizator.

3d. By removing the small teeth, and attacking the wings to the shovel, it is the most perfect implement for hilling that can be found.

4th. It is the best implement for cavering and digging potatoes ever invented. A man and horse can cover potatoes as fast as a horse can walk, and a man and team can dig from three hundred to five hundred bushels of potatoes in a day, when the crop is a fair one. can dig from three nances to dve sundred seasons of potatoes in a day, when the crop is a fair one.

5th It works equally well in orce, or any kind of crop-requiring cultivating, and is most cases hand horing can be dispensed with.

6th. Its cheapness, considering the many kinds of work to which it can be applied; the farmer having is our implement all that is uncessary for cultivating and hilling any kind of crop, or covering and digging pota-tors.

·s Numberless certificates from the most influential farmers in the United States might be given of the superiori-ty of the above implement over all others designed for

ke purposes.

We shall be pleased to receive a call from any one who meeds a Callivator or Shovel Plow and explain to them the ments of the above Herse Hoe ever all other imple-ments of the kind. We warrant this Horse Hee to work

ment of the kind. We warrant this Horse Hee to work as a Cattivator as well as any Cultivator made—as a Shovel Plow as well as any Shovel Plow—and as a Hory Hoe a complete success, or refund the money if it does meet this warrantee.

He also keep so hand in connection with our Harnwise, Stoves, Thuvare and Hague Parantalang Gooda, sometics assortment of Horse Rakes, Hand Rakes, Scythes, Smathes, Grain Cradies, Forks, Hees, Shevels, Spades, &c. Don't fail to give us a call.
