BRIE COUNTY AS & GRAPE GROWING BEGION. -It is well known to many of our readers that for a number of years much attention has been paid to the cultivation of the grape in the neighborhood of North Bast. The pickeis of grape culture in this sounty, Me. Way, Geingla, of that place, had his metion called to the value of the sell and climate of of goods is one of the largest in the the Lake shore, for this purpose, some twenat he is determined to sell as low as the ty-five years age, by the thrift of a single vine growing upon the Judd Farm. Commonsing experiments on the subject, he was for a long

time laughed at, but has lived to find his la bors rewarded by the most gratifying success. The culture of the grape has now come to be one of the largest and most profitable interests in the vicinity of the town where he resides. A company, with a capital of one hundred thousand dollars, has been astablished to carf

ry it on upon an extensive scale. Many thousand pounds of the fruit are annually sent to the city markets, and the North East grape is obtaining a reputation surpassed by none produced in the country. At a recent exhibition in that town, samples of grapes were presented, which are stated to have been the finest, for the quantity exhibited, ever

shown in the Union. A meeting of grape growers from a sumber of States, was held at North East, on the 10th inst. at which some facts of importance were elicited. Dr. Grast, of Iowa, N. Y., the great grape culturist, " expressed his surprise at the astonishing yield of the grape here and the trifling cost of its production. The vine seems to grow here almost without cultivation. He was surprised at the results. The soil here seemed to be inexhaustible-from one to ten feet in depth. It was a natural soil for the vine. Everybody should plant, for no such

immediate result followed the cultivation of any other crop. Of the planting of this great district there was no prevention. Plant sure. plant well, and the greatest success cannot fail to srown the effort." Mr. Griffeth stated that he desired to show what "could be done at North Bast. His friend Spencer here had a little vineyard of just 140 square rods, or seven eighths of an acre, now five years old from the cuttings, which had yielded him last year \$300. This year he had sold from it \$600 worth of grapes, and he and his friends estimated that there were from \$500 to \$600 worth still left hanging on the vines. He knew. of no other crop which would produce

such profits." He referred to the company, above alluded to, which, he said, "was formed one year ago, with a capital of \$100,000. all paid in and invested in lands, vines and buildings. John E. Mottier, before mentioned, is largely interested in ehe company, and in tends residing here, being ubder engagement to give his personal attention to the vineyard for the next five years. The company have 78 sores already planted, chiefly with Catawbas, Isabellas, Dianas, Concords, Israellas and lonas." In regard to his own experiments, he said, "that one and a half acres gave \$1.200

worth per year, for twelve years in succession save one year, when the vines were injured by frost. All this without stimulant of any. kind, and thinks it will continue a hundred years in the same way, and instanced the vine yard planted by Elder La Hatt, in Portland, forty-two years ago, which produced a large crop the present year. He regarded the

South shore of Lake Eric as the best in the country for grapes ; its loose, porous sell inviting moisture up and roots down, he having found the roots twelve feet below the surface: soil.' Mr. G. spoke in favor of the loan said, and predicting that the Lake Shorwine yielding part of the Union. These statements will be read with interest by our agricultural subscribers. especially those who reside along the Lake Shore. The facts stated are worthy the attentive consid eration of all. R., Oct. 54, 1865. And wa Sad shat Wm. A. Baldwin, the Superintendent of the West ern Division of the P. & E. Read, is directly responsible for the accident, he having ordered the Mail, train from Warron to Ir-vine, without making proper provision for the trains passing each other at that point ; and that P. Pinley, the engineer, is red point ble in lesser degree, having wielated the rule of the company, by approaching a station, round a dangerous curve, "without having his en-gise under perfect entrol, as if expecting danger;" and we do find the President and Directors of the Panuylvanis E. E. Ou, Lesses of the Phila & Erle, also responsible, in view of their general bad management of the road; in retaining incompetent officials and we request that proper measures be taken to hold these parties griminally responsible for the death of the deceased. The same verdict was rendered in the case

of Mr. Young, who died subsequently, from niurior reasized in the same appilent.

TIDIOUTE OIL BRGION .- Four and a half years ago Tidioute was the oratre of attraction for oil speculators. People talked of it much as they do of Pithele now. But the oil production seen gave out, (with the exception of the Boonemite well, which has nover espeed to yield from the first day it was strack )) more prefitable indications were dissevered in other localities, the fortune seekers came to the conclusion that the Oil Dorade of their expectations lay in another direction, and Tidiouis was left almost deserted, with a forest of idle derricks standing as monuments to man's fickieness; industry and greed for gain. The star of Tidioute is once more, however, in the accendant. A flowing well has recently been struck near there. which is said to be producing 800 barrels daily. Smaller ones have also been obtained, some of which flow and some require pumping, and the abandened Tidioute region is again being looked upen with interest. The tide of speculation is setting that way rapidly, and Tidicute is likely seen to resume her eld-time importance. Verily, this is a world of ups and downs, and Tidioute has had its share of them.

A Sournaar' Parss .-- We are indebted to Mr. D. M. Chapman, Jr., for a copy of the Mamphis Daily Bulletin, for which he will please accept our thanks. That perties of our citizens who have been induced by Republican electioneering clap-trap to believe the Southern people a set of half barbarians, would be much surprised at the appearance of the Bulletin. It is an unusually large paper, containing ten columns on each page, or forty is all, and bears an appearance of prosperity of congratulation to Democrats through | On the 'best variety of grape to be grown in such as we seldem see. The Bulletin contains twanty-eight columns of adverti and Israells." A number of other gentlemen | in very fine type-an amount of patronage in spoke, all concurring in what Mr. Griffeth that line which, we venture the essertion, no paper of any party published in a city of the country would yet become the great grape and same size in the North ever atthible. We think it worth while to mention facts like these, if for no other purpose than to correct the erroneeus impressions' that have been made on the minds of many of our citizens relative to the to the enterprise and intelligence of the Southern portion of our common pout-Bolteng Mill .-- We are gratified to lears that another rolling mill enterprise has been projected, which promises to be successful. A considerable portion of the stock has been taken, and there will be no difficulty in getting the balance. Wm. S. Brown, Esq., is the leading man in the movement, and his business talent and enterprise is sufficient guarantee that the measure will not be permitted to fail.
