Ladies, take Particular Notice THE REAL VELPAU FEMALE PILL.

[WARRANTED FRENCH.] WARRAFTED FREED.] THESE PILLS, so colebrated many years ago in Paris for the relief of female irregularities, and afterward so notorious for their criminal employment in the practice of abortion, are now offered for sale for the first time in America. They have been kept in comparative obscurity from the fact that the eriginator, Dr. Velpau, is a physician in Paris of great wealth and strict conscientious prin-ciples, and has withheld them from general les, and has withheld them from general replay, and his within the trong for unlawful purposes. In overcoming Female Obstructions, Falling of the Womb, Whites, Green Sick-ness, Suppression, Retention, or Immoderate Flow of the Monthly Discharges, they seem to be truly omnipotent, bursting open the flood-gates from whatever cause may have stopped them ; but they are offered to the lic only for legitimate uses, and all agents are forbidden to sell them when it is understood that the object is unlawful. Married ladies should never take them when there is any reason to believe themselves pregnant, for they will be sure to produce a miscarriage.

These pills are entirely safe under all cir-rumstances, being composed entirely of sub stances from the vegetable kingdom. Each box has the coat of arms for the City

of Paris stamped on the box, with the words "Trade Mark" in French, to counterfeit which is a misdemeanor, and all persons will be dealt with according to law.

Full directions accompany every box. Indies can obtain a box sealed from the eyes of the curious, by inclosing One Dollar and six post-office stamps to any respectable drug-gists, or to O. G. STAPLES, General Agent for the United States, Watertevn, N. Y. Agents,

HELMBOLD'S EXTRACT OF BUCHU.

Hundreds suffer on in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do injustice to the afflicted, but I am obliged to say that although it may be produced from excessive exhaustion of the powers of life, by laborious employment, unwhole powers or file, by incorrous emphysical, divades some air and food, profuse meastruation, the use of tea and coffee, and frequent childbirth, it is far of-tener caused by direct irritation, applied to the mu-

cous membrane of the vagina itself. When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but sim-ple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health, and happinces of woman in all classes of society, and which, consequently, affect, more or less directly, the welfare of the entire human fam-ily. The mania that exists for precoclous education and marriage, causes the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of school, and especially in the unhealthy excite-ment of the ball-room. Thus, with the body half clothed, and the mind unduly excited by pleasure, perverting in midnight revel the hours designed by nature for sleep and rest, the work of destruction is

half accomplished." In consequence of this early strain upon her system, unnecessary effort is required by the delivotary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the now con-stant restraint of fashionable dress, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength ; the exposure to night air ; the sudden change of temperature ; the complete prostration produc ed by excessive dancing must, of necessity, produce their legitimate effect. At last, an early marriage caps the climax of misery; and the unfortunate one, hitherto so utterly regardless of the plain dictates and remonstrances of her delicate nature, becomes an un-willing subject of medical treatment. This is but a

our young women. Long before the ability to exercise the functions of the generative organs, they require an education of their peculiar nervous system ; composed of what is called the tissue, which is, in common with the female breasts and lips, evidently under the control of mental emotions and associations at an early period of life ; and, as we shall subsequently see, facse emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims ere nature has self-completed their development. For Female Weakness and Debility, Whites or
