Ode for Our Country. JANUARY 1, 1866.

28, Erie, Mrs Martha Dunn.

God's blessing be upon Our own, our native land! The land our fathers won

By the strong heart and hand, The keen axe and the brand, When they felled the forest's pride, And the tyrant foe defied. The free, the rich, the wide : God for our native land!

Up with the starry sign,

The red stripes and the white! Where'er its glories shine, In peace, or in the fight. We own its high command; For the Flag our fathers gave, O'er our children's heads shall wave, And their children's children's grave! God for our native land!

Our native land! to thee, In one united vow, To keep thee strong and free, And glorious as now-We pledge each heart and hand; By the blood our fathers shed, By the ashes of our dead. By the sacred soil we tread, God for our native land!

Ladies, take Particular Notice THE REAL VELPAU FEMALE PILL [WARRAFTED FRENCH.]

THESE PILLS, so celebrated many years ago in Paris for the relief of femulo irregularities, and afterward so notorious for their criminal employment in the practice of abortion, are now offered for sale for the first time in America. They have been kept in comparative obscurity from the fact that the originator, Dr. Velpau, is a physician in Paris of great wealth and strict conscientious prin-ciples, and has withheld them from general use, lest they should be employed for unlawful purposes. In overcoming Female Obstructions Falling of the Womb, Whites, Green Sick ness, Suppression, Retention, or Immoderate Flow of the Monthly Discharges, they seem to be truly omnipotent, bursting open the flood-gates from whatever cause may have stopped them; but they are offered to the public only for legitimate uses, and all agents are forbidden to sell them when it is understood that the object is unlawful. Married ladies should never take them when there is any reason to believe themselves pregnant, for they will be sure to produce a miscarriage. These pills are entirely safe under all circumstances, being composed entirely of substances from the vegetable kingdom.

Each box has the coat of arms for the City

of Paris stamped on the box, with the words "Trade Mark" in French, to counterfeit which is a miedemeanor, and all persons will be dealt with according to law.

Full directions accompany every box.

Ladies can obtain a box scaled from the eyes of the curious, by inclosing One Dollar and six post-office stamps to any respectable drug-gists, or to O. G. STAPLES, General Agent for the United States, Watertevn, N. Y.

From Harvey Sickier, Esq., the able editor of the Tunkhannock Democrat, Pennsylvania.

"Our only child, about three years of age, was ittacked by pimples on his forchead. They rapid spread until they formed a loathsome and virulent sore, which covered his face, and actually blinded his eyes for some days. A skifful physician applied altrate of silver and other remedies, without any apparent effect. For fifteen days we guarded his rands, lest with them he should tear open the festering and corrupt wound which covered his whole face. Having tried every thing elso we had any tope from, we began giving your SARSAPARILIA, and applying the ioditic of potash lotion, as you direct. The sore began to heat when we had given the first bottle, and was well when we had finished the second. HELMBOLD'S EXTRACT OF BUCHU. Hundreds suffer on in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to severt anything that would do injustice to the afflicted, but I am obliged to say that although it may be produced from excessive exhaustion of the powers of life, by laborious employment, unwhole-some are and food, profuse measurantion, the use of ten and coffee, and frequent childbirth, it is far oftener caused by direct irritation, applied to the mucous membrane of the vagina itself.

When reviewing the causes of these distressing complaints, it is most painful to contemplate the st-tendant evils consequent upon them. It is but simple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health, and happiness of woman in all classes of society, and which, consequently, affect, more or less directly, the welfare of the entire human fam ity. The mania that exists for precocious education and marriage, causes the years that nature designed for corporeal development to be wasted and pervert ed in the restraints of dress, the early confinement of school, and especially in the unhealthy excitement of the ball-room; Thus, with the body half clothed, and the mind unduly excited by pleasure. perverting in midnight revel the hours designed by nature for sleep and rest, the work of destruction is

half accomplished. In consequence of this early strain upon her system, unnecessary effort is required by the delicate votary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the now constant restraint of fashionable dress, absolutely for bidding the exercise indispensable to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the complete prostration produced by excessive dancing must, of necessity, produce their legitimate effect. At last, an early marriage caps the climax of misery, and the unfortunate one, hitherto so utterly regardless of the plain dictates and re-monstrances of her delicate nature, becomes an un-

willing subject of medical treatment. This is but a fruitife picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs, they require an education of their péculiar nervous system; composed of what is called the tissue, which is, in common with the female breasts and lips, evidently under the control of mental smotions and associations at an early period of life; and, as we shall subsequently see, these emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims ere nature has self-completed their development.
