MISS DICKINSON ON MATRIMONY.

The lecture of Miss Anna E. Dickinson in Farrar Hall, on Monday evening, was well attended, many persons being present from the neighboring towns, and even from other counties. Her subject, "Home Thrusts; or Marrying and Giving in Marriage," was one that afforded ample scope for her qualities as a lecturer, and was treated in a very interesting manner. She did not spare the errors and follies of her own sex, any less than those of the men, but let loose her sarcasm at random, without seeming to care where it hit. We must do Miss Dickinson the justice to say that she spoke more sober, common sense on this occasion than we have heard upon our lecture board for a number of years, If she were to discard the snappish little expressions with which she so freely intersperses her discourses, and confine herself to the legitimate treatment of her subject, she would receive less applause, probably, but be more widely respected and exert a better influence.

The secret of Miss D.'s popularity as an orator, we think, lies more in the peculisrity with which she treats her subjects. and the novelty arising from her sex, than from any particular merit as a speaker. It is true that her voice, from its coarseness, is better adapted to public speaking than most females, but there is a sonorousness in it, and a lack of graceful manner, that render her anything but a model orator. She seems, too, to talk at random, without arrangement of her ideas, and her arguments have an incompleteness that in a man would be called weakness. She, however, possesses undoubted courage and independence, is well acquainted with the springs of human passion, is honest in what she expresses, and believes herself to be an instrument of reform; and these qualities, shrewdly made use of, never fail to obtain notoriety of one sort or another. At any period previous to the year 1861, she would have been scouted at and spurned by nine-tenths of those who now worship her; with the sentiments that have gained away since then, and the present constitution of "society," she may retain her popularity for years. The following abstract of her lecture, though necessarily incomplete, will give our readers a fair idea of her views upon the subject of matrimony:

M ever a meed of re in regard to the matter of the training and the education of young girls, looking forward to what is popularly denominated a settlement in life. This expression has seen so universally used that it has now become a by-word, and the people use it without seeing that it is an insult and outrage to women everywhere. Woman cannot be settled, fixed and established until she can tie fast and anchor. From the earliest time upward, the woman of the present day is taught that the one end of her life is marriage—the one happiness and ambition of her life marriage the only opportunity to be or to do anything, marriage; the only sphere in which she can develop her powers or be of service to herself or others, marriage; everywhere and by everybody she is advised to get a husband. The boy on the other hand is educated for manhood; he is to go to through his school life and college; he is to choose his trade, business, profession or calling; he is to earn money and make for himself a home. And then, having educated himself, and having got a home, seciety says to him: "Take a wife," to help spend the money, and to be a useful and ornamental appendage of that home. The man is educated, not for husbandhood, but for manhood; and why is the woman not educated for womanhood? There are many evils that arise to both sexes from this difference in their education. It, in the first place, makes the girl deceitful. Perhaps they are not themselves conscious of it, but a woman cannot new be simple and unaffected with an unmarried man about her. This breaks up the right and rational intercourse of the young men and women. There are many cases in which good might ensue to both sexes by simple friendship without love; but as things now stand, simple friendship between them is impossible! The women, therefore, become indifferent to books, to mental culture, to the cultivation of their own nobler aspirations, to everything but marriage. But some will may, there is no necessity to become learned and philosophers; let them wash and scrub, and bake and iron. These are very good things, and she was only sorry that they are not more thought of; but they could be done as well, and better, if the girls possessed a thorough and liberal edu-

As to the accomplishments which were now taught females, they were not education—they were only bestowed to enhance her price in the market, and were not intended to be of any great value after the bargain had been concluded. But some will say that woman has been made by the Great Artificer, smaller and weaker, shallower in brain, and mind, and intellect than man, and that it would be absurd to attempt to teach her in two or three years what men only imperfectly learn in ten. Well, if society, if the world, were only pleased with the result of the work of its two hands; if it liked and complimented the same women as it makes them, she, as a woman, might put her finger on her lipe and keep silence. But it is not so, So ciety sneers, and taunts, and insults the woman to whom it has refused the means of improvement. "Every day," she said. I shrink, shudder and cower at the in sults heaped upon my sex- first, in what society makes them; and secondly, in the taunts and insults thrown upon them. It may be that God Almighty made women week and shallow, and frivolous and vain but, if so, it was only to match the men. If, indeed, women are inferior to men, still, she asked, that a chance be given them to decide the point. Women have never yet been permitted to have the same opportunities as their brothers,

Miss Dickinson then proceeded to review the various other pleas advanced women should be able to stand side by side with men in any avenue of life, but it was necessary for the interest and well-being of both that she might be able to sympathise with the labor and, work of the man. At present they took the soule and man. At present they took-the souls and intellect, and inspiration of woman, and

its growth by every possible contrivance est it should break the flower pot .--Women were constantly driven to sin by heir thus being unfitted for the higher spheres of being. Probably the chief eason of the hardness, and injustice and cruelty of women, the one to the other, might be found in the fact that they are taught to regard marriage as the great aim of their life. They are brought to an overcrowded market, and were forced to sell their own wares by undervaluing their

neighbors.

Miss Dickinson then adverted a some length to the proposed immigration of seven hundred Massachusetts women to Washington Territory, to ob tain husbands, and stated that she seri onsly apprehended that evil only would ensue from the expedition. On the West ern coast there were no mills or cities, or any other sphere of employment for women, and the only chance, she feared on reaching their destination, would be to get married within forty-eight hours after their arrival to any brute of a man that would offer himself. Some of her remarks on this point were quite as much lacking in dignity as delicacy. She concluded her lecture by an appeal to society to all men and women of influence and power, to unite in extending an equal punishment in respect to the "social evil to both men and women. As things stood by one offense the woman removed herself from all hope of again treading in the paths of purity and happiness. She was an outcast and abandoned, and no repent ance could atone for her fault. The man was, however, in no way prejudiced by having committed a few indiscretions -Indeed, by some, even by some women he was thought all the more eligible and desirable as a husband, on that very account. She called upon all the just and righteous to change this cruel and wicked

difference in judgment. Miss Dickinson's unceasing labors in the lecture field are wearing upon her rapidly. Her form is becoming bowed down as if with the weight of a heavy burden, and she no longer wears the freshness upon her countenance that she did on her first appearance in public. In short, she is becoming horribly homely, and we greatly fear that unless she " gets a man" soon, it will be her fate to do without one altogether, unless she should conclude to accept the offer of the sentimental young chap whose letter she some. what indelicately and sarcastically described.

THE REPRESENTATIVE MEN. The Albany Journal speaks very disre. spectfully of Senator Sumner, as it has frequently done of Thad. Stevens. It denies with great earnestness that these men are representatives of what it is pleased to style the "Union" party-meaning the organization that elected Lincoln and Johnson. On the contrary, it denounces them as "destructivists," and says:

"The great heart of the people is yearning for established union and fraternity. And as it becomes manifest that the design of these extreme leaders is not to strengthen the Government by legitimate measures, but to gratify a vengeful and malignant passion which looks to the absolute ruin of hundreds of thousands of who followed him in occupancy. our fellow citizens, they and their dogmas will be repudiated with a decision worthy of a generous nation."

Will the Journal have the kindness inform us who are the representatives of the "Union" party in Congress and out of it? If Stevens, who commands one hundis entitled to that distinction? Is the man lienry J. Raymond, who was able, after an eloquent speech in support of the President's policy of restoration, to detach manner return, to make their wedded life unonly three votes from the "destructive happy, it would be the height of her gratifiists?" It follows logically, as well as in fact, that the "destructivists" or disunionists are the political enemies. not only of the President, but of the masses of the people whose hearts are "yearning for established union and fraternity."—Buffalo Courier.

STEVENS ON THE RAMPAGE. The speech of Thad. Stevens, of Pennsylvania, who closed the debate on the new constitutional amendment, on Wedneeday of last week, was entirely charac olution which Stevens had offered; but, with the impudence peculiar to his nature, he immediately reported the same resolufect the suffrage issue, and thereupon demanded the previous question. The Republican members, quaking in their shoes at the ire of the Pennsylvania Mephistopheles, did not dare to object to allow him to report, and his imperious demand for the previous question was seconded by a vote of seventy-three to forty-nine. This gave Stevens the opportunity to make a speech to which nobody had the right to reply, and be instantly availed himself of commenced a long rigmarole of abuse of President Johnson, denunciation of the Southern citizens of the United States. and speers and gibes at such conservative chagrin by silly laughter at this insolence, impoliteness and brutality. Forgetting that, under a British king, a few years ago, he would have been hung as a traitor, he threatened the President with assassination for having expressed an opinion upon the expediency of constitutional amendments, declaring that "such conduct on the part of a British king, a few years ago, would have cost that king his against the equal education of the head." deus Stevens upon President Johnson is neither more nor less than a declaration of hostility on the part of the ultraists of both Houses of Congress against the policy and person of the President. This being the obvious fact, the people will find it necessary to take sides in the controversy thus rendered inevitable by the unreasonable and unrestrained malignity of the radicals. That Mr. Johnson will be sustained in all judicious measures for the pacification of the country by an overwhelming public sentiment is beyond all question. And if his firmness shall be dust. It will soon be known who, are in favor of the Union and the blessings of Peace, and who are against Constitutional Liberty and the rights of the People and of the States. If the President is in earnest, as we believe he is, he will no longer tolerate, either in his Cabinet or in any other important official position, those who affiliate with such as threaten his impeachment and labor for his overthrow,-The issue being made, let the contest begin.-Cieveland Plain Dealer.

HALL'S Couge REMEDY .- The public attention is again called to the merits of this old and popular medicine WAICH AFTER THE MOST THOROTOR TRIAL DURING A PR-RIOD OF TWESTY-ONE YEARS IS ADMITTED THE MOST SPEE DY AND CARTAIN CO. B RHOWS FOR THEOAT AND LUSG CONFLAINTS.

Every considerate verson knows the importance of emoving lung affections in their early stages and many from sad experience have learned the danger of delay. Hall's Cough Remedy 18 NOT recommended as a GREE BAL PANACRA FOR ALL HUMAN ILLS, but only for a specific class of DISEASES located in the same structure, incl ted by the same causes and requiring much the same treatment, varying only with degrees of violence. It is pleasant to the tarte, safe in its o, cration, thorough and speedy in its action. Long experience proves it has no superion or no 7AL in merit or efficiency for curing cough, ECARSENESS, BRONCEITIS. CROUP,

It removes irritation, causes free and easy expectors tion, loosens the tight and full sensation in the lungs, restores the respiration to its easy, natural condition, imparts health and vigor to the lungs and also clearness and strength to the voice. One bottle is generally sufficient to cure an ordinary
