Dr Dodge's practice is mostly diseases of chronic usture, and cases given up as in curable. His treatment is peculiar to himself. although there have been men in all ages who have had the same magnetic power over the diseases of the body and mind, (some call it the "Gift of Healing,") yet few have possessed it to such an extent over nearly all diseases that restores the lost or unequal oirculation of the vital or nervous fluid. So powerful is this influence that persons who have for many years suffered from, discases which have been pronounced incurable, and to whom medicing have been restored to health in an incredibly short space of time. It will not restore a lost member of the body or perform other impossibilities, but it will always relieve pain, from whatever cause The practice is based upon the most strict principles of science; there is nothing miraculous or superactural about it. In fact I had no use of and had not the least feeling in it from the end of my finger to my shoulder, and could have it pierced with a pin or pinched without feeling it in the least. But as fortune would have it, I went to Brant's Hall and has operated on by Dr. Dodge, and after one operated tion my arm was restored to its natural feel ing, and now I can use it as well as ever.
