

DODGE'S PATENT

REAPER AND MOWER.

AND

SELF - RAKING HARVESTER.

OHIO AND BUCKEYE COMBINED.

WITH DOUBLE DRIVING WHFELS, FLEXIBLE FINGER BAR, AND FOLDING CUTTING APPARATUS.

This machine has met with the most complete success. In every section where it has been introduced, it has been introduced, it has been introduced, it has been precedence over those machines which have berefolore ranked as first class. We have endeavoured to two BEST REAPER AND MOWER IN THE MARKET.

With this end in view we have accured, by leave and purchase, the control of all the desirable and standard natents now in use, among which we call attention to the Ohio and Buckeye Patents as combined in this machine. This machine embraces all those valuable features which have contributed to the great ancess of the Ohio and Buckeye Mackines, together with a number of estifely new, novel and valuable improvements. In compactness, lightness of draft exceller cound elegance of workmanning and finish, combined with great strength and adaptation to all kinds of work, it will surpass any machine heretofers offered to the farmer. The following points of excellence show the advantages of Podge's Reaper and Mower over all others: TWO DRIVING WHEELS.

This Machine has two driving wheels, which support the whole weight of the Frame, Gaaring and Driver, giving it great power and facility of operation.

DOUBLE-HEADED FINGER-BAX.

The finger-rar of Dodge's Machine is attached to the frame by a double hings joint, which allows it to follow the author of the ground, without being refected by the working of the frame. Over ridges and through bollows, the independent action of the Cutter is perfect, enabling either end to rise or fall without affecting the other. . CUTTING APPARATUS.

The most important part of a Mowing Machine is its cutting apparatus. Of all the numerons experiments and inventions, the Open, who came Inon Grand, faced with Case Struct, as used in this Machine, is the only guard that has proved successful in all places. The advantages claimed for the guards are: They do not bend or break. They are all precisely alike. They do not clog.

DRAFT.

The draft of this Machine, in heavy grass or grain, is much lighter than ordinary plowing and does not exceed an average of 100 yourds direct draft. A light pair of horses can work the machine easily all day, in any kind of grass or grain, when the machine is properly adjusted and operated.

AS A SELF-RAKER.

AS A SELF-RAKER.

The Self-Rake applied to this machine has proved a perfect success. It is a Sevolving Rake, and does its or realing, rawing the expense and trouble of a veci, and jet performing better in all kinds of grain than a Rest a Sand Bake can. It makes a perfect separation with the rake head, in all kinds of grain, whether tangled lodged lang or short, he reason of the rake revolving over forward, and striking into the unent grain, or bed the sickle, carrying it along and over the platform, and delivering it in compact buildes, at the rear of the medical, entirely out of the way of the team and machine on its next round, and without any littlesing whatever

chine, entirely out of the way of the team and machine on its peat round, and without any littleting whatever.

AS A REAPER.

The double birge joint and two drivings wheels make it the ONLY BEAPER PERFECTLY ADAPTED TO UNEVEN GROUND. The over banging Reel is supported upon a reel peat, fixed drimly in the drag-bar socket, and can be readily adjunted, upor down, or backwaid or forward and all times follows the moreoments of the plation. The grain is easily delivered at the rear of the machine, entirely out of the way of the team on the sixet round, in good shaped burdes for binding. The FILATPORE is readily adjunted to any required height.

REPARATOR CAPILLI.

For restoring hair upon bald heads (from whatever cause it may have fallen out) and foreing a growth of hair upon the hea, it has no equal. It will force the beard to grow upon the smoothest face in from five to eight week, or hair upon bald heads in from two to three must he. A few ignorant practitioners have asserted that there is nothing that will force or hasten the growth of the balt or beard. Their assertions are laise, as thousands of living witnesses, from their own experience, can bear witness. But many will say, how any we to distinguish the grounds from the spurious it sertainly is difficult, as nine-tenths of the different preparations advertised for the shar and beard are en tirely worthless, and you may have already thrown away larg amounts in their purchase. To such we would say, try the Reparator Capilli; is will cart you so thing unless it fully comes up to our representations. If our druggist does not keep it, send as one doular and we will forward 't, post-paid, together with a receipt for the money, which will be returned you on application, providing entire antischetion is set given. During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarssparills for one dollar. Most of these have been frauda upon the sick, for they not only contain little, if any, Sarssparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarssparilla which flood the market, until the name itself is justly despised, and has become synonynous with imposition and cheat. Still we call this compound Sarssparilla, and intend to supply such a remedy as shall rescue to name from the load of obloquy which rests upon it. And we think we have ground for 1.000 BUSHELS CHOICE POT ATOES. Just received. All of the above goods we will sell cheaper than the cheapest.

Ayer's Sarsaparilla

A compound remedy, designed to be the most effectual Alterative that can be made. It is a concentrated extract of Para Barasparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens: How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:

Schofula and Schofulous Complaints, Enertions and Emprive Diseases, Ulceus,

This compound will be found a great promoter of lealth, when taken in the spring, to expel the foul humors which feater in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the akin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and aluggish in the veins; cleanse it whenever it is foul, and your feelings will tell wings to the start, it is its most perfect instrument for hitting that can be found

or sores; cleanse it when you must it not structed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or any thing else.
