The stomach, from a variety of causes, such as Indigestion, Dysbility, etc., is very closs deranged. The Other being the being selected, the result of which is that the patient suffers from several or more of the following diseases:

In this connection we would submit these well-known remedies—

GERMAN TONIC.

DR. C. M. JACKSON. Philadelphia, Pa.

Twenty-two years since they were first intro-duced into this country from Germany, during which time they have undoubtedly performed more cares, and benefitted suffering humanity to a greater extent, than any other remedies known to the public.

DEBILITY,

There is no medicine extant equal to these remedies in such cases. A tone and vigor is imparted to the whole system, the appetite is strengthened, food is enjoyed, the stomach discess promptly, the blood is purified, the complexion becomes sound and healthy, the yellow tings is eradicated from the eyes, a bloom igiven to the cheeks, and the weak and nervous invalid becomes a strong and healthy being Persons advanced in life, and feeling the hand of time weighing heavily upon them, with all its attendant ills, will find in the use of the BITTERS, or the TOMIC, an clixir that will in stil new life into their veins, restore in a meas ure the energy and ardor of more youthful days build up their shrunken forms, and give health and happiness to their remaining years.

It is a well established fact that fully one-half of the female portion are aldom in the enhalts; or, to use sion, never teel their own expression, never teel well." They are an and have no appetite.

To this class of persons the BITTERS, or the ONIC, is especially recommended.

Weak and delicate children are made stron by the use of 4ther of these remedies. They will cure every case of MARASMUS, withou fail. Thousands of certificates have accumula ted in the hands of the proprietor, but spac-will allow of but few. Those, it will be observed are men of note and of such standing that they must be believed.

The Democratic party has never displayed that zeal in supporting its press that it needed, and to that cause, as much as anything else, may be attributed its misfortunes during the last ten years. In all sections of the country—even in the midst of the strongest Democratic localities—the Radical press is more liberally sustained than ours, and in many places the contrast is so great as almost to amount to a disgrace.

Babies are of two kinds, male and female, and energy of the contesting foes than upon the sacredness of their cause, or the convictions of the participats. The Democracy of America have always stood forth as devotedly attached great deal on their heft; but as they have great deal on their heft; but as they have twenty-one years to grow in before it costs them anything, it don't matter so much how big they happen to be when they commence. Probably babies have more pet names than any other known article of their size. In the tender years of life, say the first two, they are lovingly addressed by such endearing names as Old Beautiful, Sweetness, Him Darling, Honeycomb, Papa's Hope, Mamma's Joy, Old Blessed, Noble Handsome, supposed to be a contradiction of Old Handsome, and laundreds of other appellations

We understand that there are quite a number of persons who differ from us in regard to kissing; if so let them kiss, we cannot stop to argue the point, as our subject treats of babies.

The monotony of babies' lives is varied by such little incidents as an attack of the measure of the many conventions of the measure of the many conventions. After clearing up the debris, the mother returns to her work, thanking her stars that it was only a choice verbena that was ruined

and not Willie's neck.

We think the mother acts the most sensibly, though even she has her failings and weak points in regard to the baby, and will occasionally exhibit a trace of insanity when dilating upon his charms and accom-

The effect babies have on progression is self-evident. No one ever knew of a baby inferior to any other preceding baby. On the contrary, each one is a little in advance the contrary, each one is a little in advance of any yet born; and when we think of the vast number yet to be, and how every one will be a trifle superior to its predecessor, what a glorious future awaits us! which should be avoided.

Mr. Chase urges that the most liberal aid should be extended to the South in improving their railroad system and also their navigable rivers. He thinks aid should be given to the levees on the Mississippi, build new ones wherever they are required, even from Cairo to the Gulf.
