WORKINGMEN ECONOMIZE.—The recent cold weather should remind our mechanics and laborers to save sufficient out of their wages for winter provender. In two months from the present time it will be too cold to labor much out of doors, and it behooves those especially with large families to look a little ahead, for during our winter months necessaries of life are dearer than at any other time of the year. Get in your fuel, and exchange to apologize to Gen. Logan for all the provisions your surplus earnings will permit. THIS MILL IS SUPERIOR TO ALL OTHERS IN THE FOLLOWING POINTS:

DON'T FORGET THE ELECTION BETURNS. But you should also recollect that the

EMPIRE FEED CUTTER

The above out represents a new and improved four knife Cutting Box, greatly superior to any four knife Feed Cutter in use. Its strength, durability, compactness, solf-feeding, adjustable throat and knives, ease of cutting all kinds of feed equally well, different length of cut, operated by hand or horse power, all combined, give the "Empire Feed Cutter" the decided preference ver every other four-knife Cutter. Took the First Fremium at the New York State Fair in 1821 We offer them to the public with full confidence that they will give entire astisfaction.

Mercier Flexible Harrow.

THE FOLLOWING COMMUNICATIONS from well known citizens explain its merits?

LETTER FROW GEN, KILLPATRIEK.

I hereby certify that I have used the "Mercies Flexible Harrow," the right of which for this County is owned by Capt. John H. Welsh, and find that I can accomplish one-third more with this machine than with any other I am acquainted with. It combines the qualities of lightness, cheapness and durability, and is the most perfect harrow that I have ever seen. It can be easily changed into a cultivator for Corn and any boy large enough to drive a team can readily and easily take it spart and put it together again. I most cheerfully recommend my friends and acquaintances to but this ma. readily and easily take it apart and put it to gether again. I most cheerfully recommend my friends and acquaintances to but this machine, as I consider it altogether the best in use. No risk is incurred by the purchase, as the buyer will have ample opportunities of trying before paying for it. I have purchased a Harrow and a farm right.

JOHN KILLPATRICK,

East Mill Creek.

LETTER PRON DR. JOHN S. CARTER.
Having witnessed the operation of this Harrow at the trial on the land of Gen. Killpatrick, on the 18th of June. I have no hesitation in saying that I believe it to be a very superior implement of its class, and quite worthy the attention of all who have occasion to use such an article. Its fiexibility—which causes it to adapt itself closely to the surface of the ground, however rough or uneven it may be, is a feature of much importance, and one that distinguishes this from all other Harrows. There are also other peculiarities in its construction which will be readily perceived by the intelligent farmer, and which will doubtiess tend, ere long, to bring it into general use. I have purchased one of these Harrows for use on my land.

Manufactured and sold by the undersigned, who guarantees the Harrows to give entire astigaction.

The Observer has the Largest circulation of any paper in N. W. Penn'a, cither Daily or Weekly. On this point we challenge contradiction. Its circulation extends to all places of importance in Eric, Crawford, Warren and Venanga counties.

THE editor having been unexpectedly tle patience this week. Having never before undertaken the sole charge of a paper, we find it rather more of a job than we expected. Like the boy who would not go into

promises, and we can recommend him to every one as a man worthy of confidence,

names of baselines of the pills sent (confidentially) by book is a good one, and also that Miss Hubbell is a person who is well known to our citizens. We would advise all to subscribe at

A good illustration of what manufactures will do for a place, when encouraged, is afforded by the flourishing town of Canton, Ohio, where reapers and mowers are made. When the inventor went there, a few years ago, it was one of the dullest and least progressive towns in the State. He asked for ten thousand dollars to start a manufactory. The citizens raised and gave it to him. The following are the results of the investment. Two large manufactories of plows exclusiveware, two of horse rakes, one of farm wagons, one of cultivators, one of wrought iron
