WEEKLY OBSERVER

ERIE, PENNA, NOVEMBER 19, 1868. LARGEST CIRCULATION. The Observer has the Largest circulation of any paper in N. W. Penn'a, either Daily or Weekly. On this point we challenge contradiction. Its circulation extends to all places of importance in Eric, Crawford, Warren and Venango counties.

To Delinquents. We have sent out bills to a large number of persons during the past week, and intend continuing to do so until all owing the office are notified. For the benefit of those who may think we go to this trouble and expense for the mere "fun" of the thing, we would state that our notices mean just what they say, and we hope to have those in arrears act accordingly. We cannot afford to have so much money outstanding any longer, and, in justice to ourself, must make an effort to collect what belongs to us. After the 1st of January all indebted for over a year's subacquainted with, will have their names stricken off the books, and the accounts placed in a Justice's hands for collection. We are resolved to inaugurate a system of

adopt the advance system as soon as we can get our books into a convenient shape. For the benefit of persons with treacherous memorie-, we will add that it is an old

fact that, since the election, reports of Ku-Klux outrages in the South no longer greet the eyes of the readers of his valuable columns. We should have no hesitation in crossing steel with our genial opponent, if he made the least pretension towards convicting us of giving currency to an erroneous statement. He neither denies the fact asserted nor attempts to explain the reason why accounts of these alleged outrages fail to appear to the same extent with which they were retailed by the Republican press a few weeks ago. We understand too well the magnanimous character of our neighbor, to of making these charges against the good that party bias has converted the mere ordinary disturbances of one or more communities into a seeming disrespect for law on the part of a whole population? We have given close inrestigation to this subject, and with the best information we can obtain, are fully satisfied that two-thirds of the outrages reported from the South exist only in the imaginations of that section as a class are as well disposed as any corresponding number in the North or It may be that the superior judgment, wider experience, and clearer perceptive faculties of our neighbor enable him to and sincerely, to adhere to our opinion

Mr. Lowry, on the other hand, as vigorously declares, and with as little foundation, that we are in alliance with the Gazette to oppose his aspirations. Perhaps, if the truth were told, both parties would admit that the Observer's "offending" consists, in having adopted that line of policy which seemed most to the advantage of its party cause, without regard to who of the opposition liked or disliked it. We take occasion to say now, in order to avoid misapprehension in future, that whichever, faction will afford us the best opportunity to give Radi- fall. calism a death blow in this county, will be most likely to secure our co-operation.

RAILBOAD ACCIDENT .- About twelve o'clock on Wednesday night of last week, a cattle train of the Buffalo and Erie Railroad, collided with a passenger train of the New York and Eric Railway going into Buffalo, about a mile from the depot, where the tracks cross each other at almost right angles. The sun will be nearly at its greatest distance from the earth and the moon at its least, so that the obscuration will last a longer time than usual. There have been only two total eclipses visible in my large part of the United States during the present century—those of 1806 and 1834. Several annular eclipses have occurred, one of the most remarkable of which was that of 1839.

THE METEORIC SHOWER.-We are inormed, but cannot speak from personal experience, that between 12 and 2 o'clock on Saturday morning the shooting-stars began to whisk across the heavens, making a grand display, and affording a splendid spectacle to persons who were awake at that early hour. The direction from which the meteors emanated was the northwest. Many of them appeared to fall to the earth's surface and then dash into countless brilliant fragments. While the display was progressing, a singular light was observable in the Southern sky. It was formed like an "S," and was visible for nearly half an hour. The diaplay extended to all portions of the country, but was more brilliant in some localities than in self. others, according to the nature of the weather.

WE ARE afraid that the almanac makers, and our friend of the Middletown Journal especially, will have to make a fresh investigation into the Indian summer season. Acording to their predictions, it was to commence in the early part of this month, but although we have looked for it with much anxiety, no signs of its appearance have yet been witnessed. We begin to think it is one of the defunct affairs of the "good old times," when Democracy ruled the nation, and everything went lovely in weather as well as polities. What says Bro. S.?
