COM. PERRY'S HEAD-QUARTERS. - ANOTH-ER OLD LAND MARK REMOVED .- " Buehler's eter and 10 feet stroke, and of immense Eric Hotel," latterly known as the "Me, weight. The pistons work directly in con-Conkey House," north-east corner of French nection with the pump rods. The pumps and Third Streets, is rapidly being demolish- are 21 inches in diameter and 10 feet stroke, ed! Some dozen ruthless fellows are hard at work chopping and tearing away at this anclent and revered structure with as much indifference as it slashing away at the remains the remaining seven hours being allowed for of some old barn. Verily, soon all these ancient domiciles—the homes of our pioneer fathers in early days-will have passed away. Like the early and sturdy pioneers themselves, who have mostly passed from this stage and taken up their abode in the world of spirits, these old and primitive structures, in the course of human events. must also be known only as things that

This Hotel was built by Geo. Buchler, an

opulent and enterprising gentleman from Dauphin county, Pa., in 1805, and kept by him as a hotel until 1810, when he removed to Harrisburg again. He was succeeded by James Duncan, who kent it until 1818, when he was succeeded by Thomas Recs, Jr., and Mr. Rees by James McConkey, who finally closed it as a hotel in 1834. The history of this house, and the incidents connected with it, have always been held in great reverence by our citizeus, more particularly as having been the headquarters of Com. Perry while preparing the vessels for his squadron for the ever memorable 10th of Sept. 1813, and during his stay on this station. Well will be remembered by the few surviving of our old citizens the afternoon of the 22d Oct., 1818. when Com. Perry, Gen. Harrison, and Com. Barclay, (the English commander) with their respective attendants, arrived in the Schooner Ariel from Detroit; and, landing at the foot of French street, marched up to the hotel. Com. Barclay having been wounded and feeble, was supported on the one side by Com. Perry, and on the other by Gen. Fiarrison. About half way up to the hotel, Com. Barclay came near swooning, when Tom Breeze, Com. Perry's Secretary, ran up and got some wine, which revived him. Com. Perry gave up his private quarters to Com. Barclay, which was the noted south-east corner chamber on the second floor, and would not permit them to illuminate that portion of the building observable by the gallant but captive Commodore; as that evening there was a general illumination, and the streets were thronged with a joyous

This venerable pile was built after the old manner of frame work, with heavy timbers and strong fastening, and showed itself firm and staunch to the last-preserving much of its original dignity when it was the "crack hotel" of the town. It was ronstructed by John Warren, carpenter and builder, who has long since gone to his final rest, leaving some of his offspring still residing in this county. So ends this old and well known structure; and alas! "The Erie Hotel," the " Perry Headquarters," the "Mcry respect. A liberal discount made on jobbing lots to be trade. Conkey House," will only be known as a matter of the past. 🦳

The New City Water Works.

Whatever differences of opinion may exist n regard to the policy of building as extensive Water Works as the city has just completed, or as to the best means of supply, few will deny that in point of mechanical and engineering skill the Works erected are among the most creditable in the country. They are now in successful operation, everything about the machinery is working to perfection, an abundant supply of water is distributed throughout the city, and the pres-Any person who will send us the names of eat seems an appropriate time to give a de-

The Water Commissioners, after giving server Free for one year. This offer will the subject a careful examination, reached the conclusion that the only reliable source of supply was the Bay, the water of which has been analyzed and pronounced as pure as that of the streams back of the city. A point on the bank at the foot of Chestnut street was selected, where the earth was dug away, and a foundation secured for the buildings and stand-pipe on the solid rock, some that the object of Cameron's exertions was soon feet in length, with a water channel in feet above the level of the water. A dock the centre, has been built out into the Bay, from which a pipe extends 400 feet further which have prevailed between Messrs, Cam- into 30 feet of water. Through this dock eron and Brewster, and the bosom friend and pipe all the water flows that is pumped into 30 feet of water. Through this dock

host of applicants for office, who looked upon | did view of the Bay. It is 30 by 35 feet in Cameron as their "right bower?" Who will size and 65 feet high. The joice are tubular secure their appointment first, and confirma- and made of boiler iron, the upper and lower are placed in the upper story, with the pumps immediately beneath them. Their cylinders are upright, are 60 inches in diamand are capable of pumping two million galstoppages. The water is taken from directly beneath the pumps, it being conducted there through the channel in the dock. The engines are calculated to operate the pumps at he rate of 12 strokes per minute, but are capable of being worked up to sixteen strokes. The power of the engines may be varied, by means of weights, so as to sustain a greater or less quantity of water in the stand-pipe. By this arrangement the pumps will be operated till the desired height of water is reached in the stand-pipe, when the engines will automatically stop. It is not designed to work more than one engine at a time, the other being kept in order to provide against

accidents. Attached to the main building is the boiler ouse, 50 by 60 feet, and one story high, containing eight boilers, 30 feet long and 42 inches in diameter. They rest on brick and stone work, built up from the solid rock. Each boiler will be independent of the others. so that the stopping of one will not affect the others. The smoke stack is built of brick and is 100 feet in height.

Although the machinery of the works is a source of much interest to those skilled in such matters, the principal object of attraction to the majority of persons will always be the great stand-pipe, into which the water is pumped and thence distributed over the city. It takes the place of the old fashioned formerly supposed to be a necessity. The stand-pipe is placed on a level with the boiler house, and at its south-west corner. It is 220 high above the rock, (sufficient to carry the water to the highest point on Federal Hill.) is five feet in diameter, is made of boiler from 8-16th of an inch thick at the top and 7-16th of an inch at the bottom, weighs, 42 tons, and is to be surmounted by an ornsmental spire of bright metal, fifteen feet high, making it the highest pipe on the continent and probably in the world. The pipe was put up in sections, similar to the placing together of an prdinary stove pipe. It was made and placed in position by the Eric City Iron Works, and is in all respects a creditable specimen of their ingenuity and capacity. The pipe is to have a wall built around it to the height of 193 feet, enclosing a spiral staircase of 250 steps, and surmounted by a balcony 5 feet wide, from which a magnificent view will be laid of the city and its surroundings. The wall is of

stone 22 feet, and the balance will be of brick. It is not yet completed, but will be soon after spring opens. Into the stand-pipe the water is pumped directly from the Bay. and it can be filled to any height desired. The interior consists of one chamber only; and the water enters and leaves by pipes at the foot in a manner which we cannot explain with our limited knowledge of such matters. The design is eventually to have a reservoir on some high ground, in which event it is claimed that the stand-pipe will be an advantage. At present the latter is expected to meet all the necessities of the city The principle is said to be in successful operation in Philadelphia and elsewhere.

Two engineers are all the employees at the works now, but when they are in full operation, two firemen will be required in addition. The estimated expense of ranning the works, when everything gets to going as expected, is \$20 per day. The total cost of the works, including laying of pipes through the streets of the city, is about \$309,000. Applications for water have already been made to a greater extent than was anticipated, and the officers believe that before two years it will be conveyed into nearly every

building in the city and South Erie. The ground for the works was first broken on the 7th day of April, and the engines commenced pumping on the 24th day of December, showing a degree of speed seldom attained on public improvements, and unmistakably exhibiting the efficiency of the contractors and officers in charge. The buildings were erected by John M. Kuhn who had the entire contract for their construction, H. M. Birkenbine, of Philadelphia, the celebrated Civil Engineer, had the general superintendence of the improvement. The Water Commissioners are W. W. Reed, Henry Rawle and J. C. Belden-W. L. Scott, one of their original members, having resigned and Mr. S. taken his place. The faithfulness with which all these gentlemen have performed their respective duties is best attested by the superior character o

the works attained at less cost than any

similar improvement in the country.

AT THE Bennett House, in Union, a short time since, two young couples made their appearance, hailing from the direction of Wattsburg. on New Year's Day, and indeed very little during the first week thereafter. Gradually, however, my old customers, having broken their New Year's resolutions, come dropping in one by one, and before the end of January I sell as many clears and as much tolurco as ever-indeed rather more." Poor human

The late thaw created quite a flood in the Allegheny River, which carried off the ice very suddenly, and the stream is entirely clear except in the eddies. The P. & E. R. R. Co. have been re-building their bridge at that point, and were at work on the centre apan, which was supported upon trussles. The broken ice dashed against this frail support with such force on Saturday as to sweep the stream of the s port with such force on Saturday as to sweep it away about noon, carrying along the entire span, which cannot be replaced until the water subsides. The occurrence put a stop of the control of the contr to through travel for several days, but ar- Gunnison, Jacob Seip, Christian Thomas, rangements have now been made by which J. Warfel, Charles Weigel. rangements have now been made by which passengers will be ferried across the river until the span is replaced.

THE Westfield Enterprise gives an accoun place lately, accompanied by three children, one white and two colored. She had been twice married once to a white barber, by whom she had one child, and the second time whom she had one child, and the second shall to a negro, who was the father of the mulattoes. After living four years with the negro, her stomach revolted against further amalgamation, and she left him to find a home among her friends. Although Chandan tanqua county is one of the hot-beds of Radicalism, her reception at Westfield was not cordial enough to induce her to stay, and she is now upon the look out for a locality where is now upon the look out for a locality where is now upon the look out for a locality where missassantism is more popular than along the local tangent of the local t is one of the best landlords in the county) gro, her stomach revolted against further

Senatorial squabble than any other paper, says Judge Scofield never had "the shadow of a chance of election."

In the procurement of a charter through Pennsylvania, the Atlantic & Great Western Railway agreed to run a branch line to Erie, under a forfeiture of failure of \$500,000. The line spoken of was originally laid to Erie, and a portion of it was graded from Ashville towards Findley's Lake, in Mina. But the week resulted in an inglorious fizzle. Only six couples made their appearance, who, on allowed by law has passed, and notice has allowed by law has passed, and notice has allowed by law has passed, and notice has been served on the Company by the authorities of the State, but nothing definite, on yet has transpired in relation to the matter. We understand, however, that the charter has

been renewed.

Any one at all conversant with the topo graphical relations of New York with the topographical relations of New York with this state, will see at once the advantage of having a line constructed from Jamestown, N. Y., to Eric. The distance is about fifty-live miles, grades easy, and construction not very expensive. By this means Eric would have a direct communication with the metropolis. The route from and to Chicago, by this line from New York is largely in its favor, as will be seen by the following comparative table of distances, which we take from Appleton's Railway Guide:

HARRINGTON & CO., F. FIFTEEN years' standing as Jobbers and Fifty for the whole country the advantages of their immense importations and agencies for American manufactories through the popular ONE DOLLAR SYSTEM.

In view of the fact that an immense through travel will take place on the open-ing of the Pacific Road, and consequently a corresponding impetus given to trade, it bepoves our citizens to take earnest and im mediate steps in this matter. The surveys of the line from this point to Jamestown can be made for twenty-five hundred dollars. Let our citizens raise subscriptions for the cost of surveying and ascertaining the true cost and rades of the line. And when this is done a committee should be instructed to lay the plans and reports before the Directors of the New York & Erie, showing them the advan-tages of Erie as a port.—Dispatch.

A friend informs us that along the line of the proposed toad considerable interest i felt in its construction, and the topic is one of general discussion among the citizens. He thinks it not unlikely that liberal subscrip tions could be obtained, and wonders that the people of Erie do not manifest more concern upon the subject. We publish the above extract with the object of awakening interest in the project, and shall soon take occasion tained by a majority of the stockholders, to illustrate its advantages at more length favoring the running of the cars on Sundays | The views expressed by the Dispatch meet -for the benefit of church goers! The ques- our hearty approbation, and we hope to see some of our enterprising citizens move in the matter at once.

> The Amalgamation Case. The Cleveland Plaindenier gives the folowing particulars of the case to which we referred in our last issue:

"A strange couple came up from Eric, on the Lake Shore Road, Saturday evening— exciting the disgust and intense curiosity of every passenger in the car. It comprises a sooty, greasy negro, and a pretty white girl, whom he had married the day before at Eric. trade he was fitted out with a pair of leath er breeches, which generally lasted him, with care and patching and mending, until he was Her Stuation, for she kept herself doubly veiled, and looked out of the ear all the time. Her Othello, however, was all passionate ten-

shown in this day before a Erick rade he was fitted out with a pair of least he receives, which generally lasted him, with care and patching and mending, until he was free. He then had another pair as part of his freedom suit; which very often served in through life.

The Meadville Republican of Nov. 7, under the head of "Mere Mention," has the following trulam, which ought to be published in every journal in the land:

"It's alrunken man could, in the milat of this heaville, the conceive of the content of the content in the conceive of the content in the conceive of himself of the content in the conceive of the content of the c ship thief, whose depredations throughout the North-Western counties have made his name familiar to everybody, is again at large.

J. Warfel, Charles Weigel.

DR. Liston.—We would again remind all who are afflicted with diseases of the Eye, Ear, Throst, Catarrh or any Chronic disease, that Dr. Liston, the celebrated Surgeon to the Albany Eye and Ear Infirmary, whose wonderful success in treating this class of complaints, we have spoken of so otten in terms of praise, will be at the Reed House, on Tuesday and Wednesday, the 2d and 3rd days of February, atopping for these two days only. Call early on those days if you desire to consult him.

Plantation Bitters are especially recommended to Clergymen, Public Speakers and persons of literary habits and sedentary THE Westfield Enterprise gives an account that Dr. Liston, the celebrated Surgeon to the Albany Eye and Ear Infirmary, whose thirty-five years of age, who stopped in that place lately, accompanied by three children.

properly in the counties of this section is as follows: Crawford \$296,000, Eric \$276,000, Eric \$24,000, Porrest \$13,500, McKean \$30, Botton \$24,000, Porrest \$13,500, McKean \$30, Botton \$126,000, Warren \$83,500. The total sum invested in school buildings and appropriate in the State is estimated at \$10,856, Propriate in the State in th paratus in the State is estimated at \$10,556, Butter, w.B. ship thief, whose depredations throughout the North-Western counties have made his an Wesleyan Methodist preacher. Prof. Allon knew of her leaving to marry the negro, and maintigr to everybody, is again at large. He feigned insanity in the Western Penitentiary where he had been sentenced for a long iterm of years, and imposed upon the officers so effectually that he was transferred to the Hospital, where the facilities for escape are easier. On the night of the 4th inst., he forced a door in the Hospital Building, and obtained his liberty, since which item nothing has been heard or seen of him. It is hardly likely that he will return to our county.

A strikkne illustration of the truth of the proverb that a certain road is paved with good Intentions was the remark made by one of our tobacconists the other day. "On New Year's Day," said he, I always find a sudden and tremendous falling off of my business. After doing an unusual amount of business.

Oriental Tea Company's Double Column.

AND COFFEE BY THE SINGLE POUND, AT CARGO PRICES.

Saving of One-Half to One-Third

The Great Tea Company of Boston, Which is the Largest in the World,

Would respectfully inform the citizens of Eric and surrounding country, that they have leased the Store. No. 5 NOBLE BLOCK, ERIE, PA.,

And have fitted it up in Oriental style, and are now prepared to furnish every one with prime Teas and Coffees, at targe Prices. Our store in Eric will be known as the

WESTERN ORIENTAL TEA COMPANY!

It is generally understood that Tea is retailed for a larger advance on its original cost than any other article in the long list of household stores, which may be partially accounted for by recollecting THE GREAT NUMBER AND IMMENSE AMOUNT OF PROFIGN which accumulate on it between the cultivation in China and Japan, and the consumers here, including the American Commission House there; the importer, the Banker who furnishes the exchange the middle men or special ators; the wholesale grover, and the retailer. Each of these make large, and many of them enormous profits, from which it is evident that the consumer is compelled to pay many times the original cost for a pure article, or forced to use an adulterated or inferior one.

It is with a view to remedy this evil that our gigantic enterprise was formed over a year ago which has been a perfect success, and we have ventured to open a Store in Eric, so that we may better accommodate our customers west of New York State.

And in the following lists which we have selected with great care, will be found TEAS which will said.

Experience shows that the best are far the cheapest on account of their great strength and ivor. The duty on a pound of good was is no more than on an inferior one. In ordering our stomers will please note the annexed SCALE OF PRICES. Finest Flavor, full strength, very highly Colong, (Black.) English Breakfast, (Black.) Choice Quality Finest Flavor, full strength, very highly Mixed, (Green or Japan and Black.) Young Hyson, (Green.)

Our Coffee Department.

This is an immense institution of itself, and is undoubtedly the largest in the country. It is a fact generally understood that a large proportion of the Coffee imported is picked green and the pods opened by artificial heat. This is never so good as that which ripens naturally. The coffee buyers of this Tea Company thoroughly understand this, and examine nearly every cargo of coffee imported to the United States, and scient only the full grown, field-ripened, for them. All the Libries sould by this Company is ROASTED AND GROUND DAILY, by themselves, insuring its absolute purity and freshness, which they guarantee. The Company are reasting all ring its absolute purity and freshness, which they guarantee. The Company are reasting all their coffee on a new principle, which renders them particularly pure, all scidity being removed by their process of cooking, enabling porsons now to take coffee Me been obliged to discontinue its use.

The Company are doing any immense business in facir Coffee Department, and selling more PURE COFFEES than any other house in the country. To satist customers in making up their profers, the following Descriptive List is offered by the Company with no little pride, as embracing the largest and most carefully selected assortment of Coffee or opened in this country.
