Patent Reaper and Mower, and Self-Raker!

The success of the Dodge Machine for several years past is unprecedented. Wherever intro-duced it at once takes the front rank. By lease and purchase, the manufacturers have secured the use of all the desirable standard patents for Redping, Mowing and Raking Machines. The Dodge Machine has thus been made a perfect combination of the best points of all the ma-chines; and this is the reason for its underlable superiority. In plan of operation, compactness, lightness of draft, good quality of the iron and steel used in its construction, excelence of workmanship and elegance of fullsh, combined with great strength and adaptation to all kinds of work, the Dodge Machine certainly surpasses any other heretofore offered to the intelligent farmers of thy contry.
