

### ESTABLISHED IN 1844. FARMERS OF ERIE COUNTY. ERIE RAILWAY INGRAHAMS Combined Marker, Cultivator and Hiller, 1,300 Miles under one Management. 860 Miles without Change of Coaches. HALL & WARFEL, MANUFACTURED BY GEORGE B. SENNETT. Great Broad Gauge Double Track Route to NEW YORK, BOSTON, MEADVILLE, PA. MEADVILLE, PA. This is the most perfect and greatest labor saving Machine of the kind now known. The advantages of this implement over all others is not only that it cuts up, but also turns under and subdues the weeds and forms a suitable hill, leaving the soil light and therefore in a condition to retain moisture, which is only done by the extra height and peculiar curve of the tooth. They are made with shafts, of with-out. They can be adjusted to any width of row. The side teeth can be reversed to turn the soil to or from the rows. This machine is the only implement the farmer needs in the cultivation of corn or other coarse grains, planted or sown in rows. These machines have been thorough-ly tested and are warranted togive satisfaction. REFERENCES: WHOLESALE AND RETAIL and the New England Citles. and the New England Citles. This certifies that we, the undersigned, pur-chased last season of P. rennett, and thorough-ly tested one of Ingraham's Curved Tooth, Double Pointed and Adjustable Cultivators. It is arranged to do its work in a desirable manner in all kinds of crops in their different stages for which the Cultivator and Horse Hoe is used. It thoroughly purverizes the gound, cuts and covers up the weeds, forms a light, flat hill, leaving little or no use for the hoe, and leaves the ground in a condition to retain its lightness and moisture.
