CHEEREN MADE FROM A SMALL DAIRT.— A way of making easily with three or four cows, a cheese that will weigh the or fifteen pounds. Take milk that is sweet—do not remove much of the cream from the night's milk—then warm it sol.

12

that it shall be of the same temperature as the morning's milk fresh from the cows, and mix night's and morning's shortly thereafter the yellow fever broke COFFEE FOR

cows, and mix night's and morning's milk together. A piece of calf's remet should be soaked in a half pint of water over night; put one-half or more into the milk, adding more if not sufficient. After it turns, take your ladle or knife and cut through and through, dividing the curd into small squares. When the necessary conditions to public health.

the curd into small squares. When the whey separates, pour it all off, and then take boiling water and pour over the curd ; let it stand ten minutes—this is to give it tonghness and prevent its being 'crumbly.' Now let it stand until entirely cold, all the water having been drained off. When cold, chop it fine, salt it to the take in out and turn it; press three hours more and then turn sgain and place on a clean shelf, rub a little butter over it and turn each day.

MILE -- Milk for butter-making should a handled cently and put at rest as MILK.—Milk for butter-making should be handled gently and put at rest as soon as possible. A reduction of tem-perature is desirable as soon as the milk is drawn. This should be effected with the least possible amount of stirring. The more it is stirred the leas will be the yield of cream. When set, it should be protected from even the least jar. Churning in a milk-room, or any work that jars the building, will retard the rising of the cream. Milk, to get the best yield of cream, requires absolute and undisturbed rest.

and led him to invite his wife to catch him before he got around to the back stoop. He started on a smart run, and she bore down after him at a creditable speed. He tore around the corner very much in earnest, and stepping on a piece of ice, swung from his foothold and went careening across ten feet of frozen ground, and brought up with considerable force against a pear tree-a new variety, we believe. It was a genial spectacle to see the fond wife pounce on him and hear her gleeful shouts of victory as he struggled madly to his feet and besought her 'not to make a fool of herself.'

MOTH PREVENTIVE.—The following is a recipe for keeping moths out of cloth-ing; Mix half a pint of alcohol, the same quantity of spirits of turpentine and the constant precognizing her master looked at his own door, when the servant, not

ar his own door, when the servant, not recognizing her master, looked out of the window, and said: "The professor is not at home." "Oh, very well," replied Lessing, composedly walking away, "I will call again."

A LADY, well known in the fashionable world was walking down Regent Street. London, and everybody was staring at her new shawl. Presently her husband discovered a large ticket, on which was

written, "Very chaste! four guineas." The ticket had been left on by the shop-

ASIATIC CHOLERA

The superior protective and sanative virtues of the Swedish Bitters against Malarious Fevers, Dysentery and Cholers, were most apparently tested in the late ware by French and English physicians, who by pre-cerbing the same to their respective troops, suc-coded in reducing the mortality list of eptiemic disthe from 15 to 1 per cent

AND

DIRECTIONS

SW"All persons who have to perform long and hard 537 All persons who have to perform long and hard labor, and while doing it, are often exposed to suddan changes of tempersture, or the draft or air, or obnos-tous dusts, smells, or vapors, should not fail to use the Swedish Bitters, as a few drope of it, added to their drink, are sufficient to preserve them in insett-mable health and vigor. Those who are scenatomed to drink ice water during the summer, should never emit to add some Swedish Bitters to it.

IF Persons given to sedentary life should use the Swediah Bitters. It will neutralize the bad effects of their want of exercise in open air, and keep them in good health and good spirits.

To the Ladios the Swedish Bitters must especi 52 To the Ladies the Swolish Bitters must especially be recommended. Because its use contributes most essentially to preserve the regularity of the physiological functions, peculiar to the delicate female constitution and thus proves an effectual barrier against thous forumerable Nervous and Blood Diseases, which now a days have grown so frequent as to be taken by many for Evels natural inheritance

FT But the Swedish Bitters does not only secure good health; it also effects the full development of the female body, and of its beauty by perfect forms and

fine complection and color. Thus the fiwedish litters has become one of the tustoms soon bna lasta

COSMETIC AND TOILET ARTICLES SF Farmers and their families, who have t Swedish Bitters, prafer it to all similar articles. For them it proves baneficial in various ways.

In Summer, when their calling requires them is often endure the intense heat of the sun, while per-forming hard work, they are induced to be not suf-

Sciently cautions in eath fying their burning thirst by water, or in eating fruit not yet ripe, in. Thus farm-

Ing people are very liable to suffer from sun stroke, Yerer, Dysantery, Cholers, &c., &n. The regular use of the Swedish Blitters makes these dangerous infit-
