the variety and quantity of these manuand forthwith a new factory springs up a large volume to give the names of farmers, and of course they secure both; more than this, they secure the farmers themselves, or their sons, because they get better pay than they is due its peculiar argentine luster. could in working the soil. The old homestead is frequently sold to the next neighbor, at a sacrifice, because

will dry up without. In some few cases it will, but nine times out of ten the job done in this way is only half done, and a little more expense would have quadrupled the profits. In some cases it may be best to run catch-water drains, to prevent the percolation of water from higher land, but the distance asunder consists of metal uprights and girders of the main drains should not be increased one inch on this account. Re member that the job should be a per manent one, and hence should be well done. Half the ground well drained will yield double the profit on the same cost as all of it half done. The drains may be from twenty-five to forty feet spart, according to their depth and the nature of the sub-soil. but if there should be any doubt as to the proper distance, give the shorter distance the preference rather than err one inch on the other side. Many acres are only partially drained because the drains are too far apart, and hence do not do their

says: "We will suppose a frame en-closen with clapboards or siding ready for the mason. Have strips of an inch, or inch and a quarter wide, sawed from way for the regular side walls. It will be perceived that this plan is upon the principle of an ice closet, giving two air chambers, cutting off all direct air currents, constituting your rooms cooler it has hitherto been supposed they It is cheaper than filling in with bricks and very much better."

Low vs. High Fault Trees,-An Illinois fruit-grower, who has 12,000 apple, and from 4,000 to 6,000 pear trees, finds that "those with low heads, of the same varieties, show at least two-thirds more colored as those with high tops. To test the matter he cut off in certain rows all the limbs from four to six feet from the ground, and in others he en-of about \$27 per 100 lbs. At Almaden couraged the limbs to start close to the surface, and in the latter case neither thinned nor pruned, except occasionally to lop away a too lusty shoot in order to preserve a symmetrical appearance, or evenly balanced head, and the above

To CURE LICE ON CALVES,-I have used flour of brimstone, (sulphur) rub-bing it dry well into the roots of the hair all along the back. The lice will then move to the inside of the flanks and behind the shoulders, where the same remedy may be applied, mixing a little lard with it to make it adhere

The first state of the same and behind the shoulders, where the the cotton worm and others of like nature.

The first state of the same intrictlemon juice, or good vinegar; then another layer of crumbs, and so on till you have one joint for nothing. Bound and add a cup of cream or milk; bake one joint for nothing. DR SACE'S CATARRY PEMEDY.

It is the only form of instrument yet invented with which fluid medicine can be carried sigh up not perfectly applied to all parts of the affected nasal passages, and the clumbers or cavities cemmanicating therewith, in which sores and alcers frequently exist, and from which the extarrhal discharge generally proceeds. The want or success in treating Catarrh heretofore has arisen largely from the impossibility of applying remedies to these cavities and chambers by any of the ordinary methods. This obstacle in the way of effecting cures is entirely overcome by the invention of the Douche. In using this instrument, the Fluid is carried by its own weight, (no stuffing, forcing or pumping being required,) up one nostril in a full gently flowing stream to the kighest portion of the meal passages, passes into and thoroughly cleanses all the tubes and chambers connected therewith, and flows out of the opposite nostil. It suce is pleasaut, and so simple that a child can understand it. Full and explicit directions accompany each instrument. When need with this instrument Dr. Sany's Catarrh Remedy cares rerespecting a person of quite a poetic temperament, replied, "Oh, he is one of those men who have soarings after the infinite and divings after the un-fathomable, but who never pay cash."

OF PERUVIAN BARK.

The Recipe for this Bitters was found among the papers of a Sweediah physician, a single man, who lost his life, when lot years old, by a fall of his horse. Said recipe then had been kept a profound secret by his family for more than three centuries. During all his timily for more times to the Bitters, which remisred them a strong and long living set of people, enjoying excellent health. Originally the secret of preparing this Bitters and its wonderful effects, was obtained by one of their kin, while participating in the earliest expeditions of the Spaniards in America, after a solemn promise, never to divulge it but to the

as it is now called, has since its coming into public use, effected thousands of astonishing cures of pa-tients already given up by many physicians, and has

HOW IT OPERATES.

The effect of the Swedish Bitters directs itself, in the first place, to the nerves of the digestive organs throughout their entire extent, but mainly to the stomach and the visceral tract. It normalises their functions, and therefore, according to the nature of existing irregularities or removes obstructions and retentions of all kind, or stope Diarrhose, Dyscutery,
