acids which are needed every day, es-pecially for sedentary men, the action of whose liver is sluggish, to eliminate effete matter, which, if retained in the human system, produces inaction of the brain, and, indeed, of the whole system, causing and indeed, of the whole system, and indeed, of the whole system, causing and indeed and the system, and life. In a permanently dry air

brain, and, indeed, of the whole system, causing jaundiee, sleepiness, scury and troublesome diseases of the skin. To PREVENT CLUE FOOT CARDAGE. The Rural New Yorkor says: "A Ger-man market gardener in Pennsylvania the past eason, in putting out his cab-bage, followed the German custom of "pudding" the roots of a part of his plants in a thim mixture of cow manure and water. Five rows thus treated entricip escaped disease, growing pros-perously, while the remaining portion of the crop, one thousand four hundred plants, all died.

salts contained none. The rapidity though inclined, shall be straight. If it be curved, the buds at the top of the are are mainly developed. A recent writer in *Les Mondes*, in reviewing this interesting discovery, advances the opinion that "increased vigor of the branch thus treated was caused by its being made to assume the condition of a syphon, the longer end corwnard, thus producing a greater flow of sap." It is announced that this new process the discovery of rail, certainly deserves attention, and, as it relates not to vines alone, but also to fruit trees, American murserymen would do well to put it to practical test during the coming season. Duchesson-Thorean, who has made a special study of this new method, ad-

PRESSED VEAL.—Take three pounds of veal cutlet and half a pound of salt pork and chop fine; add three eggs, one teaspoon powdered sage, one of pepper, one of salt, and two or three Boston crackers rolled fine, or an equal quantity of bread crumbs. Put it in a bread pan, press closely, and bake until done. When cold turn out and slice.

mislead not to apply to it a name which might mislead and prevent its use in other discasses for which it is so admirably adapted. I wish to mention a most wonderful nutritive property which it possesses, and which so peculiarly adapts it to the wants of the consumptive and adapts it to the wants of the consumptive and the scrsfalous. The nutritive properties posses-sed by Cod Liver Oil are trifling when compared with those possessed by my discovery. It is astonishing to see how it builds up the solid muscle and increases the flesh and weight of those whose systems are reduced below the usual standard of perfect health. The follow-ing testimonial fully confirms all that I claim for my Golden Medical Discovery in the cure of Consemption. f Consumption.

- HEREIT

The superior protective and sanative virtues of the wedish Bitlers against Malarious Fevers, Dyscolory and Cholers, were most apparently tested in the late wars by French and English physicians, who by prescribing the same to their respective troops, suc-ended in reducing the mortality list of spidamic dis-cases from 15 to 3 per cent.

DIRECTIONS

Dr. J. Walker's California Vin-All persons who have to perform long and hard egar Bitters are a purely Vegetable preparation, made chiefly from the na-All persons who have to perform long and havd labor, and while doing it, are often exposed to sudden changes of temperature, or the draft or air, or chear-tons dusts, smells, or vapors, should not fail to use the Swediah Bitters, as a few drops of it, added to their drink, are sufficient to preserve than in inesti-mable health and vigor. Those who are accustomed to drink ice water during the summer, should never emit to add some Swediah Bitters to it. we herbs found on the lower ranges of the Sierra Nevada mountains of Califor-nia, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the

Fersons given to sedentary life should use the Swedish Bitters. It will neutralize the bad effects of Swedia Ditters. It will neutralize the bad effects of their want of exercise in open air, and keep them in good health and good spirits.

To the Ladies the Swadish Bitters must error ally be recommended. Because its use contributes most constituinty to preserve the regularity of the physicio-gical functions, peculiar to the delivate female con-stitution and thus proves an effectual barrier against those innumerable Nervous and Blood Diseases, which now-a-days have grown so frequent as to be taken by many for Eve's natural inheritance

But the Swediah Bitters does not only setur good health; it also effects the full development of the female body, and of its beauty by perfect forms and fine complection and color.

The properties of DR. WALKER'S Thus the Swedish Bitters has become one of the taining and most efficient VINEGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretie,

Sedative, Counter-Irritant, Sudorific, Altera COSMETIC AND TOILET ARTICLES For Farmers and their families, who have trim

regists and Gen. Agts., San Francisco. Californ cor. of Washington and Charlton Sts., N. Y. Sold by all Druggists and Dealers. Swedish Bitters, prefer it to all similar setticies. For them is proves beneficial in various ways.

In Summer, when their calling requires the ften endure the intense heat of the sun, while per forming hard work, they are induced to be not sul Sciently cartious in esticiying their burning third by valar, or in esting fruit not yet rips, &c. Thus farm-ing people are very liable to suffer from sun stroke, Faver, Dynestery, Cholers, &c. As. The sequing use of the Swedish Bitters makes these dangerous infunee all harmiess.

In Winter, during the time of rest, many country people, trying to indemnify themselves for past pri-vations are very spit to often overload their stomach and thus impair their digestive organs the roots of the tree. The use of the Swediah Bitters prevents

As a matter of course, in case of sickness, the pa-tions should would food not screening with him or such, as is known, to be difficult to digest or unsuit-able to the disease in question.
