theory a fattening animal cannot be overfed; but in practice the limit of but in practice the limit of excessive feeding is fixed by the animal's

on more rapidly.

The art of fattening depends on supwhich must, therefore, be lost, in a Madre sense, to the feeder.

Bots in Horses. - The complete inefficacy of the various popular panaceas for bots in horses may be better understood when we come to know something of the nature of these persistent parasites. They are not worms, but larvæ of a fly, and are possessed of remarkable powers of endurance under adversity. The most insinuating substances are but as milk and honey to them, and in an instance recorded a colony of them and died almost instantly. Now, whale oil being thus indicated as an effective results carefully noticed and made note water was obtained, which spouted

begin to blossom cultivation must be by some subterranean outlet? There discontinued, and weeding be done by are no trout in the lower portions of the hand. The plants then strike into the soil to seed, and the soil must previously | water is 64° Fah. be kept loose and mellow to facilitate this process. When ripe the sides of the rows are split with the plow, and the nuts pulled up by hand, and left to that the French Government has de dry upon the ground.

We may set it down as an axiom that the action of lime depends on its access to air and moisture, and hence it should be kept near the surface of the soil as for 1,000 birds, and two general stations with air is cut off, and its action retarded and impaired.

We may also set it down as fixed that cate with friends where neither tele lime hastems the decomposition of vegetable matter in the soil, and renders it available to our crops much sooner than would have been the case if left to the slower course of nature; hence we cannot strictly regard lime as a manure, but must look upon it as a stimular which can more quickly make available the plant food, but which adds very little to its amount. It only acts the part of the "nimble sixpence" in rapidly turning over the farmers capital without directly adding to the bank account in

EARLY RIPENING PEACHES, -The peach season seems gradually being lengthened out by the introduction of early and late varieties, unless it extends over nearly double the time it did thirty years ago. The latest addition seems to be the Early Beatrice, which it is claimed will ripen two weeks in advance of Hale's Early, which has hitherto held the palm for earliness. At the opposite end of the list we have the Smock, which is often caught by frost, so that we can scarcely go further in that direction, and hence producers of new varieties are compelled to direct their whole attention to early kinds.

As usual, it is claimed that the Bea-

trice is free from rot, carries well and will bring a good price. It originated in the neighborhood of New Castle. Delaware.

POTATO EXPERIMENT.-At a meeting of the Experimental Farm Club, Thos. M. Harvey exhibited a sample of pota toes obtained by inserting an eve from one kind or variety into a cutting from another. An eye from a Buckeye (white) was carefully inserted or budded into a are now on our desk .- Journal of the

FROZEN Eggs .- It often happens that eggs will get frozen so as to crack the shell in severe weather, and are of water poured over them, then left till cool, the egg will be uninjured, and will building, from the better ground combest as nicely as if it had not been munication it would afford. chilled, and is just as good for any use.

After being once thawed, it must be After being once thawed it must be used immediately; if allowed to stand a day or two, it will not be fresh or gum arabic will not cause some kinds. OF PERUVIAN BARK.

papers of a Sweedish physician, a single man, who lost his life, when lot years old, by a fall of his horse his family for more than three centuries. During all this time they made frequent use of the litters, which rendered them a strong and long living set of people. enjoying excellent health. Originally the secret of preparing this Bitters and its wonderful effects, was obtained by one of their kin, while participating in the earliest expeditions of the Spaniards in America, after a solemn promise, never to divulge it but to the presumed principal heir.

THIS GENUINE SWEDISH BIT.

as it is now called, has since its coming into public use, effected thousands of astonishing cures of pa-tients already given up by many physicians, and has oved itself such a powerful restorative and presentive Remedy, that indeed it needs no further indi

HOW IT OPERATES.

The effect of the Swedish Bitters directs itself, in he first place, to the nerves of the digestive organs throughout their entire extent, but mainly to the stemach and the visceral tract. It normalises their rom indigestion.

Second. Produce an active condition of existing irregularities or removes obstructions and increased Kidneys without depleting the retentions of all kind, or stope Diarrhoss, Dysentery, Liver and Kidneys without depleting the system.

Third, Supply or aid nature in furnishing the drain of some of the component parts that compose healthy fluids.

We from thousands who have been cured, the scidly, the burning, nauses, and pains of the stothe acidity, the oursing, anases, and assest the so-mach, improves its digestive faculities, and is an ex-cellent Prophylactic and remedy against nervous lrst tability, Flatniency, Cholic, Worms, Dropsy, &. It taken in double doses, it operates as a sure aperious, but in a mild and painless way.

In consequence of these qualities of the Swelish Bitters it has become one of the most celebrated remadies against diseases of the organs contained in the abdomen, and of affections that befall mankind in nce of said diseases. Thus the Swedish Bix consequence of said diseases. Tous its sweller has an unsurpassed renown for curing Liver Complaints of long standing, Jaundice, Dyspepsis, Disorders of the Spiece, of the Pancreas, of the Messrate Glands, and also disorders of the Kidneys, of the Urinary and Sexual-Organs. Besides these the Sws. dish Bitters cures those innumerable nervous, or congestive affections and diseases, which originate from said abdomina disturbances, as:-Congestion of the Lungs, the Heart, and the Brains, Coughs, Astima, Headache, Neuralgia, in different parts of the body, Chlorosis, Internal Hemorrhoids and Piles, Gout, Dropsy, General Debility, Hypochondrians, Meias-choly, &c., &c. Of great benefit the Swedish Bitters has also been found in the beginning of Gastrie and ermittent Fevers.

But this is only one side of its inestimable power of protecting those who use it regularly against all miaematic and epidemic diseases. The Swedish Sitters has by long experience in many thousand cases main-ained its great renown of being the most reliable

wars by French and English physicians, who by prescribing the same to their respective troops, suo

DIRECTIONS

Persons given to sedentary life should use the their want of exercise in open air, and keep them in good health and good spirits.

To the Ladies the Swedish Bitters must espec ally be recommended. Because its use contributes mosessentially to preserve the regularity of the physicio gical functions, peculiar to the delicate female con-stitution and thus proves an effectual barrier against those innumerable Nervous and Blood Diseases, which now a days have grown so frequent as to be taken by

But the Swedish Bitters does not only secure good health; it also effects the full developm female body, and of its beauty by perfect for fine complection and color. nale body, and of its beauty by perfect forms and Thus the Swedish Bitters has become one of the

COSMETIC AND TOILET ARTICLES Farmers and their families, who have tried Swedish Bitters, prefer it to all similar articles. For them it proves benedicial in various ways.

In Summer, when their calling requires them to ficiently cautious in satisfying their burning thirs' by water, or in eating fruit not yet ripe, &c. Thus farming people are very liable to suffer from sun stroks, Fever, Dysentery, Cholera, &c., &c. The regular use of the Swedish Bitters makes these dangerous induences all harmless.

In Winter, during the time of rest, many country people, trying to indemnify themselves for past pri-vations are very apt to often overload their stomachs and thus impair their digestive organs—the roots of the tree. The use of the dwedish Bitters provents diseases from that causa.

As a matter of course, in case of sickness, the pa-tient should avoid food not agreeing with him or such, as is known, to be difficult to digest or unsuit-able to the disease in question.

The rule: "Be moderate in all you eat, drink or do," is strictly to be observed. HOW TO TAKE SWEDISH BITTERS

The Swedish Bitters shall only be taken in the absence of inflammatory symptoms. Grown persons take one tablespoonful three times

Persons under 20 years, two-thirds of that quantity " 15 " one-half " "

Children from 6 years upwards, one-eighth of the quantity. Persons accustomed to thew tobacco, should shstain from it as much as possible, while using Swe-dish Bitters; they may substitute some flowers of

chammemile or root of calamus, but then swallow the salvia, instead of spitting it away. In the same way Persons afflicted with dyspepsia must not est hos-bread or cakes, or fator salt meats, but should take moderate exercise in free air voiding all sudden chan-

gos of temperature, all intemperance in eating and drinking, and all undue mental excitement, by which they will contribute largely to the effectiveness of the Swedish Bitters.

N. H.—Should the Swedish Bitters not suit all tastes It may be taken with some sugar, or can be diluted with some sugar-water or syrup. Having acquired by purchase the recipe and the ex-

fusive right of preparing the Only Gennine Swedish Bitters, heretofore prepared by Eugene Schoening, late U. S. Army Surgeon, we have, in order to frus-trate fraud and deception, the name of E. Schoening burnt into the glass of each bottle and the envelope around it marked by E. Schoening's and by our own name. Forties without these marks are spurious.
