Early in September I cut them before frost and used the used for the purpose of adulterating stalks to roof my stable, thinking they were good for nothing ease; but I found it were difficult to the purpose of adulterating beer, and yet the opinion of chemists has been that such sugar is not ferit very difficult to keep my horse from mentable. Glycyrrhizin is a glycoside, eating himself out doors. He would which, on boiling with acids, decomleave corn and hay for these stalks. I poses into glycyrretin and sugar. Even think I had about fifty bushels on the after boiling it with water, sugar may one quarter acre; but they were very small, which made it tedious gathering them. I think they were too thick. I have planted again this year. Top the stalks once or twice during the season, alcohol was found in large quantity by to make them "stocky," cut before frost; means of the well known reaction conshock like corn; when cured, stack and verting it into iodoform. During the

roots of tubers will grow all winter, when the ground is not frozen. Dig in the spring, or turn your hogs in to dig them for you. They are choice feed for milch cows, and coming as they do early in the spring, when succulent food is scarce, help the yield of butter.

orchard should be in good condition, lacquered and covered with mother of-and especially well drained. Any soil pearl, in pieces facsimiles of those made plant trees in. If the ground has been occupied by a hoed crop the season previous to setting out the trees it will be colored black with India ink. The artian advantage. Of greater utility still cles are covered with several layers of this will it be to have the orchard deeply substance, upon which, while still wet, with a little pepper and salt, short an arrange of the second salt, short and the second salt, short and the second salt short and the second plowed and sub-soiled, both the season previous and just before planting, and inlaid. Drying in a furnace follows, into a fine filth. Where the gromnd is more drying, and smoothing with not naturally fertile enough, some ferpounce. These operations are repeated tilizer must be used. There is nothing until the surfaces are perfectly better than good barn-yard manure, and smooth, when a final polish is given well-rotted, or a thoroughly decomposed with tripoli. compost; and nothing worse than green

GUTTA PERCHA FILLING FOR HORSES FEET.—Gutta percha has proved the best thing yet discovered to keep horses from belling with snow and preventing accidents. The kind that is sold in thin, wide strips, is considered the best. It takes about a pound and a half to fill the fore feet of a horse, and it costs two dollars a pound. When a horse's feet of saitpeter and cherry tree charcoal, made by L. Ritter at Hamm, 3 units; buttoned glove. The articles come in

two inches long, and pours boiling purposes on account of the pyrites it water over it; lets it stand until cooled to about the heat of milk from the cow, when the tea is given to the calf and being useless in metallurgy, it is sold the hay to the cow. Both calf and cow for about 2; cents per bushel, and is thrive on their feed. We have fed a even burnt to prevent its cumbering the great deal of hay tea to calves, with good ground near the mines.

these holes places an inclined trough ware for dyeing and painting browns on made of two narrow boards, which conception. He mordants with tin, and manure pile. After the removal of the beck.

Scientific.

THE OCCURRENCE AND USE OF NICKEL prominent varieties of poultry—five —Nickel was discovered by Cronstedt in 1751. In color it is between a yelare the Brahmas, Cochins, Dorkings, lowish white and a steel gray; it has are the Brahmas, Cochins, Dorkings, lowish white and a steel gray; it has Game and Malay; the non-sitters are the Spanish, Hamburg, Poland, Hondan Creve Cœur and La Fleche. Some poultry fanciers prefer sitters and others non sitters; and from these varieties of the two classes every one can select according to their own taste. Here we good as piers to get all the Hens are as good as pigs to eat all the rare, being generally found combined with arsenic. The following statistics when cracked to the size of corn. They

therefore, added to the refuse of the table, is just the kind of food they require. When running at large the worth over \$290,000: in 1870, 463 tons, worth \$400,000. This quantity was biddies pick up gravel stonea, pieces of bones, clam 22d oyster shell, old mor-tar, and whatever contains lime; which tar, and whatever contains lime; which is essential to the formation of eggshells; and if confined in a yard they will require that these be furnished to worth \$96,177. Austria produced but a very little in 1870, her nickel, cobalt of the corner stone of all noble character.

The corner stone of all noble character is essential to the formation of eggwas only 62 cwt., worth \$366. Saxony than prosperity and happiness, to be come the ministers of grace and perfect ness to the aspiring, resolute, patient soul.

The corner stone of all noble character is near tweether in the first of will require that these be furnished to them. Pounded bones, or clam or oyster shells they will devour with great woracity; and if the coal ashes are emptied in their yard, they will revel in them, picking and eating all the calcarious substances they can find.

In addition to the essential quality of albumen required in the organism of the fowl, the laying hen requires an extra amount for the formation of eggs—the white of the hen's eggs being about twelve per cent. of albumen, and this must be furnished in her feed. By referring to the chemical analysis of the different kinds of grains, it will be seen that contains a larger amount of fatty substances, while wheat contains a larger amount of fatty substances, while wheat contains a larger amount of albumen.

EFFECT OF BEEF TEA.-In an article in one of the popular London journals, Dr. Kimmerich ascribes the effect of salts which it contains, and concerning which it is well known that if given in cles of food, forming not only the chief sour into the hole after it is made, and before it is soaked away set in the plant ingredients of the salts of every sort of flesh, including that of fish, but like ARTICHORES AS STOCK FOOD.—A correspondent of the Kansas Farmer re-is no other remedy in the whole rich lates the following experience with arti-storehouse of medicine, which can I planted about one-fourth acre with the deceased organism as repeated

GLYCYRRHIZIN, OR LIQUORICE JUICE. snock like corn; when cured, stack and cut them in machine, mix with bran, steam or cook them if convenient.

I think they will furnish a large amount of valuable feed. I think the disagreeable taste of some German beers is doubtless owing to this body.

JAPAN LACQUER.—It has been gene rally supposed that the beauty of Japan lacquer work was due to ingredients derived from unknown plants, and that the secret was confined to the Oriental workmen. Recently, however, in Hol-Soil for Orchards.-The soil for an land, objects of art have been produced, water stagnates is unfit to in Japan. The lacquer used is prepared repeatedly harrowed to bring the soil another coat of lacquer is applied, then

> Power of Explosives. -Some experiments have been made recently in a tain the relative efficiency of powder and some of the nitro-glycerin compounds for blasting purposes. The following were the resuits obtained:

Ordinary saltpeter gunpowder, 1 unit dollars a pound. When a horse's feet are stuffed with gutta percha it gives him a good foothold, and he lifts his feet free from snow. Melt the article feet free from snow. Melt the feet free from snow. Melt the article feet free from snow. Melt the feet from snow. Melt the feet from snow. Melt the feet free from snow. DYEING WITH MAHOGANY SAWDUST .-A CORRESPONDENT of The Main Faamer A Mr. C. Dreyfuss, a correspondent of the Farber Zeitung residing in England, behind his cattle in stable, and under has patented manogany sawdust as a has patented manogany sawdust as a ducts the liquid manure to the solid uses a little lime and glue in the dye

manure pile. After the removal of the solid manure, he places muck under the end of the trough, and it becomes so thoroughly saturated as to make a good fertilizer.

New Hor Water Funnel.—This consists of a tin funnel, with a perforated rubber stopper in the neck, through through which the glass funnel is passed; the whole is covered with thick felt; the space between the glass and tin funnel is filled with hot water.

New Hor Water Funnel.—This consists of a tin funnel, with a perforated rubber stopper in the neck, through through which the glass funnel is passed; the whole is covered with thick felt; the space between the glass and tin funnel is filled with hot water.

equally potent. "Thought and affliction, passion, hell itself, she turns to favor and to prettiness," said Laertes "O Lawd; we know dy long suf'rin

contains a larger amount of albumen than say other kind of grain. To fatten hens, therefore, feed corn. To procure eggs feed wheat, meat, cabbage, apples and thick milk. The milk not only serves to moisten the food, but also contributes albumen, which goes to the formation of the egg. Many persons seem to suppose that domestic fowls need no food but corn, in one form or another. But it should be considered that "feed" manufactured at Berlin, Altean, Iser that "feed" means the material for supporting the frame of the bird and furnishing material for the egg, and to manufacture these they must have the raw material. All animals consume more or less of lime; it is one principal places for its production. The month ones, but the hen needs an extra supply for the eggs.

TRANSPLANTING.—Transplanting cabbage, tornato, and tobacco plants, is often carelessly done, and great losses are sustained in consequence. A few hours' evosure of the plants to the sun of a plant in the converse of the plants to the sun of principal plants. The fattern is nickel. The principal centers of make and sometimes eradicated by a severe and skinifful regimen, so may faults in the claims diskilful regimen, so may faults in diskilful regimen, so may faults in assombted and sometimes eradicated by a severe possible of our about diskilful regimen, so may faults in diskilful

day's growth at least, if it does not cause the entire loss of the plants.

The plants should not be lifted from the bed, if it can be helped, till the ground and the holes are prepared to receive them. It is a capital plan if the soil is not already very moist from rain, hour or two before lifting. It will be marked price of German silver.

coins, the new German coinage law presentate, should be laid away against the day of trial solid bars and bullion of gold, so that the "promises to pay" can all be made good, dollar for dollar. We want no inflation here; here not even "the best currency in the world" will answer the purpose. The image of our virtue must be stamped in current and the market price of German silver.

Not by accident or chance does the he cultivate art, literature, and the Twain. virtues that made for him the spotless character he wears so proudly and will

afford such assistance for regenerating the exercise of whatever is ennobling and beneficent, an old age showing the ripe fruit of integrity and honor—what higher aspiration can a human being have than to realize these in succession. The life which is lived rightly has made provision for the life that is to come, for immortality.

THE JAPAN PRIMBOSE.-The introduction of this "Queen of Primroses caused quite a sensation in England, and it is likely to be a favorite in America. As its name indicates, it comes from Japan. It blooms in April and May, and is said to be quite hardy. Sometimes the seeds do not germinate

till the second year after sowing. The plant grows to about a foot and a half high. The leaves, though larger, re-semble those of the English Primrose. The stem is odorned with several separate whorls of Magenta-colored flowers.

To BLEACH COTTON.-A very good way to bleach cotton is to soak it in way to bleach cotton is to soak it in buttermilk for a few days. Another way is to make a good suds, put from one to two tablespoonfuls of turpentine into it before putting the clothes in. Wash as usual, wringing the clothes from the boil, and drying without rinsing. By using the tablespoonfuls of turpentine in the first suds on wash-ing days it will save half the labor of rubbing, and the clothes will never be

into a stew-pan with a piece of butter and three-quarters of a pint of good oroth. Let all simmer slowly, united stir in the yolks of two well-beaten is given eggs, a teaspoonful of vinegar, or the juice of half a lemon. Stir it briskly over the fricasses into a hot dish.

THE solitaire glove-button is useful to ladies who, by accident or intention, buy gloves that are too small for their hands. This button has a shank that passes through the first button-hole, draws it nearer to the button it cannot meet, and the solitaire is then booked of force; extra best powder, with excess over the glove-button, thus improving

soft putty are excellent traps for ants.
Lsy them around where they most frequent, and as soon as the lumps are stuck full of them, work the putty over ants and all, and reset the same lump as a trap again.

FRENCH CARR. -Two cups of sugar, one-half cup of butter, three eggs, one cup of milk, three and one-half cups of flour, one nutmeg, two teaspoonfuls of cream of tartar, and one teaspoonful of

LAMB. - Lamb should be roasted until the gravy that drops is white; the fore-quarters are the best for a rosst; the leg is good broiled or rossted; two

Humorous.

Character.—From the cradle to the grave the character of an individual, like his body, is undergoing constant changes. It grows, it develops, it matures, it ripens, until the frost of death gives it the fixedness of marble; when his work was over, to retire to his cabin, and devote himself to worther at the tree falls of it shall be. then as the tree falls so it shall lie.

Character, like stature, temperament, tendency, is to a great extent inherited.

Parents outline their children before white and black, and old Isaac's earnest their birth, and herein is a thought that and frequent announcements that he should give many a parent food for re- was always ready to meet his 'Lawd' dection.

Great as is the influence of various cally boys concluded to have a little circumstances in molding character, the fun, and at the same time test Issae's influence of one's own will may be faith. One night, therefore, while old

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges the Sierra Nevada mountains of Califor nia, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked. "What is the cause of the unparalleled success of VINEGAR BIT-TERS?" Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great blood purifier and a life-giving principle a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine becompounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Toule, reheving Congestion of 'man ration of the Liver and Visc rai Organs, in Billion

The properties of DR. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretic. Carminative, Nutritious, Lavative, Diaretic Sedative, Counter-Britant, Sudoritic, Altern

Grateful Thousands proclaim VIN EGAR BITTERS the most wonderful In vigorant that ever sustained the sinking

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond

Bilious, Remittent and Intermittent Fevers, which are so prevalent in the vaneys of our great rivers throughout the United States, especially those of the Mississton, Ohio, Missouri Illinois, Tennessee, Cumberland, Arkan sas, Red, Colorado, Brazos, Rio Grande Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derang ments or the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to DR. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the darkolored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy

functions of the digestive organs. Fortify the body against disease by purifying all its fluids with VINEGAR BITTEES. No epidemic can take hold

of a system thus fore-armed. Dyspepsia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, many have attempted to make a TAR pro toms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee

> Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old ores, Eruptions of the Skin, Sore Eye In these, as in all other constitutional Dis-eases, Walker's Vingar Birrens have shown their great curative powers in the

most obstinate and intractable custes For Inflammatory and Chronic teretoit Rheumatism, Gout. Bilions, Remit- Persons given to sedentary life should : tent and Intermittent Fevers, Diseases of the Swellah States. A will sentralize the bad of the Blood Liver. Killneys and Bladder. the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases, - Persons en-

For Skin Diseases, Eruptions, Tet- labeltance. ter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carlonneles, Ring worms, Scald-hend, Sore Eves, Erysipelas, Itch Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms. lurking in the system of so many thousands are effectually destroyed and removed. No system of medicine, no vermifuges, no an-thelminities will free the system from wormlike these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of wo manhood, or the turn of life, these Tonis Bitters display so decided an influence that Cleanse the Vitiated Blood when-

ever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores. sluggish in the vems; cleanse it when it a foul; your feelings will tell you when. Keep the blood pure, and the health of the syster.
