judgment is required, and nerve difficient to execute its commands. When the time arrives for thinning out fruit, it must be done. We know that excessive production is always at the expense of both quantity and quality, I may venture to describe it as the and often results in seriously impairing the vitality of the tree. One-half the trees which bear fruit every year would be benefited by one half of the fruit taken off as soon as it is well set; and the overbearing of a tree will in a few

fruit as much as it should be. As a rule, the fruit should be thinned out so It is this wenderful softness, comthat, when fully grown they will not bined with persistent solidity, that touch each other. Indeed, it would enables us to smear it over any other

honey sold in bottles is composed as beaves the mill, passes over sieges, on when ripe, cover them with batter, and follows: Cane or sugar is melted in which the germs, hulls, etc., are refry on a griddle, like other cakes. They a decoction of slippery elm bark in tained, while the starch and soap pass water. Some manufacturers use through, and flow over large, inclined instead of elm, a solution of gum arabic surfaces, upon which the starch settles and starch, to give it consistency and and the didnte soap solution collects in save sugar; but this last does not recisters. The starch is then washed semble honey so much when dropped, with pure water in cisterns, again passed as it lacks the stringy appearance. These mixtures with or without the addition of a little cheap Cuban honey, are flavored with essence, and the mess is ready for sale. The best way to obtained from the dilute solution, and the germs, etc., can be utilized in To Make Currings Grow .- A cor-

respondent of the Western Farmer it in the ground. Every slip sprouted abundant quantity of ozone. For a and turn the fricassee into a hot dish, and grew well all summer, with one or two exceptions. The idea of putting the to use about two tablespoonfuls of the can be previously rubbed with one.

diameter, extract the contents, and, of the oxidizing effects of the ozone, after it is thoroughly clear inside, fill it with powered slacked lime, tamping it in order to make it contain as much as possible. After it is full, seal it up with plaster of Paris, and you have a nest egg which cannot be distinguished by the hen from the other eggs, and one which will not crack (like other eggs) by being frozen.

Fossils of the Departed—A Germentation ceases; cork it tight, and by self-tight, and by self-tight, and leather; their stockings were of thread, cotton, muslin, yarn. linen, worstell, and their shoes were of cloth, cashing the dead, which is at least free from the objections urged against one which will not crack (like other eggs) by being frozen.

Fossils of the Departed—A Germentation ceases; cork it tight, and by self-tight, and leather; their stockings were of thread, cotton, muslin, yarn. linen, worstell, and their shoes were of cloth, cashing the dead, which is at least free from the objections urged against burial, while it does no violence to the feelings which naturally should be approximately and the cask daily until fer mentation ceases; cork it tight, and by also.

A Passlex manufacturer got, by some accident, a severe cut across the nose, and having no court-plaster at hand, stuck on his unfortunate organ one of linen, cambric, taffeta, free of the cask daily until fer mentation ceases; cork it tight, and by also.

A Passlex manufacturer got, by some accident, a severe cut across the nose, and having no court-plaster at hand, stuck on his unfortunate organ one of linen, cambric, taffeta, free of cloth, and therefore, and there shoes were of cloth, and leather; their stockings were of thread, cotton, muslin, yarn. linen, worstell, and leather; their stockings were of the passible.

A Passlex manufacturer got, by some accident, a severe cut across the nose, and having no court-plaster at hand, stuck on his unfortunate organ one of linen, cambric, taffeta, beat at the passible and the cask daily until fer the passible.

Among feathered creatures, the eagle, the raven, the swan and parrot are centerains. On the Thames they annually "nick" the swans of the "Vintners' Company," under whose keeping they have been for five centuries, and find some swans have lived one hundred and fifty years.

In Les Mondes, states that the disagree-to able rasping to peculiar to some the way to clean a stained steel knife, is to cut a solid potato in two, dip one of the pieces in knife-cleaning), and rub the blade with fifty years.

A widower compares marriage to a besieged fortress. Those who are outside would like to be within and those who are within would like to be within and those who are within would like to be within and those who are within would like to be within and those with out.

Now mind your P's and Q's—that is also of the piece of wax.

32. All persons who have to perform long and and labor, and white doing it are often exposed audden changes of temper-ture, or the draft or sir, fall to nos the Swedish Bitters, as a few drops of it, added to their drink, are sufficient to preserve them to inestimable health and vigor. Those whe Dr. J. Walker's California Vinare accustomed to drink les water during the commer, should never emit to add some Swedish bis terezoit. PR. Persons given to redectary life abould see the Sierra Nevada mountains of Califor the Swelfish Bitters A will neutralize the bed e nia, the medicinal properties of which facts of their want of a zercise in open air, and keep are extracted therefrom without the use them in good health and good spirits. of Alcohol. The question is almost faily asked. "What is the cause of the unparalleled success of VINEGAR BIT-All To the Ladies the Swedish Bitters and

especially be recommended. Because its use or rens?" Our answer is, that they remove of the physiological functions, peculiar to the dellhe cause of disease, and the patient re-

eate female constitution and thus proves an efcovers his health. They are the great feetual barrier against those innumerable Servers dood purifler and a life-giving principle, and Blood Diseases, which now-a days have grown so frequent, as to be taken by many for Eve's nat a perfect Renovator and Invigorator of the system. Never before in the inheditance. But the Swedish Bitters dies not only secur compounded passering the remarkable qualities of Virkoan Bittens in healing the sick of every disease man is held to. They ened health, it also effects the full development of

the female body, and of its beauty by perfect forms and fine complection and color.

Thus the Swedish Bitters has become one of the

COSMETIC AND TOILET ARTICLES.

By Farmers and their Families, who have tried Swedish Bitters, prefer it to all similar articles For them it proves beneficial in various ways. In Summer, when their calling requires them to eften endure the intense heat of the enn, while perporming hard work, they are induced to be set sufficiently eautions in satisfying their burning thirst by water, or ta eating fruit not yet ros. Me Thus forming people are very liable to sifer from sun stroke, Favor, Dysentery, Cholers, he, he. The regular use of the Swedish Bitters make these dangerous infurnces all harmiess.

In Winter, during the time of rest, many country people, trying to indemnify themselves for past privations, are very apt to often overlead their atomache and thus impair their digastive organ-ther ets of the tree. The nes of the Swellsh Miers prevents diseases from that cause.

As a matter of course, In case of sirkness, & pattent should avoid food not agreeing with his er each, as is known, to be difficult to digest or the entitable to the case in question. The rule of mondrate in all you cal, dries or do, " is strictly to be observed.

HOW TO TAKE SWEDISH BITTERS

The Swedish Billiars shall only be taken in th absence of inflammatory symptoms. Grown persons take one tablespoonful three line der day, beforeor after meals, purs or diluted with

Parsons under Miyears, two thirds of their quantity Children from 6 years opwards, one eighth of the

quantity, Payeone accustomed to chew tobacco, should she stain from it as much us possible, while using fixed ish Bitters; they may substitute some forest of chammomile or root of calamas, but then swalls the univis, instead of spitting it away. In the same way smoking of tobacco should only moderately be practiced.

Persons amented with dyspensis must not sel bol bread or cakes, or fator sall mests but should take moderate exercise in free air wolding all saddes changes of temperature, all intemperates is eating and drinking, and all units mental excitement, by ning, and machine can be threaded without passing thread through holes.
7.— Design Simple, Ingenious, Elegant. wolch they will contribute largely to the effective. forming the stitch without the use of Cog Wheel Gears, Rotary Cams or Lever Arms, that all the Swelich Stiters and suit all Wheel Gears, Rotary Cams or Lever Arms, that all the swelich same angar, at can be

Wheel Gears, Rotary Cams or Lever Arms.
Has the Automatic Drop Feed, which insures uniform length of stitch at any speed. Has our new Thread Controller, which allows easy movement of needle-bar and prevents injury to thread.
