It is an odd thing at stronger, and keep the roots more comfirst to feel you are living out of doors with no builded home to sleep iu; but this simple fact is full of value. In our this simple fact is full of value. In our common, every-day life of house and street we practically change our climate whenever we leave or enter a house, and variety. from this, with overheating of our homes, come, I suspect, the many little colds and nasal catarrhs to which most of us are liable. The dweller in tents has no such annoyance, and far from draught to horses and the amount of the constant exposure giving rise to diseases of lung or throat, the out-door life seems to be an almost absolute in-life seems to be an almost absolute insurance against these. Yet the changes entitie calculations, tested in the stables of temperature are often enormons, but as they are always natural, and unac-finds that the rations in practice given cented by going into and out of houses. to the horse are in conformity with their lack of abruptness seems to deprive them of danger. On the north- to feed the animals so that they will not westshore of Lake Superior the midday temperature in August was often 70° to strength. The mean average weight of the bus horse is 1,800 pounds; he is the night 39° to 65°; yet, as I remem- employed four hours daily, drawing a ber, no one of a large party suffered in any way. the woods, and as soon as possible to loosen the stiffened joints by handling making will paper?" taken from the an axe.

Not only are well people better for such steady work, but cases of chronic throat-trouble, catarrhal disorder and chronic bronchitis rapidly disappear under the natural and mild treatment of what, for brevity, I have ventured to add one drachm of powdered nux call the Camp Care. I have more than vomica, and boil it with the quassia, once seen alarming coughs simply vanish after a fex nights in camp, while, on the other hand, it was a common thing among our men and officers dur ing the late war to find that a leave of absence and the exchange of tent life for house life frequently brought about colds or coughs. I well recall also a case of chronic loss of roles which for years had baffled many wise doctors, and was perfectly and permanently cured by three weeks in camp on the

subject of frequent surprise to civil sur-geons to see how speedily wounds healed when men were hving in tent hospitals, and how potent was their use in dispelling and checking the progress files from annoying horses consists in painting the inside of the ears, or any other part especially troubled, with a few drops of empyreumatic oil of jacamp upon the same quick healing of the parts so anointed. If this treatment wounds, and to see injuries which at should accomplish the alleged result, home would have sent a man to bed to it may perhaps, be equally applicable get well without the slightest annoyance and with singular rapidity. The evils which are naturally dreaded as results when passing through the woods or of camp-life have in reality no existence. meadows, -Lippincott's Magazine

How is it that girls can always tell a How is it that girls can always tell a married man from a single one? The fact is indisputable. Blackwood says that "the fact of matrimony or hatch," from foreign countries. Chickweed, that "the fact of matrimony or batchelorship is written so legibly in a man's which is a native of most parts of Europe ceal it. Everywhere there is some inexplicable instinct that tells us whether soon spread all over the country. individual (whose name, fortune,

and circumstances are totally unknown)

the smaller ants already affected by the poison, and they themselves begin to bite, and in a short time become the centers of balls of rabid ants. As these insects are one of the scourges of tropicold days; water with warm water as considerable service to agriculturists.

their legs are seized hold of b

DANGERS OF NITRO-GLYCERINE -Nitroglycerine is a thick colorless oil, and appears to be as harmless, to look at, as lard oil or petroleum. People are so ccustomed to the handling of oils of all kinds that it is almost impossible to make them realize the danger that lurks flowers than those propagated in the even in the smallest quantity of nitro-glycerine. It explodes when gently green house, from cuttings, although they will not be of any particular struck, and is ten times more powerful

as an explosive, weight for weight, than gunpowder. The other evening, in FREDING HORSES .- Professor of No Jersey City, a gentleman and lady were taking a moonlight stroll on the hights, in the vicinity of one of the shafts of the new Delaware and Lackawanna railway tunnel. The man saw on the ground the glimmer of a small tin tube, icked it up, and slapped it from one hand to the other, when a terrific ex-plosion ensued. His eyes were de-stroyed, his flesh lacerated, his limbs broken, while his lady companion was dreadfully injured. It was a discarded science and the views of the company, itro-glycerine tube, such as are used in blasting, and is supposed to have been thrown away by workmen at the tunnel It is said that osmium is the most
