of food-that is the point that gives the

break it, and not to let it cook to fast.

If the heat is about right it will be done in half an hour. Then I drain off the whey slowly, pressing down on the card until only whey enough remains in it so that the cheese will not be too dry, salt to taste, add a good lump of butter and work well with my hand, then pack it does not be adapted to and work well with my hand, then pack if the process for preparing these so-called powders (tungstons tungstates has been so improved to the preparation of them, in suitable and work well with my hand, then pack it does not be adapted to the preparation of them, in suitable demand for them will instife it.

GOLD AND VIOLET BRONZE Powden.

GOLD AND VIOLET BRONZE Powden.

The process for preparing these so-called powders (tungstons tungstates has been so improved a remove they will pound of citron add three-quarters of a pound of sugar, using only the best white, adding as many lemous as you prefer, removing the seeds or they will render the whole batch bitter; add the sugar to the liquor you boil the citron in; boil to a nice syrup; add the citron, a little at a time; when done, salt to taste, add a good lump of butter and work well with my hand, then pack if does not have a pound of sugar, using only the best white, adding as many lemous as you prefer, removing the seeds or they will render the whole batch bitter; add the sugar to the liquor you boil the citron in; boil to a nice syrup; add the citron, a little at a time; when done, salt to taste, add a good lump of butter will be done.

STARTLING.—It didn't rain for some time in a Western town, and when the fidods did descend, the editor said: "After many days of arid dessication, the vapory captains marshalled their thundering hosts and poured out upon in; boil to a nice syrup; add the citron in; boil to a nice syrup; and the pression of specific fidods did descend, the editor said: "After many days of arid dessication, the vapory captains marshalled their thundering hosts and poured out upon in; boil to a nice syrup; an I turn the edges gently that the curd of the operator.

even from one autumn until the next summer, has come into extensive use. The grapes are kept on the vine as long as possible—in France, where this device originated, to the end of October or beginning of November. Before the even from one autumn until the next needs a higher temperature. on shelves in a dry room, and there arranged so as not to fall over, this being best prevented by inserting them in as they can stand conveniently.

THE DUCHESE D' AGONULEME PEAR.—
A French noblemen, observing his tenant about to destroy a fine, thrifty year

a recent meeting of the Academy, H.
St. Claire Deville, a distinguished French chemist, offered to the gentleant about to destroy a fine, thrifty pear tree inquired the cause. He was told that it was a chance seedling, and had born no fruit in twenty years. He had already cut its roots preparatory to the first stroke, but was ordered to let it remain. He did so, and in the following year it was loaded with superb fruit of an entirely unknown variety, which at once became celebrated. The root-prusing the gardener had given it root-prusing the gardener had given it root-prusing the gardener had given it roots provided to the gentlement present a tight-corked vial containing fifteen pounds of osmium, the most deadly poison known. In a short explanation M. Deville said that twenty pounds of the metal would be sufficient to poison the entire population of the world. One thousandth part of a grain of osmic acid, set free in a volume of air of one hundred cubic yards, would possess such a deadly influence that all which at once became celebrated. The root-prusing the gardener had given it worked like a charm. For many years the persons respiring this air would be worked like a charm. For many years the persons respiring this air would be any other terms must buy it of the taker of a servant girl. "There's fifteen worked like a charm. For many years afterwards, when the Duchess of Angonearly killed. Osmic acid is so much ulence was passing through Lyons, its

novel method: After the horse is nine years old a wrinkle comes on the upper corner of the lower lip, and every year thereafter he has one well defined wrinkle for every year after nine. If, for instance, a horse has three wrinkles, he is twelve, if he has four, he is thirteen. Add the number of wrinkles to nine and you will get it.

The best apple butter is made by peeling, coring and slicing, selected sweet apples and stewing them in sweet cider. Very little of this sort of apple butter, however, comes to market. The

cider. Very little of this sort of apple butter, however, comes to market. The bulk of that sold is made from second-rate apples, peeled, sliced and stewed, and sweetened with brown sugar. A quantity of such butter is

EXPLANATION AND ELABORATION

OF WANAMAKER & BROWN'S NEW PLAN. "CASH." accounts, capital locked up, etc. To bear such losses themselves would drive them out of business.

"CASH." Therefore a per cent, is added to the price of each article sold, to cover this leakage, and Cash Buyers

whether they know it or not, really pay the bad debts and the interest on the long credits of the other customers! Fund.

By this Radical Change we shall lose some of our customers no doubt, but we will gain ten when

CASH THROUGHOUT. Bring Money for Clothing, and we will supply it at prices possible under no other plan.

The fairness of this feature of our plan all will praise. It is simply treating all alike exacting nothing from indisposition to bargain or ignorance, and, at the same time, conceding all that shrewdness on the shrewdest customer's part could possibly extort, because the "One Price" which we mark on our goods, shall invariably be NOT the "First" Price, but the LAST and LOWEST PRICE.

NOT the "TOP" Price, but the VERY BOTTOM PRICE. In other words, Salesmen or "Headmen," have never been allowed, under ordinary circumstances, to fall below a certain figure! It is at that, or at a lower figure that we now determine to mark our goods, calculating the cost to the exact penny, and fixing the price at the low minimum profit on which business on a large scale can be conducted.

We know that the larger business we aim for and anticipate, will require a large increase in the number of customers, and we shall therefore see to it that the "One Price" is based on the Smallest Profit, calculated to the exact and lowest penny, which will not be difficult to do with universal Cash Payment for the rule. The price will be marked in plain figures and no alteration allowed.

NOTE.—Whenever the extremeles of the season, the state of trade, or the money market may demand, the right is reserved to go through stock before or after histness hours and mark down any lot or lots of goods, changing the figures on off the labels, so that the new rates the same to all, and all buy affect at the mark down prices. WANAMAKER & BROWN WILL NEVER HOLD THEIR GOODS.

A printed Guarantee, bearing the signature of our firm, will accompany each garment as a

GUARANTEE. 1st. That the prices of our goods shall be as low as the same quality of material and manufacture are sold anywhere in the United States. We hereby guarantee 2d. That the prices are precisely the same to everybody for same quality, on same day of purchase.

3d. That the quality of goods is as represented on printed labels.

4th. That the full amount of each pend will be refunded, if enstoners find the articles unsatisfactory, and return them names and varioused within 10 days of date of purchase.

[Signed,] WANAMAKER & BROWN, OAK HALL. Sixth and Market Streets, Phila

THE ADVANTAGES cident to a system having for its cardinal points these which we have now explained, are simply innumerable. Saving of time and temper, perfect security sence of all buckstering &c., &c., &c., &c. But above all this IT MAKES CLOTHING CHEAP

Sinking the prices everal degrees below what they have been heretofore, or could possibly be under the old system.

By dispensing with certain cierks no longer needed, it reduces "Store Expenses.

By enforcing CASH Payments, the had debts are avoided.

By putting plenty of ready money in hand, it enables us to buy goods at figures that credit men know nothing about.

By increase of sales, a smaller profit on each article is sufficient.

All of these "By-Ways" lead direct to

CHEAPNESS. SOME OTHER THINGS

Wherein our plan differs from others:

(a) It combines all the good points which exist, seperately, or in partial combinations, and it adds some new and important features.

(b) It gives such a guarantee as no house in the world, to our knowledge, ever ventured to give as a rule.

(c) It makes our goods equivalent to checks on a bank, wherever they are presented inworn or uninjured.

(d) It has the greatest advantage of an immense business already established, to sustain the "New Constitution," and under no other circumstances could so many radical concessions to customers be made.

We have for years been working towards the present point, and though naturally falling into the current methods of trade, we observed and noted the defects of the old systems, and have been carefully weighing for a long time these newer plans, and preparing for this

ENTIRE CHANCE OF BASE.

We now, swing clear of all combinations or customs, and burn the bridges behind us.

Investigation is asked into all we have here put forth.
