Lungs. A vast tri-

throughout this and other countries, has above that it does surely and effectually control them. The testimony of our best cisinets, of all classes, establishes the fact, that Cherker Pictronal will and does relieve and cure the afflicting disorders of the Threat and Lungs beyond my other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; mil cases of Consumption, curel by this preparation, are publicly known, so remarkable as hardir to be believed, were they not proven beyond dispute. As a remely it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most secution. Every family should keep it on hand as a protection against the early and unperceived attacks of Pulmonary Affections, which are easily met at first, but which become incursible, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing discress which best the Throat and Chest of childhood, Cherrer Pecrosas, is invaluable; for, by its timely use, milltindes are received from premating grayes, and saved to the love and affection centred on them. It acts specifilly and surely against ordinary colds, securing sound and graves, and the second second and surely against ordinary crids, securing sound and health-restoring sleep. No one will suffer troublesome influence and painful Broughitte, when they know how easily they can
