

TERMS.
Subscription, \$1.00 per annum, if paid in advance; \$2.00 if not paid within 12 months.
Transient advertisements inserted at 50 cents per inch for each insertion.
Residence notices in local columns, 10 cents per line for each insertion.
Advertisements will be made to order, or by advertisement in the city, half or quarter year.

PENN'A. R. R. TIME TABLE.
On and after Monday, June 23rd, 1877, passenger trains will leave Millville Station, P. R. R., as follows:

EASTWARD.
Philadelphia, daily except Sunday 12:54 p.m. P. R. R. Express, daily, Monday, 10:10 a.m. to Millville, daily except Sunday, 8:30 p.m. Philadelphia Express, daily except Sunday, 8:10 p.m.
WESTWARD.
P. R. R. Express, daily except Sunday 12:54 p.m. Philadelphia Express, daily, Monday, 10:10 a.m. to Millville, daily except Sunday, 8:30 p.m. Philadelphia Express, daily except Sunday, 8:10 p.m.

LOCAL INTELLIGENCE.

State stories in mail-order.
A clear and beautiful Saturday.
A cloudy and rainy Sunday.
Gold, 10 3/4; greenback dollar, 98 cents.
It is a common remark that the days are getting longer.
The coal combination has been satisfactorily arranged between the parties.
Gen. McClellan was inaugurated Governor of New Jersey on the 15th inst.

Miss Mary Kunner has bought the three Atlas houses on Third street. Price paid \$2,400.
If you wish to rent a house about seven miles in the country, call at this office and learn from whom to rent.
A couple of Fayette township men have been arrested and fined for shooting wild turkeys out of season.
The Blue Glass theory is agitating England and Germany. It does not trouble the people of this country now.

The Lord's Supper will be administered in the Presbyterian church in this place, next Sabbath a week.
Six hundred dollars will buy a house and lot in this borough. For further information call at this office.
The small-pox closed churches, Sabbath schools, public schools, and brought business almost to a stand-still in Hopedale.

The common schools were adjourned on Friday, so as to give the pupils and teachers time to attend the convention of the Legislature.
On the evening of the 15th inst., the house of Jacob Truckey, of Marysville, was destroyed by fire which the family was at church.
The meetings in the Presbyterian and Lutheran churches last week were well attended. The meeting in the Lutheran church is still in progress.

The people look with distrust upon all measures that propose to pay in silver, U. S. securities that were promised to redeemed in gold.
A child of Mr. Cargill, who died of small pox, in Patterson, died of the same disease, and was buried in Union Cemetery on last Wednesday.
After sixteen years continuous service on the bench Judge Sterrett has returned to the bar. He will be associated with the law firm of Kennedy & Doty, Pittsburg.

A large mail collected at the Millville Post office on Saturday and Monday, in consequence of the through mail falling to take the mail from this place. Give us mail on way trains.
Mrs. Banks and Elder vacated the Patterson public schools last week. It is better to do that than have one case in the place that will have to be supported by the Borough.

"Mr. Moody thinks good works will not save a man. He thinks if a man got to heaven by his good deeds, there would be no living there with him, an account of his egotism and continual self-satisfaction."
The Philadelphia Ledger says—"the man who drinks" habitually and to excess, is granted too many privileges by custom and by criminal courts. And we fancy there are few who will gild the Ledger in this assertion.
Last Thursday the mail agents on the cars did not take on or drop off such mail as was due this place from the East and West in the afternoon. A number of the agents should be put out of the places they occupy. "Whose pets are they?" is being asked.

The consideration of an important lawsuit was postponed in Judge Junkin's court last week, because the irregularities of the mails failed to carry a letter, relative to the case, to the office of the lawyers to a colleague in an adjoining county. The fact that delivery in the country disarranges all kinds of business. Give us mail on way trains.
The earnings of last week in the village did not drop heavily. A number of places were up to instruct, profit and amuse all who wished to be instructed, profited or amused. The Froysterians and Ladies Aid societies held services every evening. The "Maidens" gave an entertainment in the Hall. The Sheriff's sale attracted crowds, and the Liberator held the largest convention known in the history of the Society.

An amusing incident took place last Friday afternoon in the Court House. Judge Junkin, out of compliment to the Literary Societies of this county, allowed them to use the main court room on the day designated, while he retired to the Orphan's Court room, and there held court. After dinner, about the time court begins its session, the Judge gravitated to the room where the societies were transacting business, and there sat quite a while, enjoying, only, so versatile a man as he can enjoy, entertainments of the Liberator. Meanwhile down in the Orphan's Court room, sat, stood, and walked the restless attorneys. Occasionally an exclamation such as, "Where in the world is the Judge?" "Ring the bell another time," "Must we stay here till night?" etc., escaped from the Legal gentlemen. By and by His Honor appeared, all the fresher, to listen to the keen arguments of opposing attorneys, after the brief period of recreation up-stairs.

Adjourned Court Proceedings.
Reported by E. F. Hoffinger, for the Sentinel and Republican.
FRIDAY, JANUARY 18, 1878.
Judge Junkin and Elder occupied the Bench. Court was held in the Orphan's Court Room, the Literary Convention occupying the large room upstairs.
Lindolf et al. vs. Matherbaugh et al. (Loan Association case). Motion for a new trial, continued until the 21st of Monday of February next.

John N. Moore et al. vs. Ezra D. Parker et al. (Presbyterian church case). Exception to answer of respondents. Argued and held for consideration. A replication to the answer was also filed, and it was agreed that Judge Junkin should select a Master to hear the case. The disposal of the Quo Warranto was held over, it being contended by counsel for defendants that the Equity case would decide both questions.
Simon Munnich vs. Overseers of Fayette township. Exceptions to bill of costs. Overruled.

Overseers of Walker vs. Overseers of Bedie. Exceptions to the opinion of the Court. Exceptions overruled, and bill set aside.
John Beckman vs. George Jacobs et al. (Junata Valley Bank case). Issue to answer interrogatories. And now, 18th Jan., 1878, defendants answered. From answering more fully than they are already doing.
B. R. H. Bealor vs. J. C. Gilliam et al.—Robert Hoffman, Esq., was appointed Master.

Isaac McClean vs. John Beckman, Lydia Hoffman et al. Plaintiff to submit a statement of the partnership account to counsel of second defendant against Feb., 1878.
Almon and Snicker vs. J. B. M. Todd. Motion for a new trial. Trial discharged.
Edward M. Hibbs vs. William G. Thompson. Rule for security for costs granted and proceedings stayed until rule is dissolved.

Catherine Alexander vs. Richard Doyle. Petition to dissolve estrangement. Rule granted to show cause.
J. W. Langston, for use of G. W. Jacobs, vs. Borough of Fort Perry. Mandamus granted to compel payment of judgment out of money in borough Treasury or out of the first moneys received for the use of the Borough.
The petition of John Kepner et al., praying for a rule on the Borough of Fort Perry to show cause why the decree of the Court of Quarter Sessions, enjoining the boundaries of said borough should not be vacated, rule granted as prayed for, returnable first Monday in February. It is the resolution of the borough authorities consent, the error may be amended in an amended decree.
In the Orphan's Court.
Guardian's account of J. P. Hoffinger. Exceptions to Auditor Report. Argued and held for consideration.
Estate of Nancy Kaufman, dec'd. Exceptions to Auditor's Report. Argued and held for consideration.
Estate of Robert C. Gallaher, deceased. Exceptions to Auditor's Report. Argued and held for consideration.
The petition of George Bellinger for relief from the rights of Catherine Swartz against Henry Leiter and for an attachment. Rule granted on Henry Leiter to show cause.
Court adjourned at 5:30 p. m.

William Egloff's horse ran away on Friday morning, from a wagon-maker's shop, where he had been stationed, with the exception of hitching him to a coal wagon. The horse ran on to East Point, in the direction of McLintock's.

Philadelphia Markets on Saturday, Jan. 18, 1878.—Wheat, Penna. red \$1.80-1.81, Cash 50c, Oats 50c-51c, Rye 75c-76c, Coffee 10c, Sugar 10c, Butter 12c-13c, Eggs, fresh, 12c, Live Chickens, Ducks and Turkeys 12c, Hens, Timmity, \$1.00, Hye Straw \$1.10-1.12, Oats Straw \$1.00-1.02, Wheat Straw \$1.00, Cloverseed 60c-62c per lb., Call-corns 40c-42c per lb., Freshed Upper 16c-20c, Nails \$2.40-2.50 per keg, Potatoes 30c-35c, Onions \$1.25-1.30, Apples \$1.50-1.60 per bush.

India.
As far back in point of time as human knowledge goes, India has been an attractive country. It has been the focal point that great conquerors aimed at. The acquisition of possessions in India, in early days, was looked upon as the certain possession of great wealth. To-day it is no less an object of interest than it was thousands of years ago. King Sensostris, the prince who succeeded the Pharaohs, who was driven in the last Sea in his chase to bring back the 2,000,000 tunicary Jew Slaves, made an effort to secure possessions in India. He succeeded an Egyptian army into India, and held possessions there and enjoyed the revenues therefrom till he died. From his day to this day great conquerors and great nations have coveted the wealth of that country. The Greeks held possessions in India, and enjoyed revenues therefrom. The Romans considered it one of the wealthiest of places, and sent their conquering legions there to enrich Roman coffers. To-day England, Russia, and other great European powers are struggling for possessions in India. A country and people with such past and present history cannot fail to impress the minds of all people of this intelligent country with great interest. The rich men who have leased and traded there and see the most wonderful of countries; but the smaller percentage of men have riches and riches. The larger percentage have neither riches or talents; they must content themselves with in fortune relative to India as they can get. Fortunately, in this day and generation, and particularly in this new country, people may learn of India without the aids of wealth or leisure. The country and its peculiarities are brought to our very doors, through the aid of the Press, the aid of the Lecturer, and the aid of the Stereopticon, by which one may read and hear and see almost as if in India.

An opportunity will be presented to the people of Mifflintown and vicinity to hear of that far away country, and see what it looks like, by the aid of the Stereopticon, on Monday Evening, January 28, 1878, on which occasion the Rev. C. H. NEWTON, recently returned from India, will deliver a Lecture and exhibit a large number of photographic views of that country by means of the Stereopticon, with Calumet Light, in the Presbyterian church. These Pictures, comprising scenes from Nature, Life and Art, never fail to interest and delight the spectator, while they also afford useful information. Attend the Lecture, and learn for a quarter, what has cost many people months of travel and hundreds of dollars.

The exercises of the afternoon session were introduced with music by the Patterson Literary Society. His Honor Judge Junkin being present, was invited to address the convention, and responded by wishing the association success and expressing the hope that it would receive the support it deserved. His remarks were followed by the regular exercises of the afternoon, as follows: Reading of the *Last Creek Echo*, by the Editor of Cuba Literary Society, S. W. Allen.
Declaration, by W. A. Rodgers.
Music, by Cuba Literary Society.
Select Reading, by I. G. Marks.
Essay, by J. C. Meyer.
Instrumental Music, by Professor Smith.
Declaration, by A. D. Vandyle.
Essay, by Miss Kate Gingham.
Music, by Centreville Literary Society.
Declaration, by Miss Leona Lemon.
Reading of *Patterson Literary Review*, by the Editors, Miss C. V. Danglerly.
Oration, by E. O. Kreider.
The following named persons were then selected as officers for the ensuing year: President, H. T. D. Garman; Vice President, David S. Funk; Secretary, E. O. Kreider; Assistant Secretary, Annie B. Curran; Treasurer, Dr. I. N. Grubb.
After the granting of some orders, the convention adjourned to meet at 7 o'clock.

Reading of Delaware Literary Review, by the Editor, John Brown (N. S. Henkle).
We would like to notice more fully each performance of the evening, did space permit. To the credit of every performer be it said, there was not a single failure, and this statement will apply to every performance of the evening. Among the more prominent exercises of the evening were the reading of Miss Hamilton, the declamation of Miss Danglerly, and the paper read by John Brown. Of the last performance we are only expressing the general verdict when we say, good, very good. As a humorist, John Brown is a success. We have intentionally omitted special notice of the four orations delivered before the convention, as they are entitled to more than a passing notice.
We were pleased to notice the fact that our County Superintendent, J. M. Garman, who is ever in the van in educational work was present every session, and took an active interest.
The following resolutions were adopted:
Resolved, That the thanks of this Association be due to B. F. Schaefer, of the Junata Valley Bank, for publishing notices of the convention gratis.
Resolved, That a vote of thanks be tendered the Junata County Commissioners, for the use of the Court House.
Resolved, That the thanks of this Convention be due to the Methodist church, for the use of their organ.
Resolved, That we are under obligations to the citizens of Mifflintown and Patterson for their hospitality and generous aid, to Mr. Byers, Paul Hamlin, Jacob Scholtz, Frank C. Van, Jas. A. Murray, Jeremiah Lyons, Esq. and W. S. North, for all in the town of contributors.
W. I. HIBBIS, Secretary.

Wheat Culture.
We have in the past few weeks been trying to show to the farmers of Junata county the importance of a new process of cultivation of wheat. The first process is to sow grain. Most artists have eight sowing boots, or show us which depth the wheat in rows of about one inch, making eight inches of ground covered between the wheels of each drill, a line of six feet or 72 inches, leaving five feet and a half of ground with nothing on.
The new plan is to scatter the grain over more ground by using less seeds and soil, and scatter the grain just two inches, which is twice the width of ground that the ordinary boot drills cast over. It will readily be seen that by adopting the new plan there will be, 11 inches between the rows of grain. The same amount of seed is sown in the new, as in the old plan, but the rows of grain are so arranged in the new plan that it may be cultivated as readily as corn. As a matter of fact the new sowing process is better. If any doubt that cultivation is not the best part of it, we are prepared to prove it by any number of experiments in the laboratory of Lancaster county that 60 bushels and 150 pounds of wheat per acre was raised last year in this county, with only the ordinary ground preparation. The peculiar scattering of the grain, and the entrenchment of the ground between the rows produced the crop. In the same field, by the old plan of raising wheat, the yield was 25 bushels and 2 pounds per acre. The above result per acre was obtained by regular survey and correct measurement, in front of which the reader is referred to E. H. Barkholder, a practical surveyor and justice of the peace, who was present at the convention. We also refer you to D. H. Leonard and George K. Reed, of Lancaster for information regarding it. We also refer you to John Messer of McAlisterville and Maria Messer of Oakland Mills Junata co., who have recently visited the farmers in Lancaster county, upon which wheat was sown by the new process, last fall and which is now growing, and presenting a promising yield for the coming harvest, they both have bought farm rights and adopted the new process. We might refer you to hundreds, but prefer making the following offer.
Having placed the matter as clearly before the people as we possibly can, we now propose to settle all doubts, that will rest the farms of Lancaster county, on which wheat sown by the new plan is growing. We will deposit an amount of money sufficient to pay all expenses, incurred in going to and coming from the farms, where the new plan has been used, and if it can be shown by such as may visit said farms that we have overstated, or mistaken the case, the money may be drawn from our deposit to pay all expenses incurred in such trip. People of a township may select 2 men, or people of a county may select 5 men, on the above terms to visit said farms, and invest our money in such a way that all their money, shall be deposited, and upon their decision the case may rest. Provided it be done within two weeks. The patent for the attachment of which we speak, was obtained by A. B. Groll of Berwyn Lancaster Co., August 28 1877. The amount of the patent is \$191.75. We caution all persons against using it without our consent.
We are now selling farm rights for the small sum of \$50.00 each, we would gladly continue this, if it would pay, but it is costing us much more than we are getting. If a farmer must be visited, we will have it all by person who can readily see that it costs all he gets to do the work. We desire to give this invention to farmers at a very low rate and make it general if the farmer himself will allow us to do so. We have already sold quite a number, so that we are sure of having it tried, and we fully understand what the result of the trial will be. We desire to do right, and will continue to accept the same price for farm rights as now, till March 1st, 1878, after which date we shall change our price to 100 cents per acre for the right. For example, if a man owns 50 acres, he will pay \$50.00, if he owns 100 acres, he will pay \$100.00. This rule and this price will be strictly adhered to.
Any person desiring of purchasing a right at \$50.00 each so before the 1st of March 1878, by calling on "Wm. Caveny, McAlisterville," or "John Messer of the same place, James McClellan of Oakland Mills, or John Herring and N. A. Elder at Mifflintown. For further particulars address
S. Y. DAVIE,

We are now selling farm rights for the small sum of \$50.00 each, we would gladly continue this, if it would pay, but it is costing us much more than we are getting. If a farmer must be visited, we will have it all by person who can readily see that it costs all he gets to do the work. We desire to give this invention to farmers at a very low rate and make it general if the farmer himself will allow us to do so. We have already sold quite a number, so that we are sure of having it tried, and we fully understand what the result of the trial will be. We desire to do right, and will continue to accept the same price for farm rights as now, till March 1st, 1878, after which date we shall change our price to 100 cents per acre for the right. For example, if a man owns 50 acres, he will pay \$50.00, if he owns 100 acres, he will pay \$100.00. This rule and this price will be strictly adhered to.
Any person desiring of purchasing a right at \$50.00 each so before the 1st of March 1878, by calling on "Wm. Caveny, McAlisterville," or "John Messer of the same place, James McClellan of Oakland Mills, or John Herring and N. A. Elder at Mifflintown. For further particulars address

Reading of Delaware Literary Review, by the Editor, John Brown (N. S. Henkle).
We would like to notice more fully each performance of the evening, did space permit. To the credit of every performer be it said, there was not a single failure, and this statement will apply to every performance of the evening. Among the more prominent exercises of the evening were the reading of Miss Hamilton, the declamation of Miss Danglerly, and the paper read by John Brown. Of the last performance we are only expressing the general verdict when we say, good, very good. As a humorist, John Brown is a success. We have intentionally omitted special notice of the four orations delivered before the convention, as they are entitled to more than a passing notice.
We were pleased to notice the fact that our County Superintendent, J. M. Garman, who is ever in the van in educational work was present every session, and took an active interest.
The following resolutions were adopted:
Resolved, That the thanks of this Association be due to B. F. Schaefer, of the Junata Valley Bank, for publishing notices of the convention gratis.
Resolved, That a vote of thanks be tendered the Junata County Commissioners, for the use of the Court House.
Resolved, That the thanks of this Convention be due to the Methodist church, for the use of their organ.
Resolved, That we are under obligations to the citizens of Mifflintown and Patterson for their hospitality and generous aid, to Mr. Byers, Paul Hamlin, Jacob Scholtz, Frank C. Van, Jas. A. Murray, Jeremiah Lyons, Esq. and W. S. North, for all in the town of contributors.
W. I. HIBBIS, Secretary.

Wheat Culture.
We have in the past few weeks been trying to show to the farmers of Junata county the importance of a new process of cultivation of wheat. The first process is to sow grain. Most artists have eight sowing boots, or show us which depth the wheat in rows of about one inch, making eight inches of ground covered between the wheels of each drill, a line of six feet or 72 inches, leaving five feet and a half of ground with nothing on.
The new plan is to scatter the grain over more ground by using less seeds and soil, and scatter the grain just two inches, which is twice the width of ground that the ordinary boot drills cast over. It will readily be seen that by adopting the new plan there will be, 11 inches between the rows of grain. The same amount of seed is sown in the new, as in the old plan, but the rows of grain are so arranged in the new plan that it may be cultivated as readily as corn. As a matter of fact the new sowing process is better. If any doubt that cultivation is not the best part of it, we are prepared to prove it by any number of experiments in the laboratory of Lancaster county that 60 bushels and 150 pounds of wheat per acre was raised last year in this county, with only the ordinary ground preparation. The peculiar scattering of the grain, and the entrenchment of the ground between the rows produced the crop. In the same field, by the old plan of raising wheat, the yield was 25 bushels and 2 pounds per acre. The above result per acre was obtained by regular survey and correct measurement, in front of which the reader is referred to E. H. Barkholder, a practical surveyor and justice of the peace, who was present at the convention. We also refer you to D. H. Leonard and George K. Reed, of Lancaster for information regarding it. We also refer you to John Messer of McAlisterville and Maria Messer of Oakland Mills Junata co., who have recently visited the farmers in Lancaster county, upon which wheat was sown by the new process, last fall and which is now growing, and presenting a promising yield for the coming harvest, they both have bought farm rights and adopted the new process. We might refer you to hundreds, but prefer making the following offer.
Having placed the matter as clearly before the people as we possibly can, we now propose to settle all doubts, that will rest the farms of Lancaster county, on which wheat sown by the new plan is growing. We will deposit an amount of money sufficient to pay all expenses, incurred in going to and coming from the farms, where the new plan has been used, and if it can be shown by such as may visit said farms that we have overstated, or mistaken the case, the money may be drawn from our deposit to pay all expenses incurred in such trip. People of a township may select 2 men, or people of a county may select 5 men, on the above terms to visit said farms, and invest our money in such a way that all their money, shall be deposited, and upon their decision the case may rest. Provided it be done within two weeks. The patent for the attachment of which we speak, was obtained by A. B. Groll of Berwyn Lancaster Co., August 28 1877. The amount of the patent is \$191.75. We caution all persons against using it without our consent.
