York Minster, York Minster has been considered the grandest of English cathedrals. It is when it was never, in fact, occupied by monks at any period of its history. It quantity of hay-sufficient to pay the his room on one side of the hall, and was originally founded by Edwin Saxon King of Northumbria, about the year 627, at the request of Paulinus, the Christian missionary who had converted and baptized him; the Saxon church probably no one offering, to-day, a had shot his trainer, James Ross, and was rebuilt in 767 by Archbishop Albert; more certainly lucrative field to the edwas rebuilt in 767 by Archbishop Albert; more certainly like the pistor out of and the first Norman Archbishop, ucated and skilled practitioner than his hands he shot at me, grazing my Thomas of Bayeux, erected a new one presbytery; Perpendicular, in the choir; and Late Perpendicular, in the central chief constructors were Archbishop Le the future. Romeyn, in the latter part of the thirteenth century, and Archbishop Thoresby, in the fourteenth century. The old timber roofs of the choir and nave were destroyed, almost within our own recollection, by two singular disasters; the first time in 1829, by the act of an incendiary madman, Jonathan Martin, who was found guilty of setting the woodwork on fire, but was sent to a lunatic asylum; and the second time by an accidental fire in 1840; but extensive repairs and restorations were afterwards effected, costing altegether new operating room is a finely equipped nearly £100,000. Our account is of the southeast face of the cathedral, with the exterior of the south transept, built in the first half of the thirteenth century by Archbishop Walter de Gray. The gable end of the north transept is of different design, and is preferred by the best judges. The transepts, which are ninety-four feet wide, two hundred ance to the dental student, and exceeds and twenty-four feet long, and ninetynine feet in height, are divided in their breadth into east aisles, forming one of the noblest features of the interior. The mechanical departments by demonstraexterior also of the choir, along one side, extending above one hundred feet, with the pinnacles and flanking while the corps is still further increased ous in this outside view. The great central tower, which is the largest in throughout the session. England, being sixty-five feet square, will at once be remarked, as well as the twin western towers, two bundred feet high, one of which was injured by the fire in 1840. The west front itself is the most perfect architectural composition of the kind in England, but we dressed. get the best view of the general structure from the southeast side; York Minster,

> The record of its usefulness extends progress made in dental surgery, and it session October 1st, 1878, in its new and commodious building under more favorable auspices than ever before for maintaining its most important relations to the profession.

The arrangements for instruction are admirable. The lecture courses are well supplemented by unsurpassed conveniences for practical operations. The apartment-its large and numerous windows furnishing such an abundance of light that the most delicate manipulations can be successfully performed in any position.

The dental museum of this college, with its anatomical and pathological specimens, is unequaled in its importall others in size and value.

The faculty consists of five professors, who are aided in the operative and tors. In addition, clinical teachers have been elected from among the most eminent practitioners in the country, by a number of distinguished gentlemen, who give clinical lectures

The graduates of this school are accepted at the Jefferson Medical College as second course students.

DOMESTIC.

CURE FOR COLDS IN THE HEAD.-The London Spectator says:—It would seem that the cure for those worst of small nuisances, colds in the head, which Dr. Ferrier suggested in the Lancet, might prove to be a remedy of very great value. It is a snuff—a white powder pedition to the Arctic in the decommendation of the discovery by Dr. Bessells, of the Polaris, of the junction of two important tides in the larger part of Smith's Sound, creating the impression that a new type of tide has been found, occurring every eight hours. The shifting of the earth's axis has commanded particular notice. The question has been studied whether there have been not merely one glacial period, but many successive periods, extending over vast.

The currant worm, as is well known, the latter is the only practicable method. Take one pound of Paris green and mix thoroughly with twenty or thirty pounds of damaged wheat flour or plaster of Paris, and dust the potato vines with it early in the morning while the dew is on them. A dredging box of tin, mounted on a handle two or three feet long, will answer the purpose very well and can be cheaply made by any tinker.

A Walk of Loop Miles.

Jack Goulding tells the following sown and all is complete, the fence miles' walk with young Miles, of Caliclean fence rows, which may be readily us gave out. On the 728th mile Jem mown and made to yield a considerable became exhausted. He was taken to when I came off from my 729th mile, I was called into Miles's room. When I got into the room I saw at once what neck and leaving this sear."

And Jack Goulding, the trackmaster and trainer of the New York Athletic Club, turned his head on one side, showing an ugly scamed sear on the

side of his wiry neck. "It didn't hurt much, and the people kept yelling for me, and so, as soon as the doctor got it fixed up, I went out on the track, and then you ought to have heard them. They fairly roared. That's the thing that made me strong enough to finish the task. As soon as I could over the entire period of the greatest make them understand that I wanted to talk, they hushed up, and I told them will commence its twenty-third annual how it was, that my opponent had broken down, but that I would finish the walk alone. Then they cheered again; the music struck up, and away I went and walked through at my ease, completting the 1,000 miles within the 1,-

"Did Miles kill his trainer?" "No; Ross did not die of his wounds."

"What became of Miles?" "He got well of his frenzy in a few days; but he never was himself again. I made \$500 by that walk; that was the purse we walked for. Two weeks after that I walked in a small hall, down in dence. the Bowery, for the benefit of the wife of my opponent, and took in \$83 for her. We professional athletes are are always ready to help each other in a strait. Don't you believe one word about our having no feeling for one another. Even the prize fighters-and I don't like that branch of the business as well as pure athletics-but one prize fighter will go, just as soon as the fight is over, to help his opponent, bathe his wounds and bruises; and if the beaten man is in a strait for money, why, he'll lend him some, and make another match with him or for him with another man, to help him to make the money to pay the debt. We've got our code of honor,

and we stick to it too." is, but we traveled together afterward and I was with him when he broke down completely in St. Louis, where he died in the Sisters' Hospital. He was a delicate chap, but plucky; it was pure pluck that kept him up at all. He was only twenty-five when he died. Yes, he was a brave, plucky boy, and it is hondered to broke the died in the Sisters' Hospital. He was a delicate chap, but plucky; it was pure pluck that kept him up at all. THE GREAT DISCOVERY.

A New Household Word, But comparatively few of the forty millions word throughout the length and breadth of

A few facts connected with the history of who, when trimming the lamns always wiped who, when trimming the lamps always wiped his oily hands on his scanty locks, that the effects of petroleum upon the growth of the hair were noticed. In a short time this old servant, baid and gray-headed as he was, be-gan to show a good head of hair, and the se-cret was out. 2. But the best refined petro-leum cannot be used as a hair dressing and the chemists art had to be employed, so as to destroy the offensive older, and at the same destroy the offensive odor, and at the same time retain the subtle qualities which gave health to the scalp and natural color and vigor to the hair. This feat was accomplished in the production of Carboline, which is deedorized petroleum. 3. Every one who has handled petroleum knows what a penetrating, active agent it is. It cannot be retained in wooden casts at all, unless they are coated with some impervious material, and it is not surprising that it goes right home to the roots of a per-son's hair, when it can find its way through the best oak staves ever made. 4. The medical properties of petroleum have been well at-

tested ever since the Seneca Indians, me growth to its natural strength and vigor by removing dandruff, cleaning the scalp and imparting renewed settivity to the follicles. Other facts might be given in support of the claims of this wonderful preparation, but the article is telling its own story in the hands of most gratifying significance. Sold by druggists.

In our style of climate, with its sudden changes of temperature—rain, wind and sunshine often intermingled in a single day—it is no wender that our children, friends and relatives are so frequently taken from us by netives are so frequently taken from us by neglected colds, half the deaths resulting directly from this cause. A bottle of Boschee's German Syrup kept about your home for imstances. German Syrup kept about your home for immediate use will prevent serious sickness, a large doctor's bill, and perhaps death, by the use of three or four doses. For curing Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup or any disease of the Throat or Lunga, its success is simply wonderful, as your druggist will tell you. German Syrup is now sold in every town and village on this continent. Sample bottles for trial, 10 cents; regular size, 75 cents.

WONDERFUL DISCOVERY!

A Deodorized Extract of Petroleum, The Only Article that Will Restore Hair on Bald Heads.

What the World Has Been Wanting for Centuries.

Of all the compoun's which the chemist's art has given to the world for hundreds of years for the pur-

pose of restoring the hair to its natural growth and

tolor, not one has I can verfect. Many of the hairdressings of the day are excellent, but t e great mass of the stuffs sold for promoting the growth and bringing back the original color, are mere humbigs, while not a few are positively pernicious in their effect upon the scalp and the structure of he hair. All hair-dyes are we'l known to chemists as more or le's poisonous Jepend on a restoration of the functions of the scalp to their natural health and vi.or. The falling out of the hair, the accumulations of dandruff, and the premature change in color, are all evidences of a fiscased condition of the sculp and the glands which which the "tinned" ware loses its original brightness, while the lead larks round in the systems of those who use it, biding its time for the work of Death.

Flankel Cake.—Mix three tableboontules of flour with one pint of eam; add two eggs and beatthe whole ill till quite smooth; then add all the account of the systems of the bart of parts of the body. The Seaweed Tonic of the body. The Seaweed Toni

YEARS. OR RADWAY: That others may be benefitted I make this statement: I have had an Ovarian Tumor in the ova-

I make this statement:
I have had an Ovarian Tumor in the ovaries and bowels for ten years. I tried the best paysidans of this p are and others without any bimefit. It was growing with such rapidity this I loudd not have lived much longer. A friend of mine Induced me to try Radwey's Remedies, I had not much faith is them, but finally, after much deliberation, I tried them.

I feel perfectly we'l, and my heart is foll of gratifud to God for this help in my neep afflection. To you, sir, and your wonderful medicine, I keel deeply indebted, and my prayer is that it may be as much a blessing to others at that it may be as much a blessing to others at it has been to me. Signed) Mass E. C. Busiss.

Mrs. Bibbins, who makes the above certificate, if the person for whom I requested you to send medicine in June, 1878. The medicines above stated were bought of me, with the exception of what was sent to her by you, I may say that bir statement is correct without a qualification.

Bruggist and Chemist, and Arbor Mich. This may certify that Mrs. Bibbins, who make the above certificate, is and line been for many years well known to we, and the facts therein stated are undoubtedly and undentably correct. stated are undoubtedly and undentably correct Asy one who knows Mrs. Bibbins will believe
