HINTS FOR THE 10-MORROW.—It is a ference to the merely ornamental.

good idea to keep a memorandum of work needed to be done, and then there is becomes so trained that the necessity for the plan diminishes.

and thus diminish in bulk, in proportion to the quantity of clay or of peaty matter they contain. Sand scarcely diminishes at all in bulk by drying, but peat shrinks one-fifth in bulk, and strong agricultural clay nearly as much.

The roots are thus compressed, and the air excluded from them, especially in a proportion to the eastern limb should be receding and the eastern limb should be receding and it realized in an hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to the warmth of new milk, then put in a hour; strain it and let the liquid cool down to have on the hours of the hou strong agricultural clay nearly as much. The roots are thus compressed, and the air excluded from them, especially in the hardened clays, in very dry weather, and the plant is thereby placed in a condition unfavorable to its growth. Hence the value of proper admixtures of sand and clay, since by the clay a sufficient quantity of moisture is retained and for a sufficient length of time, while by the sand the roots are preserved from compression and a tree activation of the stars, is fully borne out.

It well together. Wednesday add the mix well together until the masked; let them stand together until the pounds of potatoes boiled and masked; let them stand together until the masked; let them stand together until the pounds of potatoes boiled and masked; let them stand together until the pounds of potatoes boiled and masked; let them stand together until the stime we had a greenhouse." "Well, my love, paint Thursday; then strain, put it into bottles and it is ready for use. It must be stirred frequently while it is making, and kept near the fire. Before using shake the bottles well. It will keep in a cool place two months, and is better the latter part of the time. It ferments spontaneously, not requiring the aid of present. "Not at all," responded the mothers spontaneously, not requiring the aid of present. "Not at all," responded the mix well together. Wednesday add three pounds of potatoes boiled and mix well together. Wednesday add there pounds of potatoes boiled and mix well together. Wednesday add three pounds of potatoes boiled and mix well together. Wednesday add there pounds of potatoes. It must be stirred frequently while it is making, and kept near the fire. Before using shake the bottles well. It will keep in a cool place two months, and is better the latter part of the time. Wetlengther well as greenhouse." "Well, my love, paint there pounds of potatoes boiled and mix well tog

FRANCE doesn't need any Rhine, because she has her Rhone.

carries on her head a wicker wheel of tolerably large diameter, placed in a perfectly horizontal manner on the top of the crown, and around this wheel threads are attached at equal distances, provided at the extremities with a slip-knot, which is kept open by means of a glass bead. The duncing girl advances towards the spectators, holding a basket filled with eggs, which she hands to us, so that we may verify that they are real eggs and not an imitation. The of the crown, and around this wheel are real eggs and not an imitation. The music strikes up a monotonous and jerking measure, and the dancer begins turning herself around with great rapidity. Then seizing an egg, she inserts it in one of the slip-knots, and with a sharp movement jerks it so as to tighten the knot. By means of the centrifugal force produced by the rapidity of the dancer's circular movement, the thread holding the egg is stretched out so that the egg is placed in a straight line with the prolongation of the corresponding spoke of the wheel. One after the other the eggs are thrown into the slip-knots and are thrown into the slip-knots, and balament of a myriad of floating traditions, the latter always throwing a

## Well Toned Systems.

Systems toned and renovated with Hostetter's Stomach Bitters are most effectually defended from disease. That supreme invigorant soon overcomes that distressing feebleness, consequent upon aiments which impoverish the biood and relax the muscles. Vigor, appetite, sleep, return to the wasted frame and every physical faculty gains greater activity through its benign influence. Nor is this all, for the Bitters have a most genial and cheering effect upon the mind of the despondent invaired, which is the natural effect of the increased bodily vitality which they produce. Nervous symptoms disappear in consequence of the uses of this medicine, and the evil consequences sure to result from a premature decay of the physical energies, are averted. Dyspepsia, liver complaints, rheumatic ailments urinary and uterine irregularities, malarial diseases, and many other disordered conditions of the system, are remedied by the litters. Systems toned and renovated with Hostet-
