known. A preventive may be to steep condition for a protracted period. the seed in a solution of blue-stone (su) phate of copper), as wheat is steeped to moniting after it has been put in the bins. If your wheat is damp and liable the granacies, and after leaving in one damp, put in others that are not moist wheat will be perfectly dry and rattle like shot when handled.

## The Dormouse,

common mouse, and many have, doubtless, seen the field mouse; but the dorsleep. The dormouse is very small, its four hours. body being less than three inches in length, and its tail about two inches and a half. Its color is light reddish its movements that the eye can scarcely sand scales ahead of production. follow it as it runs along the lower branches of the trees, or leaps abouamong the grass and leaves upon the ground. It feeds upon nuts, acorns and grain, and like the squirrel, it often soda, dissolve in two and a half gallons takes its food between its forepaws and of water, boil, skim and pour on hot. sits upright to eat it. A pretty, round nest of grass, with a lining of moss and lichens, is built by the dormouse between the forked branches of a low through the greater part of the winter.

PROTECTION OF PLANTS FROM COLD.—
A very slight covering will exclude for your boys, and if you have no boys, amount cold. At first it seems almost impossible that a thin mat or any such flimsy substance would prevent tender plants from attaining the temperature of the atmosphere by which it is generable of the atmosphere by has most effect when placed a little distance above the plants to be sheltered. A very considerable difference in teapperature was always observed on still and serene nights, between bodies sheltered from the sky by substances touching them and similar bodies sheltered ing them and similar bodies sheltered by a substance a little above them. An by a substance a little above them. An experimenter recently found on one night that the warmth of grass, sheltered by a cambric handkerchief raised a few inches in the airs was three degrees greater than that of a similar than that of a similar of pieces of board of various dimensions.

The tools should be of good quality. In the color of the substance a little above them, An and screw-driver. A small bench he "You was, ch? It's a wonder they didn't tell you I'd get you into the loose of Correction."

"Won't you just mention to the Judge that I'm a distant relative of yours?" asked the stranger.

gradually increase the amount to four or five quarts by the end of the year. After that, if the pastures and hay are first quality, oats are not of the same importance, but should not be withheld entirely. The amount that can be profitably given the second and third years depends on the conditions already mentioned. Peas and good pea-vine hay waxwer the same purpose in forming the surest way to get what is best suited to your wants for you to make a fair trial ow, of some of the prominent publications. While the regular price of The Sunday School Times is sixteen page weekly paper) is \$2.15 a Times (a sixteen page weekly paper) is \$2.15 a cear, it will be sent to new subscribers, on trial for three mouths, for twenty-five cents.

The Boston Journal in commenting upon is secured by feeding oats. Clover abounds in albuminoids and bone material. Hence hay made nominally of red top, timothy, blue grass, and orchard grass is improved by a mixture of never better than it is now, and in brendth, chard grass is improved by a mixture of clover. All kinds of stock are benefited by having a variety of food daily. It is an old maxim. "A change of pasture makes fat calves."

Catarra in Sheep.—Sheep run at the offee sometimes because of cold, but often it is chronic catarra, and is not cents for a specimen copy of The Scholars.

nose sometimes because of cold, but often it is chronic catarrh, and is not easily cured. If they are made to inhale the steam from hot vinegar or a decoction of hops they will throw out a sent to you desired ask, seven conts for a specimen copy of The Scholars can be called the steam from hot vinegar or a decoction of hops they will throw out a sent to you free, if you wish to see them.

Yours, truly JOHN D. WATTLES, 610 Chestert St., Philadelphia, Pa.

How to GAIN FLESH.-Cern meal is serting a hot iron. After the mucus fattening, also hominy, rye and un-bas been discharged, smear the nostrils bolted wheat flour. Oatmeal contains or the boy gets away." with pine tar. Scotch snuff, dropped in the nostrils, will cause the sheep to fine flour. This well boiled, without in the nostrils, will cause the sheep to throw out the mucus, but this remedy is not so effective as steaming. A hood may be put on the head of the sheep to prevent the steam from escaping, and the head of the early over the testes. Sheep in g, and the head of the early over the vessel. If not for sale in your town, your orders can always be filled without delay at 440 MARKET Street, or Dr. Radway's Remedies.

IN THE OVARIES AND BOW-

YEARS. ANN ARBOR, Dec. 27, 1875. DR RADWAY: That others may be benefited I make this statement:

I have had an Ovarian Tumor in the ovaries and bowels for ten years. I tried the best jup. stelaans of this p ace and others without any benefit. It was growing with such rapidity that I could not have lived much longer. A friend or mine induced me to try had we ye kemedies. I had not much faith to them, but finally, after much deliveration, I tried them.

I feel perfectly well, and my heart is full of gratifud to God for this help in my deep affliction. To you, sir, and your wonderful medicine. I feel deeply indebted and my prayer is that if may be as much a blessing to oth is set it had been to me. (Signed) Mas. E. C. Brasses.

Mrs. Ribbins, who makes the above certificate is the person for whom I requested you to send medicine in June, 1815. The medicines above stated were bought of me, with the exception of what was sent to ber by you, I may say that her statement is correct without a qualification.

Signed L. S. Lence.

Druggist and Chemist, Ann Actor Mich.

This may certify that Mrs. Ribbins, who makes the above certificate, is and has been for many years well known to us, and the facts therefy stated are undoubtedly and undenlady correct. Any one who knows Mrs. Ribbins will believe her statement. (Signed)
