We have no accurate data of the yield per acre or product of 1877. The total amount exported and manufac tured was a little above 463,000,000 pounds. Allowing 6 per cent. for that used at home and that which evaded the tax, we have a crop for 1877 of about 490,000,000 pounds.

The screege for 1878 was 76 per cent. of 1877. The quality of tobacco produced was generally better and heavier, making the yield per acre rather more than that of the previous year, except in Kentucky, where it fell off slightly. We estimate the total crop of 1878

at 393,000,000 pounds (worth \$22,-000,000), against 490,000,000 pounds last year.
