

"Plan and Ki-nine."

She wasn't after her hair, cosmetics, scented soap or any of those gimcracks...

"Do you keep drugs and medicines and pizins and so on?" "Oh, yes, we keep all such things."

"Well, I called to see about getting some pizins and ki-nine, but I dunno. So many folks have been slaughtered by druggists' mistakes that I'm ena-most afraid even to ask for camfur gum."

"Do you want arsenic?" "Certainly, but you want to be powerful, don't you? I'm a woman of fifty-nine, and I've nursed the sick ever since I was a girl, but I never handle pizins without a chill creeping up my back."

"It may be all right, but I dunno. If my old man is took off instead of the rat, I'll begin a lawsuit next day after the funeral!"

"Well, I don't exactly know," answered Brown, being uncertain whether that was a three penny or four penny under his tobacco jar at home; but let your daughter become my wife, and I promise she shall have endless gold."

AGRICULTURE.

Color Blindness Defect.—Mr. William Pole, writing in Nature, thus explains the true limits and nature of color blindness: "In the first place we see white and black, and their intermediates or compound gray, provided they are free from alloy with other colors."

To MAKE BOYS GOOD FARMERS.—To parents who have boys growing up on the farm, nothing should be neglected pertaining to farm life, to make them acquainted with the business of growing like an ill instructed mechanic, or indolent shopkeeper, never does much good.

RE-GRAPING WORTHLESS PEAR TREES.—The old pear tree often cracks its fruit so badly, and other kinds are found to be so, that it is well to remember that they may all be re-graped with other kinds in the spring.

GRAIN IN ORCHARDS.—My long experience is that an orchard should never be sown in small grain or let run in rows or close to the trees. It might be grown in an orchard without detracting something from the demands of the trees.

AN ISLAND IN MID-OCEAN.—In 1815 the English government placed a garrison on Tristan d'Acunha, in the great more securely than any other royal prisoner at St. Helena.

Well, I don't exactly know," answered Brown, being uncertain whether that was a three penny or four penny under his tobacco jar at home; but let your daughter become my wife, and I promise she shall have endless gold."

SCIENTIFIC.

Cuts and Sores.—Accidental cuts from knives, cutting tools, scythes, etc., are more likely to occur on the face and limbs than on the body. All that is requisite in general is to bring the parts together as accurately as possible, and to bind them up; this is usually done by adhesive plaster when the cut is on the hand.

Color Blindness Defect.—Mr. William Pole, writing in Nature, thus explains the true limits and nature of color blindness: "In the first place we see white and black, and their intermediates or compound gray, provided they are free from alloy with other colors."

To MAKE BOYS GOOD FARMERS.—To parents who have boys growing up on the farm, nothing should be neglected pertaining to farm life, to make them acquainted with the business of growing like an ill instructed mechanic, or indolent shopkeeper, never does much good.

AN ISLAND IN MID-OCEAN.—In 1815 the English government placed a garrison on Tristan d'Acunha, in the great more securely than any other royal prisoner at St. Helena.

Well, I don't exactly know," answered Brown, being uncertain whether that was a three penny or four penny under his tobacco jar at home; but let your daughter become my wife, and I promise she shall have endless gold."

DOMESTIC.

As THROW YOURSELF IN.—The Sioux City and Pacific train stopped at Onawa and the smart man on the train leaned out of the window and shouted to a native: "What is the name of this town?"

Color Blindness Defect.—Mr. William Pole, writing in Nature, thus explains the true limits and nature of color blindness: "In the first place we see white and black, and their intermediates or compound gray, provided they are free from alloy with other colors."

To MAKE BOYS GOOD FARMERS.—To parents who have boys growing up on the farm, nothing should be neglected pertaining to farm life, to make them acquainted with the business of growing like an ill instructed mechanic, or indolent shopkeeper, never does much good.

Well, I don't exactly know," answered Brown, being uncertain whether that was a three penny or four penny under his tobacco jar at home; but let your daughter become my wife, and I promise she shall have endless gold."

HUMOROUS.

Old Maids and Old Bachelors.—Old maids are useful. They can cook, and take care of children, nurse sick people, and generally play the piano.

Color Blindness Defect.—Mr. William Pole, writing in Nature, thus explains the true limits and nature of color blindness: "In the first place we see white and black, and their intermediates or compound gray, provided they are free from alloy with other colors."

To MAKE BOYS GOOD FARMERS.—To parents who have boys growing up on the farm, nothing should be neglected pertaining to farm life, to make them acquainted with the business of growing like an ill instructed mechanic, or indolent shopkeeper, never does much good.

Well, I don't exactly know," answered Brown, being uncertain whether that was a three penny or four penny under his tobacco jar at home; but let your daughter become my wife, and I promise she shall have endless gold."

"VEGETINE,"

Vegetine is a blood purifier. It is a blood purifier.

Color Blindness Defect.—Mr. William Pole, writing in Nature, thus explains the true limits and nature of color blindness: "In the first place we see white and black, and their intermediates or compound gray, provided they are free from alloy with other colors."
