The mere mention of the word "Rosicru cian" is still sufficient with many to create a feeling of that awe, uncomfortablenes and mystery which our ancestors invariably associated with dealings with the evil one. That mysterious body or order, the Rosicrucian Philosophers, first founded by truly be asserted that no one can boast of baying ever seen or known in any age any supposed or suspected 'member' of the Rosicrucian brotherhood in the flesh." The anthor claims for his work that it is the first impartially written explanatory history of the alchemical philosophers since mits, put forward some of the opinions of metic Brethren with the force and warmth seemingly of his own conviction. He desires to be regarded simply as the torian of the Resierucians, or as an esexample of the style of the work, the old is described as follows: To a dilute soimmense stone in the centre of a fleid, and by great labor succeeded in removing it. be heeded, as it will not interfere with the effectiveness of the bath. The arexcess to the cavern. Without following at a boilting temperature. When the him through all the dark and mysterious articles are observed to be uniformly passages he had to traverse in his curiosity, coated, they may be removed, washed o doubt unwittingly, after Rosicrucian re- in water in which a little chalk is susrearch, we take up the narrative: "Still pended dried and finally polished with the light streamed at a distance, but still chalk or other suitable material. By there was no sound to interpret the mean- the substitution of a cobalt salt in the ing of the light or to display the character of this mysterious place in which the counryman found himself entangled hopelessly like a knight of romance in an enchanted

well knew, the woods were very familiar to him, and his own hamlet and his wife and family were only a few miles distant. He now has the many familiar to him and family were only a few miles distant. and family were only a few miles distant. He now hastly, more in fear than through in a few years, however, it has become courage, noisily with his feet descended the very valuable, especially in the West, as remainder of the stairs, and the light grew a mixture in the blast furnaces with the until at last, at another turn, he came upon a square chamber, built up of large hewn and ancient stones. He stopped, silent a great deal of the contlet. and ancient stones. He stopped, silent a great deal of the ore that is used in and awestruck. Here was a flagged pave-many blast furnaces. The old cinder could scarcely breath. I resorted to maple syrup. and awestruck. Here was a flagged pavement and somewhat lofty roof, gathering up into a centre in the groins of which was a rose, carved exquisitely in some dark stone or in marble. But what was this poor man's fright when, making enother sudden turn, from between the jambs and from under the large archivolt of a Gothic stone portal, light streamed out over him with inexpressible brilliancy, shining over everything, and lighting up the place with brilliant radiance, like an intense golden sunset? He started back. Then his limbs shook and best under him as he gazed with terror at the figure of a man, whose face was hidden, as he sat in a s n lious attitude in a stone chair, reading in a great book, with his elbow resting on a table like a rectangular altar, in the light of a large, and the number of the started back. Then his limbs of the Academy of Natural Sciences, Philadelphia, Dr. Francis Dercum gave some interesting information regarding the system of canals in the outer skin of fishes. These canals are filled with a clear gelatious substance, and they were once the much of the ground towards the furrow. A slight bruising will be attributed that the furrow. A slight bruising will be done quickly by topping them with a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing a furrow away from the roots, and then dragging a sharp hoe, plowing them with the figure of a man, whose face was hidden, as he sat in a s n lious attitude information regarding the system of care was hidden, as he sat in a s n lious attitude the figure of a man, whose face was hidden, as he sat in a s n lious attitude the roots are formed in a sharp hoe, plowing them with the figure of a man, whose face tangular altar, in the light of a large, ancient iron lamp, suspended by a thick chain to the middle of the roof. A cry of alarm, which he could not suppress, escaped from the scared discoverer, who involuntarily advanced one pace, beside himself with terror. He was now within the illuminated particularly those vibrations which chamber. As his foot fell upon the stone. the figure started bolt upright from his sented position, as if in awful astonishment, He erected his booded head, and showed himself in anger about to question the intruder. Doubtful if what he saw was reality, or whether he was not in some terrific cam, the countryman advanced, without animals. being aware of what he was doing, another audicious step. The hooded man now thrust out a long arm, as if in warning: and in a moment the discoverer perceived that his hand was armed with an iron baton, and that he pointed it as if tremendously to forbid further approach. Now, however, the poor man, not being in a condition either to reason or to restrain himself, with a cry, and in a passion of fear, took a ner, possesses such hardness that Herr third fatal step; and as his foot descended Fleitmann thinks it could be used for on the greating stone, which seemed to cutting instruments, while in hot state breadful man, or image, raised his arm besides when so prepared, has none of high like a machine, and with his truncheon struck a prodigious blow upon the lamp, the reddish color attributed to it in the text-books, but excels nickel in white-

snatches, as if making turns; and it then out. It was only suspected that this hidden place referred in some way to the Rosicrucians, and that the mysterious people of that famous order had there concealfamed as the sepulchre of one of the brother hood, whom, for want of a more distinct recognition or name, the people choose to call 'Resierueius,' in general reference to the lamp, and its sudden extinguishment by the figure that started up, it was supposed that some Rosicrucian had determin ed to inform posterity that he had penetrat ed to the secret of the making of the ever burning lamps of the ancients,-though, at the moment that he displayed his knowledge, he took effectual means that no one should reap any advantage from it,"
