How to Raise Tobacco.

PRACTICAL ESSAY ON THE MOST APPROVED METHODS PRACTICED IN LANCASTER COUNTY, PA.

from time to time, in acreage, as well as in quality, until it has attained a reputation in the markets of the country, excelled only by that grown in the West Indies and a few other tayored localities.

This is the result of that care in its management through its various stages, which has of late years been practiced and studied by the more careful growers.

With the view of Ruiding others, not familiar with the process, I will endeavor to give a brief outline of the manner of theating the plant through the various stages, from the seed to its preparation for the

In the first place, the successful grower must raise his own plants, and this is by no means the least difficult part of the work. with these conditions. The prime requisite is a piece of ground, or rich soil, and protected from cold winds. This should be prepared in the tall, by spading and manur-the fusiness. ing, and about April 1, sow seed at the rate of a table spoontel to one hundred square bring the seed into closer contact with the of wood ashes, will facilitate the sowing of the mixture with regularity.

HOW TO GROW STRONG PLANTS. A covering of the bed with hog bristles has a wonderful influence in promoting the development of the plant. The bristles may be removed, after the plants have attained a growth of three or four leaves, and preserved for future use, a rake being the best means of removal. Frequent sprinkling is indispensable, as moisture is an active promoter of all vegetable growth. A solution of some active fertilizer applied in liquid form is of great benefit. By careful attention to your plant bed, thorough weeding included, they will be ready for transplanting during the latter half of May in this latitude. From this to about June 5, plant whenever the weather and ground are favorable: the same conditions that favor the

TO STATE OF THE PARTY OF THE PA

Ayer's

Hair Vigor, FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR. It is a most agreeable dressing, which is at once harmless and effectual, for

preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately. and thuses a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vicion cleanses the scalp, cures and prevents the formation of dandruff and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible. As a Dressing for Ladies' Hair,

The Vigor is incomparable. It is color-

less contains neither oil nor dye, and

will not soil white cambric. It imparts

an agreeable and lasting perfume, and

as an article for the toilet it is economical and unsurpassed in its excellence. PREPARED BY Dr. J. C. AYER & CO., Lowell, Mass., Practical and Analytical Chemists.

of the highest order in proof of these statements.
