Among the conclusions announced by Sir John Lubbock in his latest communication to the Linnean Society concern-

DOMESTIC

SEASONING FOOD.—Many people have the idea that a finely-flavored dish must cost a great deal; this is a mis-take; if you have untainted meat, or sound vegetables, or even Indian meal, to begin with, you can make it deliclous with proper seasoning. One rea-son why French cooking is much nicer than any other is that it is seasoned with so great a variety of herbs and spices; these cost very little; if you would buy a few cents' worth at a time you would soon have a good assortment. The best kinds are sage, thyme, sweet marjoram, tarragon, mint, sweet basil, parsley, bay-leaves, cloves, mace, celery-seed and onions. If you will plant the seed of any of these seven first mentioned in little boxes on your cans or in tightly corked glass bottles.

Almost Young Again. My mother was affleted a long time with Neuralgia and a dull, heavy inactive condition of the whole system; headache, nervous prostration, and was almost helpless. WHEN the wool is pulled over a man's eyes it is usually done that he may be eeced afterwards.

WAT AND HUMOR

Metals in the Body .- The human body . which seems made up of flesh blood, really contains several metals, and gases and other substances which perform important offices in the work of science. Nitrogen and carbon and hydrogen are its chief constituents; but it holds, besides, about two pounds but it holds, besides, about two pounds half a tablespoonful after each meal, it half a tablespoonful after each meal, it will establish a regular habit of body, will establish a regular habit of body, and the stomach is a regular habit of body. perform important offices in the world brain. This phosphorus, if extracted and put to use, would make up about four thousand packages of friction matches. Besides phosphorus, it contains a few ourses of redium and half of indirection, billionspess, and an intains a few ounces of sodium, and half ounce of potassium, which school-boys know as a curious metal that burns brilliantly on the surface of water, or when touched by an icicle. The quantity of such in the body would be sufficient for many experiments in a large school. In addition to sodium and potassium, there are few grains of magnesium enough to make the "silver rain" for a family's stock of rockets on a Fourth of July evening, or to create a brilliant light visible twenty miles away. Who knows but some reckless chemist may undertake to drive a profitable buisiness by extracting these materials from dead bodies?

Almost Young Again. My mother was affleted a long time with Neuralgia and a dull, heavy inac tive condition of the whole system; headache, nervous prostration, and was almost helpless. No physicians or medicines did her any good. Three months ago she began to use Hop Bitters, with such good effect that she seems and feels young again, although over 70 years old. We think there is no other medicine fit to use in the family."-A lady in Providence, R. I .-

trate. Dissolve 126 grammes sulphate of copper (blue vitriol) in 2 litres of water; also 227 grammes tartrate of potash and 286 grammes crystallized car-bonate of soda in 2 litres of water. One mixing the two solutions a light bluish-green precipitate of tartrate of copper is formed. It is thrown on a linen filter, and afterward dissolved in half a litre of caustic soda solution of 16 deg. B., when it is ready for use. The coating obtained from this solution ris very pilable, smooth, and coherent, with a fine surface, and acquires any with a fine surface, and acquires any desired thickness if left long enough in the bath. Other metals con also be employed for batning in the form of tartrates. Instead of tartrates, phosphates, oxalates, citrates, acetates, and borates ot metals can be used, so that it seems possible to dispense entirely with the use of cyanide baths.

Certain experiments made by a French savan, with a view of ascertaining how far the phosphate of lime in bone may be replaced by other phosphates, have been used by Mr. W. J. Cooper to illustrate how profoundly the bodies of animals are influenced by the water they drink. This is an as pelled to remain shut up three days or pect of the water question which will be new to most people; but there is no doubt that the composition of the body is materially influenced by the mineral constituents of the fluids we habitually drink.

French electricians are endeavoring and in extreme cases thirty days. Seven ter and began to carve his initials with to apply the Hughes printing instrument to the Atlantic cables, so as to se-Ince protested without avail, and then cure printed messages by means of the through greater resistances than those offered by the cables.

> It is said that the engravers and watchthe blood is shown beyond a doubt by makers of Germany harden their tools the great numbers who have taken it in sealing wax. The tool is heated to and received immediate rellef, with whiteness and plunged into wax, withdrawn after an instant and plunged in again, the process being repeated until "Bun, did you ever think," said a the steel is too cold to enter the war. grocer recently, as he measured out a The steel is said to become, after this half-peck of potatoes, "that these pota- process, almost as hard as the diamond, and when touched with a little oil or turpentine the tools are excellent for engraving, and also for piercing the a hardest metals.

Sleep is a most wonderful power, often stronger than the will, as in the case of the sleeping soldier, and more mighty than pain, as when sick perit is said, has been found equal to the

eral hours in a fulling mill, air, oil and full twice again. Ferment or heat in a warm room, and scour in a weak alka-"oysters in the hotel."-"Oh yes, was line ley to remove superflous oil. Rinse the answer; step right in the restaur- in clean water, wring, and finish with a stretcher iron.

According to an English agricultural journal, the preservation of wooden posts from decay may be greatly promoted by placing them in the ground in a contrary position to that in which they grew—that is to say, top downwards. This view is said to have been verified by actual experiment.

Practical experience has demonstrated the fact that sponges may be artificially grown, and the Austrian government has already adopted the system by planting large quantities along the coast. Small pieces are fastened to a pile and sunk into the sea, and are not long in developing into perfect sponges.

It is said that adulterated sugar may be detected by a very simple test. A little pure sugar is taken into the mouth and when dissolved is replaced by a little of the suspected article. If the latter contains starch, glucose or chloride of tin, a distinctly bitter taste will be present.

The next transit of Venue occurs in 1882, but after that there will not be another for a hundred years.

The Greatest in the World. Without a question Buffalo, N. Y. can boast of the largest and most com-plete private Sanitarium in the world. The Invalids' Hotel was founded by Dr. R. V. Pierce, who was represented his district as State Senator and in Con-gress, and is known throughout the United States as the originator of Dr. Pierce's Family Medicines, and has also become widely celebrated in the treatment of chronic diseases. The erection of this mammoth home for invalids was made necessary by the large number of afflicted who to Buffalo from all pasts of the United States to consult Dr. Pierce and the eminent medical gentlemen associated with him as the faculty of this celebrated institution. The establishment is said to have cost nearly a half million of dollars, and is furnished with every appliance and facility for the care of chronic ailments. A correspondingly large branch institution is located in London, England. The whole concern is owned and operated by the World's Medical Association, of which the original Dr. Pierce is Presidenthis brother, an uncle, and other emi-nent medical gentlemen taking part in the treatment of cases. In treating cases they are not at all confined to the narrow limits of prescribing the justiy en Medical Discovery, Pleasant Pur-gative Pellets, or any other set spoons were already in use during the Carlovingian epoch, and learned men tell us that spoons of a primitive kind have been found among the reindeer age.

PRINTERS, Shoemakers, Tailors, and all who lead sedentary lives, will find relief and cure for Constipation, Dyspepula and Headache by simple, harmless vegetable compound.
The effect of Simmons' Liver Regulator
on the stomach, liver and kidneys is debility, which are inevitable results of indigestion, biliousness, and an irregular habit of body will cease.
"EDITORIAL.—We have tested its

virtues, personally, and know that for Dyspepsia, Biliousness and Throbbing Headache, it is the best medicine the world ever saw. We have tried forty other remedies before Simmons' Liver Regulator, but none of them gave us more than temporary relief, but the Regulator not only relieved but cured

The unbiased opinions of some of the most intelligent medical men in this country and Europe, support the statement that Kidney-Wort is the greatest discovery yet, for curing kidney and liver troubles, piles and constipation. tion. - CITIZEN.

> Vegetine. More to Me than Gold.

WALPOLE, Mass., March 7, 1880. Journal.

Copper Plating on Zinc.—The use of cyanide baths for plating on zinc, has the double disadvantage of being poisonous and expensive. Hess, it is stated, has overcome the objections by rendering the cyanide bath unecessary. This he accomplishes by the use of an organic salt of copper, for instance a tartrate. Dissolve 126 grammes sulphate

Walfolz, Mass., March 7, 1890.

Mr. H. R. STRVENS:

I wish to inform you what Vegetine has done to me. I have been troubled with Erystpelas Humor to more for me. I have been troubled with Erystpelas Humor for more than 20 years in my limbs and other parts of my body, and have been a great square of large large and can truly say it has done more for me than any other medicine. I seem to be perfectly free from this hamor and an recommend it to every one. Would not be without this medicine—its more to me than 19 years in my limbs and other parts of my body, and have been a great square of large large

has to me. Yours, most respectfully, MRS. DAVID CLARK,

J. BENTLEY, M.D., says: t has done more good than all medi-cal treatment.

Yours, respectfully, J. BENTLEY, M. D.

Loudly in its Praise, TORONTO, Out., March 3, 1880.

Dear Sir-Considering the short time that Vegetine has been before the public here, it sells well as a blood purifier, and for troubles arising from a sluggish or torpid liver it is a first-class medicine. Our customers speak leadly in the praise. oudly in its praise.

KIDNEY-WORT will cure you. Try a pack ge at once and be satisfied.

The Anthem Harp. (81.23.) By

A new book intended as a successor for "Per-kins" Anthem Book," published some years since, and which was a decided success. The new book contains music perfectly within the reach of commin choirs, and is desined to have a great sale. DITSON & CO. also call attention to their

three books for Singing Classes; recently pub-lished, already very popular, and worthy of uni-versal adoption: The Temple. (\$1.00.) By Dr. W. O. PEREINS.

The Voice of Worship. Johnson's Method for Singing Classes.

(60 cents.) By A. N. JOHNSON. (6) cents.) By A. N. JOHNSON.

The Temple contains an excellent Singing School Course, and a large number of Giers. Songs, Sacred Tunes and anthems for practice, and for use in classes. L.O. Emerson's Voice of Worship has exactly the same end in view as the other but has a different method, and entirely different music. Johnson's Method is for these who wish a low-proced book; is admirably simple and clear, has plenty of maste, and has a thorough course in Note Reading.

Reading.
