DOMESTIC.

ICE AND THE STOMACH .- The use of ice as a lexury, in the form of ice creat more prevalent in this country. Used in these ways they are generally taken especially by the young, recklessly, without a thought of any serious, pos-sibly fatal, results that may follow. An aver uge stomach has a great deal to do pecially when, as is frequently the case it is disturbed and irritated by food that is indigestible because of its quality or quantity. Let it be remembered that there is nothing in the bodyblood, muscle, membrane, bone, ten-don, nerve, brain or secretions-which has not come of the contents of the stomach. Neither, is there a thought a feeling, an emotion, a volition or act which has not derived the material force back of it from the stomach. Such an organ must, therefore, be highly organized. It has countless arteries veins, nerves and glands. It is line with a delicate mucous membrane, as much so as the air tubes. It is studded all over with glands which elaborate and pour into it that wonderful fluid, the gastric juice. Its coats consist of different thin layers of muscles arranged crosswise, and these are con-stantly at work, giving it that peculiar rolling motion by which the food is thoroughly mixed with the sallva. Every organ and muscle when in ac-tion must have a special supply of blood. This is especially true of the stomach. Food, therefore, fails to digest if the blood is withdrawn from the stomach, as, for instance, to the brain by study or close thought, or by anxiety immediately after eating. Now, it is the nature of cold to contract all blood vessels and drive back the blood, and to paralyze, more or less, all nerves. Of course the flow of gastric juice is checked and digestion arrested, and the proper motion of the stomach interfered with, by an ice-cold fluid introduced into it. Further when the reaction sets in, the blood vessels become over distended, producing often a dangerous congestion, and an increased thirst, with a longing for more ice water, thus inducing a 'vicious circle.' From what we have said any reade an see that iced water, or ice should not be taken into the stomac! at the same time with food. Serious consequences will often follow a disregard of this physical law.

DR. R. V. PIERCE, Consulting Physiclan to the World's Dispensary and Invalid's Hotel, of Buffalo, N. Y., has

gold—and I lees to as it has to me. Yours, most respectfully. MRS. DAVID CLARK.

J. BENTLEY, M. D., says:

It has done more good than all medical treatment. Mr. H. R. STEVENS, Boston, Mass.

Mr. H. R. STEVENS, Boston, Mass.

Sir—I have sold during the past year a considerable quantity of your Vegetine, and I believe, in all cases it has given satisfaction. In one case, a delicate young lady of about if years was much benefited by its use. Her parents informed me that it had done her more good than all the medical treatment to which she had previously been subjected.

Yours, respectfully,

J. BENTLEY, M. D.
